NMFS has determined that the petition does not present substantial scientific or commercial information indicating that the petitioned action may be warranted at this time.

DATES: This finding becomes effective on March 1, 2004.

ADDRESSES: Comments or questions concerning this petition finding should be sent to Mary Colligan, NMFS, Protected Resources Division, One Blackburn Drive, Gloucester, MA 01930.

FOR FURTHER INFORMATION CONTACT: Kim Damon-Randall, NMFS Northeast Region, 978–281–9328 ext. 6535, or Marta Nammack, NMFS Office of Protected Resources, 301–713–1401, ext. 180.

SUPPLEMENTARY INFORMATION:

Background and Analysis of Petition

Under Section 4(b)(3)(A) of the ESA, to the maximum extent practicable, within 90 days after receiving a petition to list a species under the ESA, the Secretary of Commerce (Secretary) must make a finding whether the petition presents substantial scientific or commercial information indicating that the petitioned action may be warranted. This finding must be promptly published in the **Federal Register**. In determining whether a petition contains substantial information, NMFS takes into account information submitted with and referenced in the petition and all other information readily available in NMFS' files. NMFS' ESA implementing regulations at 50 CFR 424.14(b)(1) define "substantial information" as the amount of information that would lead a reasonable person to believe that the measure proposed in the petition may be warranted. If the petition is found to present such information, the Secretary must conduct a status review of the involved species and make a determination whether the petitioned action is warranted within 12 months of receipt of the petition. In making a finding on a petition to list a species, the Secretary must consider whether such a petition (i) clearly indicates the administrative measure recommended and gives the scientific and any common name of the species involved; (ii) contains detailed narrative justification for the recommended measure, describing, based on available information, past and present numbers and distribution of the species involved and any threats faced by the species;
