Treatment, Knowledge of Medicaid and the State Children's Health Insurance Program (SCHIP), Survey of Early Childhood Health, and HIV/STD Related Risk Behavior.

SLAITS has provided policy analysts, program planners, and researchers with high quality data for decisionmaking and program assessment. For example,

the module on Medicaid and SCHIP was prominently featured in a report to Congress on insuring children. The CSHCN module has been used by Federal and State Maternal and Child Health Bureau Directors to evaluate programs and service needs. The American Academy of Pediatrics is

using the module on early childhood health to advise pediatricians on patient care standards and to inform parents about the health and well-being of young children. There is no cost to respondents other than their time to participate. The burden table below is annualized.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden hours
Household screening Household interview Pilot work, pre-testing activities, etc. Total	296,559 102,000 6,100 404,659	1 1 1	5/60 25/60 13/60	24,713 42,500 1,322 68,535

Dated: May 19, 2004.

Joe E. Salter,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Proposed Data Collections Submitted for Public Comment and Recommendations

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 498–1210. Send written comments to CDC, Desk Officer, Human

Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 or by fax to (202) 395–6974. Written comments should be received within 30 days of this notice.

Proposed Project

NCHS Technology and Aging Pilot Survey—New—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC). Recent Federal policy initiatives have targeted the removal of environmental barriers and increased access to assistive and universally designed technologies in order to increase participation in major life activities by persons of all ages with disabilities. Yet, few statistics are available to quantify the potential demand for assistive technologies and no criteria exist to evaluate the potential impact of broadened access.

CDC is seeking OMB approval to cognitively test and pilot a survey instrument that collects information on disabled persons' access to, and use of, assistive technologies and environmental modifications that can be implemented in national health surveys. This information will help policy

makers and scientists understand the interface among disability, assistive devices, and environmental modifications. Through a cooperative agreement with the National Institute on Aging, the Office of the Assistant Secretary for Planning and Evaluation has funded researchers at the Polisher Research Institute and Johns Hopkins University to develop the new measures to be tested. The testing will be conducted by the National Center for Health Statistics with funding from the Office of the Assistant Secretary for Planning and Evaluation, Department of Health and Human Services.

Approximately 300 interviews will be conducted with adults with disabilities living in the community. These interviews will be 45 minutes in length. To the extent possible, different modes of administration will be utilized (e.g., in-person, telephone, or mixed) and racially diverse samples of persons with disabilities in both rural and urban settings will be selected to maximize the sensitivity of the instrument across diverse populations. The estimated annualized burden is 58 hours.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Individuals Age 50+	100	1	35/60

Dated: May 24, 2004.

Joseph E. Salter,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and

instruments, call the CDC Reports Clearance Officer on (404) 498–1210.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-E11, Atlanta, GA 30333 or send an e-mail to omb@cdc.gov. Written comments should be received within 60 days of this notice.

Proposed Project

Information Collection to Establish Community Assistance Panels (CAPs), OMB No. 0923–0007—Extension—The Agency for Toxic Substances and Disease Registry (ATSDR) is mandated pursuant to the 1980 Comprehensive Environmental Response Compensation and Liability Act (CERCLA), and its 1986 Amendments, the Superfund Amendments and Reauthorization Act (SARA), to prevent or mitigate adverse human health effects and diminished quality of life resulting from the exposure to hazardous substances in the environment. To facilitate this effort, ATSDR seeks the cooperation of the community being evaluated through direct communication and interaction.

Direct community involvement is required to conduct a comprehensive scientific study and to effectively disseminate specific health information in a timely manner. Also, this direct interaction fosters a clear understanding of health issues that the community considers important, and establishes credibility for the agency. The Community Assistance Panel nominations forms are completed by individuals in the community to nominate themselves or others for participation on these panels.

This request is for a 3-year extension of the current OMB approved Community Assistance Panel nominations form. There is no cost to respondents.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
General Public	150	1	10/60	25
Total				25

Dated: May 24, 2004.

Proposed Project: Evaluation of the First Round of Community-Based and Participatory Research Funding Offered through CDC's Extramural Prevention Research Program (formerly known as the Prevention Research Initiative)—New—Public Health Practice Program Office (PHPPO), Centers for Disease Control and Prevention (CDC).

Two of the current priorities of CDC are to (1) substantially increase CDC's extramural public health research portfolio and budget and (2) develop a more client-oriented or customerfocused approach in all of CDC's activities. As part of its strategy to strengthen and expand extramural public health research, CDC received new money from Congress in 1999 to establish an extramural prevention research program. This program would focus on linking the talents and skills of university-based scientists with the resources of health departments, community-based programs, and
