

III. Regulatory Flexibility Analysis

The Board certifies that this amendment will not have a substantial effect on regulated entities because the only change is to raise the threshold for transactions requiring HOEPA disclosures.

Airworthiness Directives; Boeing Model 727 Series Airplanes Modified in Accordance With Supplemental Type Certificate SA1767SO or SA1768SO

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects an error that appeared in airworthiness directive (AD) 2002-16-22 that was published in the **Federal Register** on August 15, 2002 (67 FR 53434). The error resulted in an incorrect reference to a supplemental type certificate. This AD is applicable to certain Boeing Model 727 series airplanes that have been converted from a passenger- to a cargo-carrying ("freighter") configuration. This AD requires, among other actions, installation of a fail-safe hinge, redesigned main deck cargo door warning and power control systems, and 9g crash barrier.

DATES: Effective September 19, 2002.

FOR FURTHER INFORMATION CONTACT: M. Hassan Amani, Aerospace Engineer, Airframe Branch, ACE-117A, FAA, Atlanta Aircraft Certification Office, One Crown Center, 1895 Phoenix Boulevard, suite 450, Atlanta, Georgia 30349; telephone (770) 703-6080; fax (770) 703-6097.

SUPPLEMENTARY INFORMATION: Airworthiness Directive (AD) 2002-16-22, amendment 39-12861, applicable to certain Boeing Model 727 series airplanes that have been converted from a passenger- to a cargo-carrying ("freighter") configuration, was published in the **Federal Register** on August 15, 2002 (67 FR 53434). That AD requires, among other actions, installation of a fail-safe hinge, redesigned main deck cargo door warning and power control systems, and 9g crash barrier.

As published, Note 5 of AD 2002-16-22 states, "Installation of National Aircraft Service, Inc. (NASI), Vent Door System STC ST01438CH, is an acceptable means of compliance with the requirements of paragraph (e) of this AD." However, the correct supplemental type certificate (STC) is ST01270CH, as discussed in paragraph 13 of "Main Deck Cargo Door Systems" in the preamble of the final rule.

Paragraph 13 also contains an error in that it refers to "Pemco ST01270CH" rather than "NASI ST01270CH."

Since no other part of the regulatory information has been changed, the final rule is not being republished in the **Federal Register**.

The effective date of this AD remains September 19, 2002.

§ 39.13 [Corrected]

■ On page 53446, in the second column, Note 5 of AD 2002-16-22 is corrected to read as follows:

* * * * *

Note 5: Installation of National Aircraft Service, Inc. (NASI), Vent Door System STC ST01270CH, is an acceptable means of compliance with the requirements of paragraph (e) of this AD.

Airworthiness Directives; General Electric Company CF34-3A1 and -3B1 Series Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is revising an existing airworthiness directive (AD) for General Electric Company (GE) CF34-3A1 and -3B1 series turbofan engines with certain serial numbers (SNs) of stage 5 low pressure turbine (LPT) disks, part number (P/N) 6078T92P01, and/or certain SNs of stage 6 LPT disks, P/N 6078T89P01. That AD currently requires initial and repetitive visual and eddy current inspections of those disks. That AD also allows as optional terminating action to the repetitive inspections, replacement of those SN disks. Also, that AD requires replacement of certain stage 5 and stage 6 LPT disks. This AD results from the discovery that an
