SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA operates meteorological satellite imagery transmission systems

whose data are available worldwide. Any user can establish a ground station for receiving the data without prior consent from NOAA. The surveying of customers allows NOAA to learn about who uses the data, how it is used, what equipment is used, the location of the equipment, and similar subjects. This information is used to help determine the possible impact of signal or data changes, to identify users for future contacts, and to annually report to the World Meteorological Organization on the geographic location and capabilities of known receiving stations.

II. Method of Collection

People accessing the NOAA Satellite and Information System (NOAASIS) Web site for operational information are presented with an opportunity to voluntarily fill out an electronic user survey. Additionally, people contacting NOAA in a way that indicates that they may operate a satellite receiving station for acquiring NOAA data are informed that an electronic survey is available on the NOAA Web site that they can voluntarily complete.
