If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to section 15 of the FPA, notice is hereby given that an annual license for Project No. 4914 is issued to International Paper Company for a period effective December 1, 2004 through November 30, 2005, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first. Northwest Pipeline Corporation; Notice of Application for Certificate of Public Convenience and Necessity and Approval for Abandonment

December 8, 2004.

Take notice that on November 29, 2004, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84158 filed with the Federal Energy Regulatory Commission an application under section 7 of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations for its "Capacity Replacement Project", located in western Washington, requesting the Commission to grant: (i) Permission and approval to abandon approximately 268 miles of 26-inch pipeline and related facilities between Sumas and Washougal, Washington (Sumas-Washougal corridor); and (ii) a certificate of public convenience and necessity authorizing Northwest to construct and operate approximately 79.5 miles of 36-inch pipeline to partially loop Northwest's 30-inch pipeline in the Sumas-Washougal corridor, 10,760 (ISO) net horsepower of additional compression at the existing Chehalis and Washougal compressor stations, and related facilities, to replace most of the approximately 360 MDth/d of Sumas-Washougal corridor capacity attributable to the 26-inch pipeline. In addition, Northwest seeks authority to abandon a portion of the capacity along the corridor that Northwest states is not needed at this time.

Northwest states that it developed its Capacity Replacement Project in response to an amended Corrective Action Order (CAO) issued by the Office of Pipeline Safety (OPS), which requires Northwest to permanently abandon its 26-inch pipeline in the Sumas-Washougal corridor, and install replacement facilities as necessary to meet future capacity requirements. Northwest states that the estimated total cost of the proposed Capacity Replacement Project is approximately \$333.1 million.

The application is on file with the Commission and open to public
