Hazardous Waste Generator Program Evaluation

AGENCY: Environmental Protection Agency.

ACTION: Advanced notice of proposed rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) is seeking information from its stakeholders to evaluate the effectiveness of the Resource Conservation and Recovery Act's (RCRA's) hazardous waste generator regulatory program, as well as to identify areas for potential improvement. EPA, along with our State partners, will evaluate the information received in response to this notice to determine whether changes to the hazardous waste generator program are appropriate. If changes to the program are warranted, EPA will develop a strategy for implementing revisions to the hazardous waste generator program. The goals of this effort are to foster improved program effectiveness, a pollution prevention stewardship philosophy, and reduce compliance cost, where practicable. The Agency's efforts to develop revisions to the hazardous waste generator regulations would be predicated upon resource availability. The Agency also intends to hold meetings with the public to discuss this subject further, including the identification of priority concerns and potential solutions. A separate **Federal Register** notice will announce these meetings.
