

disposal) remain subject to their regular requirements. The universal waste regulations at part 273 were promulgated by EPA under the authority of Subtitle C in RCRA.

This information collection targets the collection of information for the following reporting or recordkeeping requirements: Notification, labeling and marking, storage time limitations, off-site shipments, tracking of universal waste shipments, and petitions to include other waste categories at the federal level. It is necessary for EPA to collect universal waste information to ensure that universal waste is collected and managed in a manner that is protective of human health and the environment. EPA requires, among other things, Large Quantity Handlers of Universal Waste to notify the Agency of their universal waste management activities so that EPA can obtain general information on these handlers, and to facilitate enforcement of the regulations at part 273. In addition, EPA requires universal waste handlers to record the date on which they begin storing universal waste on-site to ensure that such accumulation is performed responsibly. EPA also requires certain universal waste handlers to track receipt of universal waste shipments as well as shipments sent off-site to ensure that universal waste is properly treated, recycled, and disposed. Finally, the submission of petitions in support of regulating other wastes or waste categories under part 273 helps EPA (1) to compile information on these wastes, and (2) to determine whether regulation as a universal waste is appropriate.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic,

mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The average public recordkeeping burden for Small Quantity Handlers of Universal Waste (SQHUWs) under this collection of information is estimated to be 1.4 hours per year. This estimate includes time for reading the regulations, labeling universal waste, and maintaining records demonstrating the length of storage. The reporting burden for SQHUWs (for submitting notices of rejected or illegal universal waste shipments) is expected to be negligible. The recordkeeping burden for Large Quantity Handlers of Universal Waste (LQHUWs) under this collection of information is estimated to be 2.8 hours per year. This estimate includes time for reading the regulations, labeling universal waste, maintaining records demonstrating the length of storage, and maintaining records of universal waste received and sent. The reporting burden for LQHUWs is estimated to be 0.5 hours per year. This estimate includes time for notifying EPA of universal waste management, and preparing and submitting notices of rejected or illegal universal waste shipments. The recordkeeping burden for destination facilities is estimated to be 183.1 hours per year. This estimate includes time for reading the regulations and maintaining records of universal waste received. The reporting burden for destination facilities is estimated to be 18.4 hours per year. This estimate includes time for preparing and submitting notices of rejected or illegal universal waste shipments.

Respondents/Affected Entities: SQHUWs, LQHUWs, and Destination Facilities.

Estimated Number of Respondent: 119,738 (118,367 SQHUWs, 1,313 LQHUWs, and 58 Destination Facilities).

Frequency of Response: as needed.

Estimated Total Annual Hour Burden: 185,682 hours.

Over a 3 year period: 556,872.

Estimated Total Annualized Capital, O&M Cost Burden: \$2,098.

Over a three year period: \$6,295.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and

providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

II. Background

The Food Quality Protection Act, Public Law 104-170, was passed in 1996 to strengthen the nation's system for regulating pesticides on food. The Committee to Advise on Reassessment and Transition, CARAT, is preceded by the EPA-USDA Tolerance Reassessment Advisory Committee (TRAC). Its purpose is to provide advice and counsel to the Administrator of EPA and the Secretary of Agriculture regarding strategic approaches for pest management planning and tolerance reassessment for pesticides as required by FQPA. Through CARAT, EPA and USDA are working together to ensure smooth implementation of FQPA through use of sound science, consultation with stakeholders, increased transparency, and reasonable transition for agriculture.

EPA and USDA intend to appoint members to 1- or 2-year terms. An important consideration in the selection of members will be to maintain balance and diversity of experience and expertise. EPA also intends to seek broad geographic representation from the following sectors: Pesticide industry and trade associations, farmers, environmental/public interest groups, public health officials, pediatric experts, food processors and distributors, academicians, and tribal, state and local government officials.

Copies of the CARAT Charter are filed with appropriate committees of Congress and the Library of Congress and are available upon request.
