SUPPLEMENTARY INFORMATION:

Background

The regulations in 7 CFR part 319 (referred to below as the regulations) prohibit or restrict the importation of various articles into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests that are new to or not widely distributed within the United States.

The Animal and Plant Health Inspection Service is considering a request to amend the regulations to allow the importation of potatoes (*Solanum tuberosum* L.) from Mexico into the continental United States for consumption. To evaluate the risks associated with the importation of potatoes from Mexico, a draft commodity risk assessment, entitled “Importation of Fresh Potato (*Solanum tuberosum* L.) Tubers from Mexico into the Continental United States” (November 2003), has been prepared. We are making the draft commodity risk assessment available to the public for review and comment. We will consider all comments that we receive on or before the date listed under the heading **DATES** at the beginning of this notice.

The draft commodity risk assessment may be viewed on the Internet at <http://www.aphis.usda.gov/ppq/pra/>. You may request paper copies of the draft commodity risk assessment by calling or writing to the person listed under **FOR**

FURTHER INFORMATION CONTACT. Please refer to the title of the draft commodity risk assessment when requesting copies. The draft commodity risk assessment is also available for review in our reading room (information on the location and hours of the reading room is provided under the heading **ADDRESSES** at the beginning of this notice).
