National Institute of Nursing Research; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the National Advisory Council for Nursing Research.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodation, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and/or contract proposals and the

discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council for Nursing Research.

Date: January 27-28, 2004.

Open: January 27, 2004, 1 p.m. to 5 p.m. Agenda: For discussion of program policies and issues.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 6, Bethesda, MD 20892.

Closed: January 28, 2004, 9 a.m. to Adjournment.

Ágenda: To review and evaluate grant applications and/or proposals.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 6, Bethesda, MD 20892.

Contact Person: Claudette Varricchio, Program Director, National Institute of Nursing Research, National Institutes of Health, 6701 Democracy Blvd, Room 710, Bethesda, MD 20892–4870, (301) 402-6423, varriccc@mail.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Information is also available on the Institute's/Center's Home page: http://www.nih.gov/ninr/a_advisory.html, where an agenda and any additional information for the meeting will be posted when available. Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (301) 443–7978.

National Evaluation of the
Comprehensive Community Mental
Health Services for Children and Their
Families Program, Phase Four—New—
SAMHSA's Center for Mental Health
Services (CMHS) is conducting Phase IV
of this national evaluation project
among grantees newly funded in FY
2002 and 2003. The national evaluation
of the Comprehensive Community
Mental Health Services for Children and
Their Families Program will collect data
on child mental health outcomes, family
life, and service system development
and performance.

Data will be collected on 32 service systems, and approximately 7,868 children and families. Data collection for this evaluation will be conducted in each site over a five-year period. The core of service system data will be collected every 18 months throughout the 5-year evaluation period, with a sustainability survey conducted in selected years. Service delivery and system variables of interest include the following: maturity of system of care development, adherence to the system of care program model, and client service experience. The length of time that individual families will participate in the study ranges from 18 to 36 months depending on when they enter the evaluation.

Child and family outcomes of interest will be collected at intake and during subsequent follow-up sessions at sixmonth intervals. The outcome measures include the following: child symptomatology and functioning, family functioning, material resources, and caregiver strain. In addition, an evidence-based treatment study will examine the relative impact of evidencebased treatments focused on substance use prevention within two systems of care. Time-limited studies addressing the cultural competence of services and the role of primary care providers in systems of care will be conducted at selected points during the evaluation period. Internet-based technology will be used for collecting data via Webbased surveys and for data entry and management. The average annual respondent burden is estimated below.
