SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to The Connecticut Agricultural Experiment Station (Experiment Station) for Materials License No. 06-03754-01, to authorize release of the Johnson Laboratory in New Haven, Connecticut for unrestricted use. NRC has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following publication of this Notice.

II. EA Summary

The purpose of the proposed action is to authorize the release of the licensee's Johnson Laboratory, New Haven, Connecticut facility for unrestricted use. The Experiment Station has been authorized by NRC since July 9, 1958 to use radioactive materials for research and development purposes at the Johnson Laboratory. On September 4, 2003, the Experiment Station requested that NRC release the facility for unrestricted use. The Experiment Station has conducted surveys of the facility as required by 10 CFR Part 20 and performed an assessment of residual contamination, and has determined that the facility meets the license termination criteria in Subpart E of 10 CFR Part 20. The NRC staff has prepared an EA in support of the proposed license amendment.
