### History

On September 11, 2001, the United States (U.S.) suffered catastrophic terrorist attacks involving four hijacked U.S. commercial aircraft. In response to these attacks, the FAA took action to temporarily shut down the National Airspace System with the exception of certain military, law enforcement, and emergency aircraft flight operations. Additionally, to hinder the potential for further airborne attacks and to specifically respond to security concerns, the FAA issued numerous TFRs to limit or prohibit aircraft flight operations in the vicinity of critical military, government, and national infrastructure locations across the country. Beginning on September 12, 2001, the FAA issued a series of TFRs to prohibit aircraft flight operations over a wide area in the vicinity of the U.S. Naval Submarine Base at Bangor, WA. The current NOTAM 4/0221 for this area was issued on January 9, 2004.

### U.S. Navy Request

Due to the current world situation and continued security concerns at this facility, the U.S. Navy has requested that the FAA designate a prohibited area at Bangor, WA, to enhance Navy security efforts at the submarine base. This proposal responds to that request.

### Statutory Authority

The FAA Administrator has broad authority to regulate the safe and

efficient use of the navigable airspace (49 U.S.C. 40103(a)). The Administrator is also authorized to issue air traffic rules and regulations to govern the flight of aircraft, the navigation, protection, and identification of aircraft for the protection of persons and property on the ground, and for the efficient use of the navigable airspace. Additionally, pursuant to 49 U.S.C. section 40103(b)(3) the Administrator has the authority, in consultation with the Secretary of Defense, to "establish security provisions that will encourage and allow maximum use of the navigable airspace by civil aircraft consistent with national security." Such provisions may include establishing airspace areas the Administrator decides are necessary in the interest of national defense; and by regulation or order, restrict or prohibit flight of civil aircraft that the Administrator cannot identify, locate, and control with available facilities in those areas.

### The Proposal

In response to the U.S. Navy request, the FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 73 (part 73) to designate a prohibited area over the U.S. Naval Submarine Base, at Bangor, WA. The proposed prohibited area, designated as P-51, would consist of that airspace from the surface up to but not including 2,500 feet mean seal level (MSL), to include base property on the east side of the Hood Canal, the water across the Hood Canal, and the base owned land portion of the Toandos Peninsula. No person may operate an aircraft within a prohibited area unless authorization has been granted by the using agency, and a waiver is issued by the FAA in accordance with 14 CFR 91.903. The proposed prohibited area dimension is reduced from that contained in the current TFR in effect for the Bangor Submarine base. If implemented, P-51 would modify and replace the current TFR at Bangor, WA detailed in NOTAM 2/0447.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine

matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### Environmental Review

The FAA has reviewed this action in accordance with the National Environmental Policy Act and FAA Order 1050.1D, Policies and Procedures for Considering Environmental Impacts. The FAA has determined that this action is neither permissive nor enabling and no extraordinary circumstance exists, therefore it does not require an environmental assessment or statement.
