The Proposal

The FAA is considering an amendment to Title 14 Code of Federal Regulations part 71 (14 CFR part 71) to establish Class D airspace at Provo, UT. An ATCT is being constructed at Provo Municipal Airport and Class D airspace is required during the hours the ATCT

is open. Class D controlled airspace is necessary for the safety of aircraft executing SIAPs and other IFR operations at Provo Municipal Airport. Class D airspace will be effective during specified dates and times established in advance by a Notice to Airmen. The effective date and time will, thereafter, be published in the Airport/Facility Directory.

Class D airspace areas designated as surface areas are published in Paragraph 5000 of FAA Order 7400.9L dated September 2, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR part 71.1 The Class D airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11013; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9L, Airspace Designations and Reporting Points, dated September 2, 2003, and effective September 16, 2003, is amended as follows:

Paragraph 5000 Class D airspace designated as surface area for an airport.

History

On September 11, 2001, the United States (U.S.) suffered catastrophic terrorist attacks involving four hijacked U.S. commercial aircraft. In response to these attacks, the FAA took action to temporarily shut down the National Airspace System with the exception of certain military, law enforcement, and emergency aircraft flight operations. Additionally, to hinder the potential for further airborne attacks and to specifically respond to security concerns, the FAA issued numerous TFRs to limit or prohibit aircraft flight operations in the vicinity of critical military, government, and national infrastructure locations across the country. Beginning on September 12, 2001, the FAA issued a series of TFRs to prohibit aircraft flight operations over a wide area in the vicinity of the U.S. Naval Submarine Base at Bangor, WA. The current NOTAM 4/0221 for this area was issued on January 9, 2004.

U.S. Navy Request

Due to the current world situation and continued security concerns at this facility, the U.S. Navy has requested that the FAA designate a prohibited area at Bangor, WA, to enhance Navy security efforts at the submarine base. This proposal responds to that request.
