Merimil Limited Partnership; Notice of Availability of Final Environmental Assessment

April 22, 2004.

In accordance with the National Environmental Policy Act of 1969 (NEPA) and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for license for the Lockwood Hydroelectric Project, located on the Kennebec River in Kennebec County, Maine, and prepared this final environmental assessment (FEA). The FEA contains staff's analysis of the environmental effects of the proposal and concludes that licensing the project, with additional staff-recommended measures, would not constitute a major Federal action significantly affecting the human environment.

A copy of the FEA is available for review at the Commission in the Public Reference Room, or it may be viewed on the Commission's Web site at www.ferc.gov using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. [OPP-2004-019; FRL-7352-5]

OPP Pesticide Research and Training Program; Notice of Funds Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA's Office of Pesticide Programs (OPP) is soliciting proposals from colleges, universities, and other institutions to train graduate and undergraduate students from culturally diverse backgrounds in the Agency's regulatory support and laboratory research activities. These activities are undertaken to provide safer, reduced risk pesticides and to protect public health and the environment. The laboratory research and regulatory support projects with OPP laboratories (located in Ft. Meade, MD) and divisions will be funded separately over a 5-year period. The total funding available for award for laboratory research projects involving graduate students in fiscal year (FY) 2004 is expected to be approximately \$90,000. The total funding for regulatory support projects involving graduate and undergraduate students in FY 2004 will

range from \$60,000 to \$100,000. At the conclusion of the first 1-year period of performance on each project, incremental funding may be available for each year, allowing the project to continue for up to 5 periods of performance (approximately 5 years), depending on applicant need and the Agency budget in outlying years. This program will support laboratory research training in areas such as deoxyribonucleic acid (DNA) microarray analysis of toxicogenomic effects of pesticides on cell response and regulatory support training in areas such as the development of assessments of pesticide use patterns, as provided for in section 20 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

DATES: Applications must be received by EPA on or before May 28, 2004.
