SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35, as amended). The Housing Choice Voucher (HCV) Program is a major program of the Federal government for assisting very low-income families, the elderly, and the disabled to afford decent, safe, and sanitary housing in the private market. Since housing assistance is provided on behalf of the family or individual, participants are able to find their own housing, including single-family homes, townhouses and apartments.

Under section 8(y) of the United States Housing Act of 1937, as amended, a public housing agency may provide tenant-based assistance to an eligible family that purchases a dwelling unit the family will occupy. In implementation of this statute, a PHA may choose to administer a homeownership voucher program and provide homeownership assistance payments to eligible home buyers using funds available by HUD to the PHA under the housing choice voucher program. Homeownership assistance payments are made available by the PHA to assist participants in paying mortgage and other homeownership expenses.

Collection of accurate information regarding private home purchases under this program is vital to PIH's ability to measure the program usage and effectiveness, promote and further the purposes of the program, as well as to provide information to the public and to Congress regarding program implementation. The purpose of this survey is to contact public housing agencies to collect information regarding the number of homeownership closings, problems in reporting homeownership closings under PIH reporting systems, and to obtain information needed to plan the application of resources to further promote and expand the program.

This notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) enhance the quality, utility, and clarity of the information to be collected; and (4) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.
