**DEPARTMENT OF THE INTERIOR****Bureau of Reclamation**

[INT-FES-04-09]

**Banks Lake Drawdown, Columbia Basin Project, Washington**

**AGENCY:** Bureau of Reclamation,  
Interior.

**ACTION:** Notice of availability of the  
Banks Lake Drawdown final  
environmental impact statement.

**SUMMARY:** Pursuant to section 102(2)(C)  
of the National Environmental Policy  
Act of 1969, as amended, the  
Department of the Interior, Bureau of  
Reclamation (Reclamation), has  
prepared a final environmental impact  
statement (Final EIS) that examines the  
impacts of annually lowering the water  
surface elevation of Banks Lake in  
August.

The Final EIS evaluates two  
alternatives. The Action Alternative  
describes the resource conditions that  
would occur with Banks Lake water  
surface elevations between 1570 feet  
and 1560 feet, while the No Action  
Alternative describes the conditions that  
would occur without the action, with  
surface elevation between 1570 feet and  
1565 feet. Both the No Action and  
Action Alternatives include four  
possible operational scenarios that  
could occur within their respective  
ranges, depending upon the hydrology  
of each year. The Action Alternative  
refills the reservoir to elevation 1565 by  
September 10 and to 1570 feet by  
September 22. The No Action  
Alternative also refills to 1570 feet  
elevation by September 22.

The Final EIS includes the comment  
letters received on the Draft EIS and  
Reclamation's responses to those  
comments, as well as a summary of  
comments from the public hearings.  
Changes from the Draft EIS include  
minor revisions and additions to the  
analysis as a result of review comments.  
The No Action Alternative is identified  
as the preferred alternative in the Final  
EIS.

A Record of Decision (ROD)  
identifying the alternative chosen for  
implementation, and discussing factors  
for its selection, is anticipated by June,  
2004.

**ADDRESSES:** Copies of the Final EIS are  
available for public review and  
inspection at the locations listed in the  
Supplementary Information Section.

**FOR FURTHER INFORMATION CONTACT:** Mr.  
Jim Blanchard, Special Projects Officer,  
at (509) 754-0226 (relay users may dial  
711). Those wishing to obtain a copy of  
the Final EIS in the form of a printed  
document or a compact disk (CD-ROM  
with reader included), or a summary of  
the Final EIS may contact Mr.  
Blanchard.

**SUPPLEMENTARY INFORMATION:** Since its  
creation in the early 1950s, Banks Lake  
has been operated and maintained for  
the storage and delivery of irrigation  
water drawn from the Columbia River to  
Columbia Basin Project (CBP) lands.  
Reclamation operates the reservoir  
within established constraints on water  
surface elevation to meet contractual  
obligations, ensure public safety, and  
protect property. Reclamation considers  
other resource needs as feasible within  
existing operational constraints.

In December of 2000, the National  
Marine Fisheries Service issued a  
Biological Opinion (BiOp) to the Bureau  
of Reclamation, Bonneville Power  
Administration and the U.S. Army  
Corps of Engineers for the operation of

the Federal Columbia River Power  
System. The BiOp's Reasonable and  
Prudent Alternative (RPA) included  
Action 31 that advised Reclamation to  
"assess the likely environmental effects  
of operation of Banks Lake up to 10 feet  
down from full pool during August." Reclamation has completed RPA Action  
31 by preparing the Banks Lake  
Drawdown Environmental Impact  
Statement which describes and analyzes  
the environmental effects of lowering  
the August surface elevation of Banks  
Lake annually to elevation 1560 feet,  
which is 10 feet below full pool.

Copies of the Final EIS are available  
for public review and inspection at the  
following locations:
