## NUCLEAR REGULATORY COMMISSION

[Docket No. 030-33765; License No. 24-26628-01; EA-03-177]

### KTL Roudebush Testing, Kansas City, MO; Order Suspending License (Effective Immediately) and Demand for Information

KTL Roudebush Testing (Licensee) is the holder of Byproduct Material License No. 24-26628-01 issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR parts 30 and 34. The license authorizes the possession and use of iridium-192 in sealed sources for industrial radiography, and cesium-137 and americium-241 in sealed sources for measuring physical properties of materials, at temporary job sites of the Licensee anywhere in the United States where the NRC maintains jurisdiction for regulating the use of licensed material. The license identifies Christopher V. Roudebush as the Radiation Safety Officer (RSO). Mr. Roudebush is the President and owner of KTL Roudebush Testing, and he serves as a Licensee radiographer. The license, originally issued on November 20, 1995, was last amended on January 16, 2004, and is due to expire on March 31, 2011.

On April 8, 2003, two NRC inspectors attempted to inspect the Licensee's activities and inquired about radiography at temporary job sites. The Licensee's RSO indicated that the Licensee might be performing radiography work at the Kansas City Power & Light Iatan Generating Station located in Weston, Missouri on either Thursday or Friday (April 10 or 11, 2003). On the morning of April 10, 2003, the inspectors again called the Licensee inquiring about radiography at temporary job sites. A Licensee employee, a radiographer's assistant, answered and stated that the Licensee's staff had just finished radiography at a temporary job site in Weston, Missouri, and was preparing to return to the main office. Following the telephone conversation, the inspectors drove to the Licensee's office at 1606 Cherry Street, Kansas City, Missouri and waited for the work crew to return. When a Licensee
