DATES: Effective date: April 15, 2004.

Comment Date: Comments must be received on or before February 19, 2004. FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Aviation Plaza, Jamaica, NY 11434–4809, telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION: Although this action is a final rule, which involves the amendment of Class E airspace within New York, and New Jersey, by consolidating that airspace into one description, and was not preceded by notice and public procedure, comments are invited on the rule. This rule will become effective on the date specified in the DATES section. However, after the review of any

comments and, if the FAA finds that further changes are appropriate, it will initiate rulemaking proceedings to extend the effective date or to amend the regulation.

Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule, and in determining whether additional rulemaking is required. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the rule which might suggest the need to modify the rule.

#### The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) amends the description of Class E airspace in the New York, NY area by removing the airspace designations for Babylon, NY; Ossining, NY; White Plains, NY; Andover, NJ; Linden, NJ; Manville, NJ; Old Bridge, NJ; Princeton, NJ; Readington, NJ; Somerville, NJ; Sussex, NJ; and West Milford, NJ. It consolidates those airspace areas into the New York, NY description. The proliferation of airports with Instrument Flight Rule (IFR) operations in the vicinity of New York, NY has resulted in the overlap of numerous Class E airspace areas that complicate the chart depictions. This action clarifies the airspace and diminishes the scope and complexity of charting. The IFR airports within those areas will be incorporated into the New York, NY Class E airspace area. Accordingly, since this action merely consolidates these airspace areas into one airspace designation and has inconsequential impact on aircraft operations in the area, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

Class E airspace designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9L, dated September 2, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order. The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a

Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

## History

Airspace Docket No. 99–AEA–09, published in the **Federal Register** on October 26, 1999 (64 FR 57557–57558), established the Class E–2 airspace area at York Airport, York County, PA. The description of the airspace incorporated the geographic reference point (GRP) for the airport. The designation was subsequently published in Federal Aviation Administration Order 7400.9L, Airspace Designations and Reporting Points, dated September 2, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR 71.1.

#### **Need for Correction**

The final rule described the geographic position of the airport with a GRP. Other airspace designations for the airport incorporate the airport reference point (ARP) in the descriptions. This action deletes the GRP and incorporates the ARP for the airport in the description of the Class E–2 airspace designation.
