BILLING CODE 8025-01-P

DEPARTMENT OF STATE

[Public Notice 4351]

United States International Telecommunication Advisory Committee Information Meeting on the World Summit on the Information Society and the U.S. Preparatory Process

The Department of State announces meetings of the U.S. International Telecommunication Advisory Committee (ITAC). The purpose of the Committee is to advise the Department on matters related to telecommunication and information policy matters in preparation for international meetings pertaining to telecommunication and information issues.

The ITAC will meet to discuss the matters related to the World Summit on the Information Society (WSIS), which will take place in December 2003, including U.S. preparations for the WSIS. The meeting will take place on Wednesday, July 9, 2003 from 10:30 a.m. to 12 p.m. at the Historic National Academy of Science Building. The National Academy of Sciences is located at 2100 C St. NW., Washington, DC.

This meeting announcement does not meet the official deadline due to constraints imposed by the travel of senior officials who will brief on WSIS. Members of the public are welcome to participate and may join in the discussions, subject to the discretion of the Chair. People intending to attend a meeting at the Department of State should send the following data by fax to

(202) 647-7407 or e-mail to worsleydm@state.gov not later than 24 hours before the meeting: (1) Name of the meeting, (2) your name, and (3) organizational affiliation. A valid photo ID must be presented to gain entrance to the National Academy of Sciences Building. Directions to the meeting location may be obtained by calling the ITAC Secretariat at 202 647-2592 or e-mail to worsleydm@state.gov.

Dated: June 5, 2003.

Joseph P. Richardson,
Office of Multilateral Affairs, International Communications and Information Policy, Department of State.

Federal Aviation Administration

Proposed Advisory Circular; Turbine Rotor Strength Requirements

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability of proposed advisory circular and request for comments.

SUMMARY: The Federal Aviation Administration (FAA) announces the availability of proposed advisory circular (AC) Number 33.27-1, Turbine Rotor Strength Requirements of 14 CFR 33.27.

DATES: Comments must be received on or before August 1, 2003.

ADDRESSES: Send all comments on the proposed AC to the Federal Aviation Administration, Attn: Tim Mouzakis, Engine and Propeller Standards Staff, ANE-110, 12 New England Executive Park, Burlington, MA 01803-5299.

FOR FURTHER INFORMATION CONTACT: Tim Mouzakis, Engine and Propeller Standards Staff, ANE-110, at the above address; telephone: (781) 238-7114; fax: (781) 238-7199; e-mail: timoleon.mouzakis@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the subject AC may be obtained by contacting the person named under **FOR FURTHER INFORMATION CONTACT** or by downloading the proposed AC from the following Internet Web site: <http://www.airweb.faa.gov/rgl>. The FAA invites interested parties to comment on the proposed AC. Comments should identify the subject of the AC and be submitted to the individual identified under **FOR FURTHER INFORMATION**

CONTACT. The FAA will consider all communications received by the closing date before issuing the final AC.

Background

This AC provides guidance and acceptable methods, but not the only methods, for demonstrating compliance with the rotor strength (overspeed) requirements of § 33.27 of title 14 of the Code of Federal Regulations (14 CFR 33.27).

(Authority: 49 U.S.C. 106(g), 40113, 44701-44702, 44704.)

Issued in Burlington, Massachusetts, on June 11, 2003.

Peter A. White,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petitions for Waivers of Compliance

In accordance with title 49 Code of Federal Regulations (CFR) section 211.41, and 49 U.S.C. 20103, this notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance from certain requirements of its safety regulations. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being sought, and the petitioner's argument in favor of relief.

Canadian National Railway; FRA Waiver Petition No. FRA-2003-15012

Canadian National Railway (CN) located in Montreal, Canada, seeks a permanent waiver of compliance from 49 CFR 241.7(c), *United States Locational Requirements for Dispatching of United States Rail Operations*, to allow the continuation of Canadian dispatching of that part of the Sprague Subdivision located in the United States, extending between Baudette, Minnesota, and International Boundary, Minnesota, approximately 43.8 miles and on those parts of the Strathroy and Flint Subdivisions located in the United States, forming a continuous line between Sarnia, Ontario, Canada, through the St. Clair River Tunnel, and Port Huron, Michigan, approximately 3.1 miles, as defined in appendix A to part 241. This request formalizes the request for waiver requirement contained in part 241, specifically § 241.7(c)(3), which refers to territory that was previously

grandfathered in the exceptions to extraterritorial dispatching contained in FRA's Interim Final Rule (see 66 FR 63942, December 11, 2001).

In this regard, the track segments identified in the Interim Final Rule remains the same as identified above. With respect to the Sprague Subdivision, this is part of a continuous line extending between Rainy River, Ontario, and Navin, Manitoba, Canada, a distance of 145.2 miles, a portion of which cuts across a corner of the State of Minnesota, from the U.S./Canadian border near Baudette, Minnesota (milepost 1.1), and the U.S./Canadian border at a point identified as International Boundary, Minnesota, milepost 44.9, a distance of approximately 43.8 miles.

Approximately 15 trains per day are operated over this segment. Each train that traverses this territory is operated by the same crew. The entire Sprague Subdivision is single track and is operated under a Centralized Traffic Control system, controlled from a single dispatching desk at CN's Rail Traffic Control Center in Edmonton, Alberta, Canada. With respect to the Strathroy and Flint Subdivisions, this is part of a continuous line extending between London, Ontario, Canada, and Port Huron, Michigan, a distance of 61.7 miles, a 3.1 mile portion of which is located in the United States.

Approximately 26 trains per day are operated over this segment. Each train that traverses this territory is operated by the same crew. This segment consists of a single track for approximately 1.1 miles, and two main tracks for the remaining 2.0 miles, and is operated under a Centralized Traffic Control system, controlled from a single dispatching desk at CN's Rail Traffic Control Center in Toronto, Ontario, Canada. Dispatching of all trackage of the Sprague Subdivision and the Strathroy and Flint Subdivisions is an entirely English operation and fully dispatched in English. Canadian Rail Operating Rules (CROR) and CN's Timetable and Special Instructions govern train operations on this trackage. CN uses English (or Imperial) units for all aspects of railroad operations, including distance, speed, and location. The CN dispatchers are covered under their company drug and alcohol policies and their dispatching office is under 24-hour security. Transport Canada Rail Safety Directorate has the legislative safety jurisdiction over CN in accordance with the provisions contained in the Railway Safety Act over all federally regulated railways operating in Canada.

Based on the foregoing, CN seeks a permanent waiver of compliance from 49 CFR 241.7(c), *United States Locational Requirements for Dispatching of United States Rail Operations*, to allow the continuation of Canadian dispatching on that part of the Sprague Subdivision located in the United States and on those parts of the Strathroy and Flint Subdivisions located in the United States, as described above.

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with the request for a waiver of certain regulatory provisions. If any interested party desires an opportunity for oral comment, he or she should notify FRA, in writing, before the end of the comment period and specify the basis for his or her request. All communications concerning these proceedings should identify the appropriate docket number (Docket Number FRA 2003-15012) and must be submitted to the DOT Docket Management Facility, Room PL-401 (Plaza level) 400 Seventh Street, SW., Washington, DC 20590. All documents in the public docket, including CN's detailed waiver request, are also available for inspection and copying on the Internet at the docket facility's Web site at <http://dms.dot.gov>. Communications received within 30 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning this proceeding are available for examination during regular business hours (9 a.m.-5 p.m.) at the above facility.

FRA wishes to inform all potential commenters that anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78) or you may visit <http://dms.dot.gov>.

Issued in Washington, DC on June 11, 2003.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petitions for Waivers of Compliance

In accordance with Title 49 Code of Federal Regulations (CFR) section 211.41, and 49 U.S.C. 20103, this notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance from certain requirements of its safety regulations. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being sought, and the petitioner's argument in favor of relief.

Canadian Pacific Railway; FRA Waiver Petition No. FRA-2003-15010

Canadian Pacific Railway (CP) located in Montreal, Canada, seeks a permanent waiver of compliance from 49 CFR 241.7(c), *United States Locational Requirements for Dispatching of United States Rail Operations* to allow the continuation of Canadian dispatching of that part of the Windsor Subdivision located in the United States, extending between Windsor, Ontario, Canada, and Detroit, Michigan, approximately 1.8 miles, as defined in appendix A to part 241. This request formalizes the request for waiver requirement contained in part 241, specifically § 241.7(c)(3), which refers to territory that was previously grandfathered in the exceptions to extraterritorial dispatching contained in FRA's Interim Final Rule (see 66 FR 63942, December 11, 2001).

In this regard, the track segment identified in the Interim Final Rule remains the same as identified above. All trains operated into the United States are of very short distances to an interchange point with a U.S. railroad and are always under the control of a single crew. All dispatching is conducted in English. All units of measure are the same as those used in the U.S. Because of the very short distances, all train operations in the U.S. are under the control of a single dispatching desk, located in CP's Network Management Center in Montreal, Quebec, Canada. CP operates approximately 6 to 8 trains a day over this segment. The trackage is operated under a Centralized Traffic Control system and consists of two main tracks for the entire 1.8 mile distance. Movements are governed by the Canadian Rail Operating Rules (CROR) and CP's Timetable and Special Instructions. CP's train dispatchers are covered under their company drug and
