BILLING CODE 6560-50-P

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### 42 CFR Part 83

RIN 0920-ZA00

#### Procedure for Designating Classes of Employees as Members of the Special Exposure Cohort Under the Energy Employees Occupational Illness Compensation Program Act of 2000

**AGENCY:** Department of Health and Human Services.

**ACTION:** Notice of proposed rulemaking; extension of comment period.

**SUMMARY:** The Department of Health and Human Services (HHS) is extending the comment period for the proposed rule on procedures for designating classes of employees as members of the Special Exposure Cohort under the Energy Employees Occupational Illness Program Act (EEOICPA) that was published in the *Federal Register* on Friday, March 7, 2003.

**DATES:** Any public written comments on the proposed rule must be received on or before May 6, 2003.

**ADDRESSES:** Address written on the notice of proposed rulemaking to the NIOSH Docket Officer. Electronically e-mail comments to:

*NIOCINDOCKET@CDC.GOV.*

Alternatively, submit printed comments to NIOSH Docket Office, Robert A. Taft Laboratories, MS-C34, 4676 Columbia Parkway, Cincinnati, OH 45226.

**FOR FURTHER INFORMATION CONTACT:** Larry Elliott, Director, Office of Compensation Analysis and Support, National Institute for Occupational Safety and Health, 4676 Columbia Parkway, Cincinnati, Ohio 45226, Telephone 513-841-4498 (this is not a toll free number). Information requests may also be submitted by e-mail to *OCAS@CDC.GOV.*

**SUPPLEMENTARY INFORMATION:** On March 7, 2003, HHS published a notice of proposed rulemaking proposing a procedure for designating classes of employees as members of the Special Exposure Cohort under EEOICPA, (*See* FR Vol. 68, No. 45, 11294). The notice included a public comment period that was to end on April 7, 2003. On March 7, 2003, NIOSH convened the Advisory Board on Radiation and Worker Health

to review the proposed rule. The Board recommended that the comment period be extended by 15 days, for a total of 45 days, to ensure the public has adequate time to review and comment on the proposal. HHS agrees with the Board that a longer comment period is desirable, and is now providing for a 60-day comment period.

To provide the public with additional time to review and comment on the proposed rule, HHS is extending the public comment period to May 6, 2003.

Dated: March 21, 2003.

**Tommy G. Thompson,**

*Secretary.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### 50 CFR Part 648

[Docket No. 030314059-3059-01; I.D. 030603B]

RIN: 0648-AQ48

#### Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Small Mesh Multispecies Fishery; Northeast Multispecies Fishery Management Plan

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Advance notice of proposed rulemaking; notice of a new control date for the purpose of controlling entry in the small-mesh multispecies fishery.

**SUMMARY:** NMFS announces that it is considering, and is seeking public comment on, proposed rulemaking to control future access to the small mesh multispecies (silver hake, *Merluccius bilinearis*; red hake, *Urophycis chuss*; offshore hake, *Merluccius albidus*) resources if a management regime is developed and implemented under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) that limits the number of participants in the fishery. This announcement is intended, in part, to promote awareness of potential eligibility criteria for future access to the small mesh multispecies fishery and to discourage speculative entry into the fishery while the New England Fishery Management Council (Council) and NMFS consider whether and how access to the small-mesh multispecies fishery should be controlled. The date of

publication of this document, March 25, 2003, shall be known as the "control date" and may be used for establishing eligibility criteria for determining levels of future access to the small mesh multispecies fishery subject to Federal authority. Participants who enter the small mesh multispecies fishery on or after March 25, 2003 may be treated differently than those with a history in the fishery before this date. The establishment of this control date does not prevent any other control date for eligibility in the fishery or another method of controlling access and/or fishing effort on small mesh multispecies from being proposed and implemented by the Council and NMFS.

**DATES:** Written comments must be received on or before 5:00 p.m., local time, April 24, 2003.

**ADDRESSES:** Written comments should be sent to Paul Howard, Executive Director, New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950. Mark the outside of the envelope, "Comments on Small Mesh Multispecies Control Date." Comments also may be sent via facsimile (fax) to (978) 465-3116. Comments will not be accepted if submitted via e-mail or the Internet.

**FOR FURTHER INFORMATION CONTACT:** E. Martin Jaffe, Fishery Policy Analyst, 978-281-9272.

**SUPPLEMENTARY INFORMATION:** A control date for the silver hake, offshore hake, and red hake fisheries was established on September 9, 1996 (61 FR 47473), to promote awareness of potential eligibility criteria for future access to the small mesh fishery and to discourage new entry into the fishery. The Council used this control date to develop a proposed limited access program for this fishery included in Amendment 12 to the Northeast Multispecies Fishery Management Plan (FMP), a management program for small mesh multispecies that was implemented on April 28, 2000. The Amendment 12 limited access program for small mesh multispecies was later disapproved by NMFS because it was found to be inconsistent with some of the requirements of the Magnuson-Stevens Act. As a result, the small mesh multispecies fishery remains an open-access fishery.

The Council intends to develop a new amendment to address limited access in the small-mesh multispecies fishery. The Council is concerned that conditions have changed sufficiently in this fishery to make the September 1996 control date an unreliable indicator of current participation. A new control date would reflect current participation
