The National Institutes of Health may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a current valid OMB control number.

**Proposed Collection: Title:** The Effectiveness of NIDA's Publications Project. **Type of Information Collection Request:** New. **Need and Use of Information Collection:** This is a request for a three-year generic clearance to study the level of customer satisfaction in relation to public health information publications produced by the Institute. This effort is made according to Executive Order 12862, which directs Federal agencies that provide significant services directly to the public to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services. The primary purpose of the Project is to assess NIDA's effectiveness in developing and disseminating selected public health information publications designed to promote the use of science-based evidence to improve drug abuse and addiction prevention, treatment, and policy. A multi-method approach (survey, in-person interviews, focus groups) will be used to determine the use and usefulness of selected NIDA public health information publications for several of NIDA's key audiences. Measures will include outcomes associated with the following variables: Knowledge/awareness of the publications, receipt of the publications, reading of the publications, use of the publications, perceived utility of the publications, and the impact of the publications on the use of science-based evidence to improve drug abuse and addiction prevention, treatment, and policy. **Frequency of Response:** Respondents will not be asked to respond more frequently than annually or biennially. **Affected Public:** Individuals or households; state or local governments; organizations; businesses or educational institutions. **Type of Respondents:** Community coalition leaders, drug abuse treatment and prevention service providers, drug abuse researchers, Native Americans, middle school science and health educators, public health policy makers
