

is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the order.

### The Rule

This amendment to 14 CFR part 71 modifies Class E airspace at West Union, OH, to accommodate aircraft executing instrument flight procedures into and out of Alexander Salamon Airport. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### Modification of Class E Airspace; South Bend, IN

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action modifies Class E airspace at South Bend, IN. Area Navigation (RNAV) Standard Instrument Approach Procedures (SIAPS) to several runways have been developed for South Bend Regional Airport. Controlled airspace extending upward from 700 feet above the surface of the earth is needed to contain aircraft executing these approaches. This action increases the area of the existing controlled airspace at South Bend Airport.

**EFFECTIVE DATE:** 0901 UTC, December 25, 2003.

**SUPPLEMENTARY INFORMATION:**

#### History

On Monday, April 21, 2003, the FAA proposed to amend 14 CFR part 71 to modify Class E airspace at South Bend, IN (68 FR 19470). The proposal was to modify controlled airspace extending upward from 700 feet above the surface of the earth to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal

operation and white transiting between the en route and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005, of FAA Order 7400.9K dated August 30, 2002, and effective September 16, 2002, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the order.

**SUPPLEMENTARY INFORMATION:**

**The Rule**

Airspace Docket No. 02-ANM-16, published August 12, 2003 (68 FR 47844), corrected an error in the coordinates of the east boundary description of the Class E airspace at Richfield Municipal Airport, Richfield, UT. This action corrects another geographic coordinate to the Class E Airspace at Richfield Municipal Airport, Richfield, UT. This action also corrects the effective date back to September 4, 2003.

**Correction to Final Rule**

■ Accordingly, pursuant to the authority delegated to me, the geographic coordinates for the Class E airspace area at Richfield Municipal Airport, Richfield, UT, as published in the **Federal Register** on August 12, 2003 (68 FR 47844), (Federal Register Document FAA-01-ANM-16; page 47844, column 3) are corrected as follows:

**Repair Stations**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule; delay of effective date.

**SUMMARY:** The FAA is delaying the effective date of a final rule that amends the regulations for aeronautical repair stations. This action is necessary to give repair station certificate holders more time to develop required manuals using recently issued FAA guidance material before submitting the manuals to FAA for acceptance. Also this action will allow repair station certificate holders to follow FAA guidance material for requesting FAA approval of contract maintenance functions.

**DATES:** The effective date of the final rule amending 14 CFR parts 91, 121, 135, and 145 published on August 6, 2001, at 66 FR 41088 is delayed until January 31, 2004, with the following exception: § 145.163 remains effective April 6, 2005.

**SUPPLEMENTARY INFORMATION:**

**The Final Rule**

On July 30, 2001, the FAA issued Repair Stations; Final Rule with Request for Comments and Direct Final Rule with Request for Comments (66 FR 41088; August 6, 2001). That final rule updates and revises part 145 of Title 14, Code of Federal Regulations, which prescribes the regulations for aeronautical repair stations. In that rulemaking action, we established a new requirement that each repair station must maintain and use a current repair station manual and a quality control manual. We also prescribed the contents of these manuals.

Initially, the final rule was to become effective April 6, 2003. However, on October 21, 2002, the FAA received a petition from the Aircraft Electronics Association, the Aerospace Industries Association, the Aviation Suppliers
