BILLING CODE 4310--\$-P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[DES03-44]

Ten-Year Water Exchange Agreements With Mendota Pool Group, California

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of a draft environmental impact statement (EIS) and request for comment.

SUMMARY: The Department of the Interior, Bureau of Reclamation (Reclamation), has prepared a draft EIS, pursuant to the National Environmental Policy Act (NEPA), to evaluate the proposed exchange of up to 25,000 acre-feet of water per year over a 10-year period with the Mendota Pool Group.

The purpose of the proposed project is to provide water to irrigable lands on Mendota Pool Group properties in Westlands Water District and San Luis Water District to offset substantial reductions in contract water supplies attributable to the Central Valley Project Improvement Act (CVPIA), the Endangered Species Act listings and regulations, and new Bay-Delta water quality rules. This water would thereby enable the Mendota Pool Group farmers to maintain production on historically irrigated lands. The project is not intended to increase the amount of water for farming activities but would replace some of the contract water lost because of increased environmental regulations that restrict water deliveries south of the export pumps at Tracy, California.

Reclamation has obtained public input on the scope of the project and potential alternatives through comment letters and a public scoping meeting. The EIS addresses the comments received.

There are no known Indian Trust Assets or environmental justice issues associated with the proposed action.

DATES: The draft EIS is available for a 60-day public comment period ending

on September 29, 2003. Submit written comments on the draft EIS on or before this date at the address provided below.

ADDRESSES: The draft EIS may be obtained by contacting Mr. David Young at the address provided below. The draft EIS is also available on the Internet at <http://www.usbr.gov> or <http://www.entrix.com>.

Written comments on the draft EIS should be sent to Mr. David Young, Bureau of Reclamation, South-Central California Area Office, 1243 N Street, Fresno CA 93721-1813; by telephone at 559-487-5127; (TDD 559-487-5933); by e-mail at dkyoung@mp.usbr.gov; or faxed to 559-487-5397.

FOR FURTHER INFORMATION CONTACT: Mr. Young, Environmental Specialist, at the above address or by telephone at 559-487-5127 or TDD 559-487-5933.

SUPPLEMENTARY INFORMATION: The Delta export service area of the Central Valley Project (CVP) has total contractual obligations and delivery losses of approximately 3.45 million acre-feet per year. The theoretical maximum pumping capability of CVP facilities serving this area is approximately 3.09 million acre-feet per year. Available supplies are apportioned under a hierarchy of allocation in which agricultural water service contracts, totaling about 1.85 million acre-feet per year, are provided water only after all other obligations are met.

Implementation of the CVPIA (1992), Endangered Species Act (1993-1995) and revised Bay-Delta water quality standards have further reduced pumping capabilities and water supplies available to agricultural contractors. Currently these parties can expect to receive a long-term average supply of about 50 to 55 percent of contract water as compared to a pre-1992 average of 88 to 92 percent.

Alternatives identified and evaluated provide for continued agricultural production, and include the proposed project, construction of new wells, and fallowing of farmland. The project proponents propose to pump up to 269,600 acre-feet of groundwater over the 10-year period from non-CVP wells located adjacent to the Mendota Pool into the Mendota Pool to make up for a portion of the annual shortfall in the contract water to be delivered via the CVP. The actual quantity of water to be pumped would depend on whether the year is classified as wet (0 acre-feet per year), normal (maximum of 31,600 acre-feet per year), or dry (maximum of 40,000 acre-feet per year). Of the total quantity pumped each year, a maximum of 25,000 acre-feet would be exchanged with Reclamation. This water would be

made available to Reclamation in the Mendota Pool to offset their existing water contract obligations. In exchange, Reclamation would make an equivalent amount of CVP water available to the members of the Mendota Pool Group for irrigation purposes at Check 13 of the Delta-Mendota Canal. Any quantity of water pumped beyond the 25,000 acre-feet exchanged would be delivered directly to other lands that are presently under irrigation around the Pool. As part of this program, a maximum of 12,000 acre-feet per year of groundwater would be pumped from deep wells (*i.e.*, screened interval greater than 130 feet deep), with the remainder coming from shallow wells (*i.e.*, screened interval less than 130 feet deep). The proposed project will comply with the terms specified in the Settlement Agreement for Mendota Pool Transfer Pumping Program, effective January 1, 2001.

The primary environmental resource issues that are evaluated in the EIS include groundwater levels, groundwater quality, subsidence, surface water quality, and biological resources. Other resource areas evaluated include cost of water, CVP operations, archaeological and cultural resources, Indian Trust assets, environmental justice, socioeconomic resources, land use, transportation, air quality, and noise.

The environmental review was conducted pursuant to NEPA, the Endangered Species Act, and other applicable laws, and analyzes the potential environmental impacts of implementing each of the feasible alternatives. The EIS is based upon previously prepared environmental reports and ongoing monitoring activities. Public input on alternatives and the criteria for evaluation of the alternatives was obtained through the initial scoping meeting and initial comment letters.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment letter. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of

organizations or businesses, available for public disclosure in their entirety.

Dated: April 23, 2003.

Frank Michny,

Regional Environmental Officer, Mid-Pacific Region.

BILLING CODE 4310-MN-P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Glen Canyon Dam Adaptive Management Work Group (AMWG); Notice of Meeting

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of conference call and public meetings.

SUMMARY: The Adaptive Management Program (AMP) was implemented as a result of the Record of Decision on the Operation of Glen Canyon Dam Final Environmental Impact Statement to comply with consultation requirements of the Grand Canyon Protection Act (Pub. L. 102-575) of 1992. The AMP provides an organization and process to ensure the use of scientific information in decision making concerning Glen Canyon Dam operations and protection of the affected resources consistent with the Grand Canyon Protection Act. The AMP has been organized and includes a federal advisory committee (AMWG), a technical work group (TWG), a monitoring and research center, and independent review panels. The TWG is a subcommittee of the AMWG and provides technical advice and information for the AMWG to act upon.

DATES: The AMWG will conduct the following conference call: Friday, August 8, 2003. The conference call will begin at 9 a.m. and conclude at 11 a.m. Mountain Time.

Agenda: The purpose of the conference call will be to seek approval from the AMWG to modify the ongoing mechanical removal of non-native fish in Grand Canyon during the remainder of Federal fiscal year 2003. The proposed modification, which would involve moving the mechanical removal effort further downstream of the Little Colorado River, was stimulated by a greater than expected success in these efforts. The involved Federal action agencies would like to initiate the change in the proposed action beginning in August and therefore need to do so prior to the AMWG meeting scheduled for August 13-14, 2003.

To Register for the conference call, please contact Linda Whetton at (801)

524-3880 at least two (2) days prior to the call. You will be given the phone number and password at that time.

Date and Location: The AMWG will conduct the following public meeting: Phoenix, Arizona—August 13 to August 14, 2003. The meeting will begin at 9:30 a.m. and conclude at 5 p.m. on the first day and will begin at 8 a.m. and conclude at noon on the second day. The meeting will be held at the Bureau of Indian Affairs—Western Regional Office, 2 Arizona Center, 400 N. 5th Street, Conference Rooms A and B (12th Floor), Phoenix, Arizona.

Agenda: The purpose of the meeting will be to discuss the FY 2004 budget, temperature control device risk assessment, proposed modification of non-native fish mechanical removal, feasibility report on humpback chub augmentation, experimental flows, basin hydrology, environmental compliance, and other administrative and resource issues pertaining to the AMP. In addition, the Humpback Chub Ad Hoc Group will present their Final Report. The Ad Hoc Committee on What's In/Out of the AMP (AHCIO) and will provide an update and the Strategic Plan Ad Hoc Committee will provide comments to the AMWG relative to their review of the Draft Tribal Consultation Plan.

Date and Location: The TWG will conduct the following public meeting: Phoenix, Arizona "October 1 to October 2, 2003. The meeting will begin at 9:30 a.m. and conclude at 5 p.m. on the first day and will begin at 8 a.m. and conclude at noon on the second day. The meeting will be held at the Bureau of Indian Affairs—Western Regional Office, 2 Arizona Center, 400 N. 5th Street, Conference Rooms A and B (12th Floor), Phoenix, Arizona.

Agenda: The purpose of the meeting will be to discuss the BioWest data for downstream of Diamond Creek, multi-attribute tradeoff process, status report on mechanical removal work, vegetation mapping by GCMRC, non-native fish control, tribal consultation plan, and re-initiation of the SCORE (The State of Natural and Cultural Resources in the Colorado River Ecosystem) Report, ad hoc group updates, basin hydrology, environmental compliance, and other administrative and resource issues pertaining to the AMP.

To allow full consideration of information by the AMWG or TWG members, written notice must be provided to Dennis Kubly, Bureau of Reclamation, Upper Colorado Regional Office, 125 South State Street, Room 6107, Salt Lake City, Utah, 84138; telephone (801) 524-3715; faxogram (801) 524-3858; e-mail at

dkubly@uc.usbr.gov (5) days prior to the meeting. Any written comments received will be provided to the AMWG and TWG members prior to the meeting.

FOR FURTHER INFORMATION CONTACT: Dennis Kubly, telephone (801) 524-3715; faxogram (801) 524-3858; or via e-mail at *dkubly@uc.usbr.gov*.

Dated: July 14, 2003.

Dennis Kubly,

Chief, Adaptive Management Group, Environmental Resources Division, Upper Colorado Regional Office.

BILLING CODE 4310-MN-P

INTERNATIONAL TRADE COMMISSION

[USITC SE-03-025]

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: August 5, 2003 at 10 a.m.

PLACE: Room 101, 500 E Street, SW., Washington, DC 20436, Telephone: (202) 205-2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agenda for future meetings: none.
2. Minutes.
3. Ratification List.
4. Inv. No. TA-421-3 (Market Disruption) (Certain Brake Drums and Rotors from China)—briefing and vote. (The Commission is currently scheduled to transmit its determination to the President and United States Trade Representative on August 5, 2003; Commissioners' opinions and recommendations on remedy, if necessary, are currently scheduled to be transmitted to the President and United States Trade Representative on or before August 25, 2003.)
5. Inv. No. 731-TA-1046 (Preliminary) (Tetrahydrofurfuryl Alcohol from China)—briefing and vote. (The Commission is currently scheduled to transmit its determination to the Secretary of Commerce on or before August 7, 2003; Commissioners' opinions are currently scheduled to be transmitted to the Secretary of Commerce on or before August 14, 2003.)
6. Outstanding action jackets: none. In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

Issued: July 24, 2003.
