POSTAL SERVICE

In-Person Proofing at Post Offices (IPP) Program

AGENCY: U.S. Postal Service.

ACTION: Notice.

SUMMARY: The USPS is announcing the availability of an In-Person Proofing at Post Offices (IPP) Program to support the activities of U.S. Certificate Authorities and government organizations.

EFFECTIVE DATE: June 9, 2003.

FOR FURTHER INFORMATION CONTACT:

Chuck Chamberlain at 703-292-4172, or Brad Reck at 703-292-3530

SUPPLEMENTARY INFORMATION: In recent years, a number of new federal statutes have sought to preserve the ability of the public and private sectors to use the efficiency of the internet to rapidly exchange time sensitive communications while assuring that people receiving and sending messages are in fact who they say they are. A number of top quality private sector businesses have mastered the technology around the use of secure digital signatures, yielding a greater demand for improved identity verification for individuals seeking to use digital signatures.

This need for improved "online identity" creates a unique service opportunity for the Postal Service to provide value to the public, leverage our retail network and enable internet communications to enjoy a new level of security and reliability. Numerous organizations have approached the U.S. Postal Service to conduct In-Person Proofing (IPP) of customers nationwide for physically authenticating an individual's identification at a post office before the organization issues a digital signature certificate to the individual.

IPP supports efficient, affordable, trusted communications through the use of identification verification at Post Offices, incorporation of process enhancements required by the Postal Service, active management of the IPP program by the USPS, and use of a First Class U.S. Mail piece to verify physical addresses of applicants. We believe that IPP conducted at local post offices will create a new broad based capability for

the Nation that promotes improved public trust and greater efficiency in the electronic delivery of a wide range of services. These efforts support achieving the goals of the Government Paperwork Elimination Act of 1998, Electronic Signature in Global and National Commerce Act of 2000, Health Insurance Portability and Accountability Act of 1996, Sarbanes-Oxley Act of 2002, and Gramm-Leach-Bliley Act of 1999 and numerous Presidential Directives on eGovernment.

The following is a brief description of how IPP would work. An organization can establish a relationship with a qualified U.S. Certificate Authority to integrate digital signing with improved identity verification into an online application. Any individual desiring to use digital certificates that include USPS IPP will complete an application online. The online system will verify the individual's identity via commercial data base checking. The system will then produce a standard Postal Service form to be printed out at the "applicant's" personal computer. The individual requesting the service will present this form to a participating post office where the "In Person Proofing" process is conducted. After successful completion of the IPP event, the CA will notify the applicant to download their digital certificate. For clarity, the steps in the IPP process are outlined below.

1.0 DESCRIPTION

1.1 Purpose

IPP is a postal program to improve the public key infrastructure of the Nation. The public key infrastructure has emerged as an accepted infrastructure component for protecting and facilitating the electronic communications of the Nation.

2.0 BASIC STANDARDS

2.1 Eligibility

For a Certificate Authority (CA) to use IPP, the CA must incorporate the U.S. Postal Service In-Person Proofing Policy into their Certificate Policy. Conformance to the Postal policy includes:

1. Use of a Patriot Act compliant database vetting process to gain initial assurance of an applicant's identity before sending the applicant to the Postal Office for IPP.
2. Perform a verification of the applicant's physical residential address via First Class U.S. Mail with an "Address Correction Requested" and "Do Not Forward" endorsement.
3. Restrict the expiration date of an IPP based Digital Certificate such that it does not surpass the expiration of the 4

year validity period of an IPP verification event. A new IPP event will be required every 4 years.

4. Facilitate IPP processing by using standard forms and barcodes as directed by the USPS and exchanging of information as necessary for the efficient operation of IPP. This includes:

A. Using the standard ID Verification Form (IDVF),

B. Maintaining a secure repository of IDVF forms,

C. Providing access to IDVF forms and customer account information as necessary for investigative purposes by USPS Inspection Service and the USPS Office of Inspector General,

D. Submitting the processes and operations of the CA to security audits and compliance reviews as required by the USPS, and

E. Restricting the generation of unique barcodes for each IPP event to those expressly permitted by the USPS.

5. Operate the CA to enable the broadest practical use of IPP based digital certificates. This includes:

A. Issuing, at a minimum, a daily Certificate Revocation List to better allow users to rely upon the certificates,

B. Passing an external CA audit in accordance with industry best practices such as "AICPA/CICA WebTrust Program for Certificate Authorities",

C. Achieving interoperability with the Federal Bridge for Certificate Authorities, and

D. Incorporating a new common object identifier (USPS registered OID) for IPP based digital certificates.

6. Successfully enter into an agreement with the USPS that includes standard pricing, service level commitments, IPP Policy compliance, liability and service termination provisions, as well as such other terms and conditions as may be included.

2.2 Minimum Volume

IPP transactions are to be purchased in pre-paid blocks of 10,000 transactions by either the CA or a government customer on behalf of the CA.

2.3 Labeling

Each digital certificate must contain the statement "ID Verified by the U.S. Postal Service" within the certificate profile to let any user or relying party know that:

- The issuer of the digital certificate authority operates in compliance with IPP Policy, and
- The holder of the credential did physically appear before a postal employee and had their hardcopy identification successfully verified.

Applications should interrogate the digital certificate presented during an

electronic process to confirm the presence of a new common object identifier (USPS registered OID) for IPP based digital certificates.

3.0 AVAILABILITY

IPP is available at an initial level of up to 200 post offices promptly following the execution of the first activation agreement. Market demand for IPP, in conjunction with operational assessments, will determine the expansion schedule beyond initial deployment locations.

Stanley F. Mires,

Chief Counsel, Legislative.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48014; File No. SR-CHX-2003-05]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Stock Exchange, Incorporated Relating to the Execution of Limit Orders for OTC Securities

June 11, 2003.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 28, 2003, the Chicago Stock Exchange, Incorporated ("CHX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal pursuant to section 19(b)(3)(A) of the Act,³ and Rule 19b-4(f)(6)⁴ thereunder, which renders the proposal effective upon filing with the Commission.⁵ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend certain provisions of CHX Article XX, Rule 37(a)(3), which governs, among other things, the execution of limit

orders in a CHX specialist's book. Specifically, the CHX seeks to add a provision that would permit a CHX specialist to enable a functionality that would automatically execute designated limit orders for Nasdaq/NM ("OTC") securities, following dissemination of a locking or crossing quotation in that security by one or more designated OTC market centers. The text of the proposed rule change is below. Proposed new language is in italics. Proposed deletions are in brackets.⁶

Chicago Stock Exchange Rules

Article XX—Regular Trading Sessions

* * * * *

Precedence of Bids at Same Price

Rule 16. *Subject to Article XX, Rule 37(b)*, [W]here bids are made at the same price, the priority and precedence shall be determined as follows:

(a) When a bid is clearly established as the first made at a particular price, the maker shall be entitled to priority and shall have precedence over [on] the next sale at that price, up to the number of shares of stock specified in the bid, irrespective of the number of shares of stock specified in such bid.

* * * * *

Guaranteed Execution System and Midwest Automated Execution System

Rule 37. (a) Guaranteed Executions. The Exchange's Guaranteed Execution System (the BEST System) shall be available, during the Primary Trading Session and the Post Primary Trading Session, to Exchange member firms and, where applicable, to members of a participating exchange who send orders to the Floor through a linkage pursuant to Rule 39 of this Article, in all issues in the specialist system which are traded in the Dual Trading System and NASDAQ/NM Securities. System orders shall be executed pursuant to the following requirements:

1. No change to text.
2. No change to text.
3. [Dual Trading System] *Execution of Agency Limit Orders.*

Subject to Interpretation and Policy .10 ("Exempted Trade-Throughs"), all agency limit orders in Dual Trading System issues will be filled under the following circumstances:

⁶ The CHX inadvertently neglected to underscore a word in the proposed rule text when it filed this proposed rule change. With the CHX's permission, the Commission corrected the omission, so that the proposed rule text as printed in this notice accurately reflects the CHX's intentions. May 22, 2003 telephone conversation between Kathleen M. Boege, Associate General Counsel, CHX, and Joseph P. Morra, Special Counsel, Division of Market Regulation, Commission.

(a) Exhaustion of primary market bid or offer. When the bid or offering at the limit price has been exhausted in the primary market (as defined in the CTA plan), agency limit orders will be executed in whole or in part, based on the rules of priority and precedence, on a share for share basis with trades executed at the limit price in the primary market;

(b) Price penetration in primary market. When there has been a price penetration of the limit in the primary market, agency limit orders that have resided in the specialist's book for a period of 0-15 seconds (as designated by the specialist) prior to the primary market print will be filled at the limit price; [and]

(c) Primary market trading at the limit price. When the issue is trading at the limit price on the primary market, agency limit orders will be filled at the limit price unless it can be demonstrated that such orders would not have been executed if they had been transmitted to the primary market or the broker and specialist agree to a specific volume related or other criteria for requiring a fill; and

(d) Block size trade-through in another market. In instances where a block trade on the Exchange or other market against which orders are being protected takes place outside the current Exchange quotation, all effective bids or offers limited to the block price or better will be executed at the more favorable block price rather than at the limit price of the affected orders. A specialist may elect to provide automatic execution of designated limit orders at the block price or better when a "block size" (as defined in Article XX, Rule 40, Interpretation and Policy .05) trade-through is executed on the primary market.

A specialist may elect automatic execution of such agency limit orders on an issue-by-issue basis.

In the case of Nasdaq/NM securities, a CHX specialist may elect, on an issue-by-issue basis, to engage a functionality that will automatically execute designated resting agency limit orders (or portions of such orders) at the limit price, up to the size of the Limit Order Auto Execution Threshold, when the Designated Market quotation locks or crosses the limit price. For purposes of this provision, (i) "Limit Order Auto Execution Threshold" means an aggregate number of shares designated by the CHX specialist, on an issue-by-issue basis, that may be executed automatically at the limit price; and (ii) "Designated Market" means the market
