Wards Cove Packing Company, Seattle, WA; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, as amended, an investigation was initiated on January 27, 2003, in response to a worker petition filed by a company official on behalf of workers at Wards Cove Packing Company, Seattle, Washington.

The petitioning group of workers is covered by an earlier petition filed on January 13, 2003 (TA-W-50,542), that is the subject of an ongoing investigation for which a determination has not yet been issued. Further investigation in this case would duplicate efforts and serve no purpose; therefore the investigation under this petition has been terminated.

SUPPLEMENTARY INFORMATION

I. *Background:* Section 11(d) of the Fair Labor Standards Act (FLSA) authorizes the Secretary of Labor to regulate, restrict, or prohibit industrial homework as necessary to prevent evasion of the minimum requirements of the Act. Restrictions exist on seven homework industries, (knitted outerwear, women's apparel, jewelry manufacturing, gloves and mittens, button and buckle manufacturing, handkerchief manufacturing, and embroideries). Homework in these industries is permitted only in certain hardship cases. Homework is permitted under FLSA in all other industries, provided the employer maintains homeworker handbooks for such employees who record hours of work and certain other required payroll information. Further, employers of homeworkers in certain restricted industries must first obtain a certification from the Department of Labor authorizing the employment of such workers. Employers in the restricted industries under the certification program who pay workers based on piece rates must maintain

documentation of the work measurements used to establish such piece rates and the circumstances under which measurements were conducted. This information collection is currently approved for use through September 30, 2003.

II. *Review Focus:* The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- * Enhance the quality, utility and clarity of the information to be collected; and

- * Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. *Current Actions:* The Department of Labor seeks approval for the extension of this information collection in order to assure compliance with the FLSA in homework employment.
