The form is being revised to incorporate additional data fields in accordance with the recommendation in International Maritime Organization (IMO) Assembly Resolution A.887 (21) submitted by the National GMDSS Implementation Task Force (charted by the United States Coast Guard); to change certain certification statements into questions giving applicants an option to clarify if a license is required; and to clarify existing instructions for the general public. The data collected on this form includes the date of birth for Commercial Operator licensees, however, this information will be redacted from public view.

There is no change to the estimated average burden or the number of

respondents of the additional data elements proposed by the IMO. The Task Force argues that search and rescue operations could be significantly improved if the Commission's database contained this additional information.
