

eastern half of Federal Lease OCS-P 0451 by drilling a maximum of eight extended-reach wells from two existing OCS platforms in the Point Arguello Unit, Platforms Hermosa and Hidalgo. The project area is located offshore about 13 km (8 mi) northwest of Point Conception, Santa Barbara County, California. Lease OCS-P 0451 is considered a developed lease by virtue of the existing production on the western half, in the Point Arguello Unit. Previously, the eastern half of Lease OCS-P 0451 was part of the Rocky Point Unit, but has since been contracted out of the Unit. Therefore, it is no longer unitized with the undeveloped leases of the Rocky Point Unit, and production from this portion of the lease will have no effect on holding the Rocky Point Unit leases, nor will it cause production of the undeveloped Rocky Point Unit leases.

The MMS distributed a copy of Arguello Inc.'s proposal for review and comment to five State agencies, eight Federal agencies, two local agencies, and two non-governmental organizations. The EA examines the potential environmental effects of Arguello Inc.'s proposed action and presents MMS findings regarding the significance of those effects. The MMS prepares EA's to determine whether proposed projects constitute a major Federal action that significantly affects the quality of the human environment in the sense of NEPA 102(2)(C). A FONSI is prepared in those instances where the MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA. The MMS completed an EA and issued a FONSI for Arguello Inc.'s proposed action on June 19, 2003. This notice constitutes the public Notice of Availability of environmental documents required under the NEPA regulations.

#### **Background**

As requested by the USTR pursuant to section 131 of the Trade Act of 1974 (19 U.S.C. 2151), in its report the Commission will provide advice as to the probable economic effect of providing duty-free treatment for imports of products of the Dominican Republic (i) on industries in the United States producing like or directly competitive products, and (ii) on consumers. The import analysis will consider each article in chapters 1 through 97 of the Harmonized Tariff Schedule of the United States for which U.S. tariffs will remain after the United States fully implements its Uruguay Round tariff commitments. The import advice will be based on the 2003

Harmonized Tariff System nomenclature and 2002 trade data. The advice with respect to the removal of U.S. duties on imports from the Dominican Republic will assume that any known U.S. non-tariff barrier will not be applicable to such imports. The Commission will note in its report any instance in which the continued application of a U.S. non-tariff barrier to such imports would result in different advice with respect to the effect of the removal of the duty.

As also requested, pursuant to section 2104(b)(2) of the Trade Act of 2002 (19 U.S.C. 3804(b)(2)), the Commission will provide advice as to the probable economic effect of eliminating tariffs on imports of certain agricultural products of the Dominican Republic on (i) industries in the United States producing the product concerned, and (ii) the U.S. economy as a whole.

USTR indicated that the Commission's report will be classified and considered to be an inter-agency memorandum containing pre-decisional advice and subject to the deliberative process privilege. The Commission expects to provide its report to USTR by December 8, 2003.

A public hearing in connection with this investigation will be held at the United States International Trade Commission Building, 500 E Street, SW., Washington, DC, beginning at 9:30 a.m. on October 7, 2003.
