

E. Effective Date of Revocation

As reflected in section III.B, the Department anticipates that, on the date the application for the changed circumstance review is filed ("application date"), the reforms of the provincial timber sales system will be in place and operating so as to ensure that the province receives adequate remuneration. Accordingly, if the Department determines, as a result of the review, that revocation of the order with respect to the province is warranted, the Department will normally order revocation of the countervailing duty order with respect to all unliquidated entries of the subject merchandise produced in the province from timber harvested in the province that is entered, or withdrawn from warehouse, on or after the application date. If, however, reforms necessary to demonstrate a market-based timber sales program are not in effect or operational at the time of a province's application date, the Department may alter the effective date of the revocation to reflect the date on which such reforms took effect during the period of the changed circumstance review.

[Docket No.: 94-042US]

Title: Optical Trap For Detection and Quantitation Of Subzeptomolar Quantities of Analytes.

Abstract: Tightly focused beams of laser light are used as "optical tweezers" to trap and manipulate polarizable objects such as microspheres of glass or latex with diameters on the order of 4.5 micrometers. When analytes are allowed to adhere to the microspheres, small quantities of these analytes can be manipulated, thus allowing their detection and quantitation even when amounts and concentrations of the analytes are extremely small. Illustrative examples include measuring the strength needed to break antibody-antigen bonds and the detection of DNA sequences.

notifications prior to trips or other specified actions. Coupons are required in the wreckfish fishery to track Individual Transferable Quotas.

NOAA needs information from the applications for the identification of fishing vessels and dealers and the management of the fisheries. Use of permits also aids in enforcement of fishery regulations.

SUPPLEMENTARY INFORMATION:

I. Abstract

Participants in most Federally-managed fisheries in the Southeast Region are currently required to keep and submit catch and effort logbooks from their fishing trips. A subset of these vessels also provide information on the species and quantities of fish, shellfish, marine turtles, and marine mammals that are caught and discarded or have interacted with the vessel's fishing gear. Participants in the Atlantic

snapper-grouper and mackerel fisheries are required to submit information about dockside prices, trip operating costs, and annual fixed costs.

The data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations. Interaction reports are needed for fishery management planning and to help protect endangered species and marine mammals. Price and cost data will be used in analyses of the economic effects of proposed regulations.

II. Method of Collection

The information is submitted on paper forms. Logbooks are completed daily and submitted on either a by trip or monthly basis, depending on the fishery. Fixed costs are submitted on an annual basis. Other information is submitted on a trip basis.
