[Project No. 637-022-WA]

#### Public Utility District No.1 of Chelan County; Notice of Availability of Final Environmental Assessment

October 10, 2003.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 F.R. 47897), Office of Energy

Projects staff have reviewed the application for a new license for the Lake Chelan Hydroelectric Project, an existing, operating facility located on the Chelan River near the City of Chelan, Washington. The 48-megawatt project occupies land managed by the U.S. Forest Service and the National Park Service. In the Final Environmental Assessment (FEA), the staff has analyzed the potential environmental impacts of the existing project and has concluded that approval of the project, with appropriate environmental protection measures, would not constitute a major federal action significantly affecting the quality of the human environment.

We are aware that Chelan PUD and a number of parties continue to pursue a settlement in this case. If a settlement is filed, it will be noticed for public comment. Whether the FEA is supplemented will be based on the content of any filed settlement and subsequent comments we may receive.

The FEA can be viewed at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. #### Duke Energy Corporation; Notice of Availability of Environmental Assessment

October 15, 2003.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Energy Projects' staff has prepared an Environmental Assessment (EA) for an application requesting Commission approval for a revised Shoreline Management Plan (SMP). The proposed SMP is intended to supercede the

approved SMP including the classification maps. The EA addresses proposed revisions to SMP for the Catawba-Wateree Project. The SMP and maps address the allowable uses of 1,727 miles of shoreline for the 11 project reservoirs located in North Carolina and South Carolina.

The EA contains the staff's analysis of the potential environmental impacts of the proposal and concludes that approval of the proposal would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is attached to a Commission order titled "Order Granting and Modifying Revised Shoreline Management Plan" (which is available for review at the Commission in the Public Reference Room, or it may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number (prefaced by P-) and excluding the last three digits, in the docket number field to access the document. For assistance, call (866) 208-3676, or (202) 502-8659 (for TTY).
