To comply with the public consultation process, we published a **Federal Register** notice (67 FR 62985) on October 9, 2002, announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day comment period. We received no comments in response to the notice.

If you wish to comment in response to this notice, you may send your comments to the offices listed under the **ADDRESSES** section of this notice. OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days. Therefore, to ensure maximum consideration, OMB should receive public comments by March 20, 2003.

Public Comment Policy: We will post all comments in response to this notice on our web site at www.mrm.mms.gov/ Laws R D/FRNotices/FRInfColl.htm. We will also make copies of the comments available for public review, including names and addresses of respondents, during regular business hours at our offices in Lakewood, Colorado. Individual respondents may request we withhold their home address from the public record, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold from the rulemaking record a respondent's identity, as allowable by law. If you request that we withhold your name and/or address, state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

MMS Information Collection Clearance Officer: Jo Ann Lauterbach, (202) 208–7744.

Dated: February 6, 2003.

Lucy Querques Denett,

Associate Director for Minerals Revenue Management.

BILLING CODE 4310-MR-P

DEPARTMENT OF JUSTICE

Office of Justice Programs [OJP (OJP)–1371]

Meeting of the Global Justice Information Sharing Initiative Federal Advisory Committee

AGENCY: Office of Justice Programs (OJP), Bureau of Justice Assistance (BJA), Justice

ACTION: Notice of meeting.

SUMMARY: This is an announcement of a meeting of the Global Justice Information Sharing Initiative (Global) Federal Advisory Committee (GAC) to discuss the Global Initiative, as described at http://www.it.ojp.gov/global.

DATES: The meeting will take place on Tuesday, April 1, 2003, from 1 p.m. to 5 p.m. ET, and Wednesday, April 2, 2003, from 9 a.m. to 12 Noon ET.

ADDRESSES: The meeting will take place at the Sheraton Crystal City Hotel, 1800 Jefferson Davis Highway, Arlington, VA 22202; Phone: (703) 486–1111.

FOR FURTHER INFORMATION CONTACT: J. Patrick McCreary, Global Designated Federal Employee (DFE), Bureau of Justice Assistance, Office of Justice Programs, 810 7th Street, Washington, DC 20531; Phone: (202) 616–0532. [note: this is not a toll-free number]; E-mail: mccrearj@ojp.usdoj.gov.

SUPPLEMENTARY INFORMATION: This meeting is open to the public. Due to security measures, however, members of the public who wish to attend this meeting must register with Mr. J. Patrick McCreary at the above address at least (7) days in advance of the meeting. Registrations will be accepted on a space available basis. Access to the meeting will not be allowed without registration. All attendees will be required to sign in at the meeting registration desk. Please bring photo identification and allow extra time prior to the meeting.

Anyone requiring special accommodations should notify Mr. McCreary at least seven (7) days in advance of the meeting.

Purpose

The GAC will act as the focal point for justice information systems integration activities in order to facilitate the coordination of technical, funding, and legislative strategies in support of the Administration's justice priorities.

The GAC will guide and monitor the development of the Global information sharing concept. It will advise the Assistant Attorney General, OJP; the

Attorney General; the President (through the Attorney General); and local, state, tribal, and federal policymakers in the executive, legislative, and judicial branches. The GAC will also advocate for strategies for accomplishing a Global information sharing capability.

Interested persons whose registrations have been accepted may be permitted to participate in the discussions at the discretion of the meeting chairman and with the approval of the Designated Federal Employee (DFE).

J. Patrick McCreary,

Global DFE, Bureau of Justice Assistance, Office of Justice Programs.

BILLING CODE 4410-18-P

NATIONAL SCIENCE FOUNDATION

Notice of Intent To Seek Approval To Reinstate an Information Collection

AGENCY: National Science Foundation **ACTION:** Submission for OMB Review: Comment Request Under the Paperwork Reduction Act of 1995, Pub. L. 104-13 (44 U.S.C. 3501 et seq.), and as part of its continuing effort to reduce paperwork and respondent burden, the National Science Foundation (NSF) is inviting the general public and other Federal agencies to comment on this proposed continuing information collection. This is the second notice for public comment; the first was published in the Federal Register at 67 FR 69574 and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Comments regarding these information collections are best assured of having their full effect if received by OMB within 30 days of publication in the **Federal Register**.

ADDRESSES: Written comments regarding (a) Whether the collection of information is necessary for the proper performance of the functions of NSF, including whether the information will have practical utility; (b) the accuracy of NSF's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; or (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological

collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725 17th Street, NW Room 10235, Washington DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230 or send e-mail to splimpto@nsf.gov. Copies of the submission may be obtained by calling (703) 292–7556.

FOR FURTHER INFORMATION CONTACT:

Suzanne H. Plimpton, NSF Reports Clearance Officer at (703) 292–7556 or send e-mail to *splimpto@nsf.gov*.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: Evaluation of NSF Support for Undergraduate Research Opportunities (URO).

OMB Number: 3145–0121.

Type of Request: Intent to seek approval to reinstate an information collection for one year.

Abstract: "Evaluation of NSF Support for Undergraduate Research Opportunities (URO)".

Proposed Project: The National Science Foundation (NSF) manages a number of programs that provide meaningful research experiences for undergraduate students. This suite of programs include: Research Experiences for Undergraduates (REU), both the Site and Supplement components; Research in Undergraduate Institutions (RUI); the undergraduate research components in several of NSF's large research centers programs, e.g., Engineering Research Centers (ERC) Programs, Science and Technology Centers (STCs); and several institution-wide human resources development programs in which undergraduate research experiences are often one component.

These Programs provide a wide range of U.S. undergraduate students with opportunities to conduct hands-on research under the mentorship of graduate students, postdoctoral fellows, and faculty in various types of higher education institutions, including small liberal arts colleges, minority-serving institutions, single-sex institutions, comprehensive universities, research universities, as well as non-profit institutions in which science or engineering research is conducted.

The purpose of the proposed evaluation is to examine the impact of undergraduate research experiences supported by NSF on the undergraduate student and faculty and other mentors who participate. Study questions include: Why do undergraduates choose to participate in research activities? What are the perceived advantages and disadvantages to faculty for mentoring undergraduates in research activities? What are the criteria for selecting students for research activities? What kinds of activities comprise undergraduate "research" experiences? How do undergraduate research experiences affect students' decisions about their academic and work future?

Use of the Information: The information will allow NSF to review its portfolio of programs in which a substantial number of undergraduates participate in research projects of faculty and other mentors to determine whether there needs to be any rebalancing. In addition, it will include an inventory of undergraduate research opportunities around the U.S. and contribute to the literature on best practices in undergraduate research experiences.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 20 minutes per response.

Respondents: Individuals. Estimated Number of Respondents:

Estimated Total Annual Burden on Respondents: 4,328 hours.

Frequency of Responses: One time.

Dated: February 12, 2003.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. (as shown in Attachment 1), License Nos. (as shown in Attachment 1) EA-03-009]

In the Matter of: All Pressurized Water Reactor Licensees; Order Modifying Licenses (Effective Immediately)

]

The Licensees identified in the Attachment to this Order hold licenses issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) authorizing operation of pressurized water reactor (PWR) nuclear power plants in accordance with the Atomic Energy Act of 1954 and 10 CFR part 50.

II

The reactor pressure vessel (RPV) heads of PWRs have penetrations for control rod drive mechanisms and instrumentation systems. Nickel-based alloys (e.g., Alloy 600) are used in the penetration nozzles and related welds. Primary coolant water and the operating conditions of PWR plants can cause cracking of these nickel-based alloys through a process called primary water stress corrosion cracking (PWSCC). The susceptibility of RPV head penetrations to PWSCC appears to be strongly linked to the operating time and temperature of the RPV head. Problems related to PWSCC have therefore increased as plants have operated for longer periods of time. Inspections of the RPV head nozzles at the Oconee Nuclear Station. Units 2 and 3 (Oconee), in early 2001 identified circumferential cracking of the nozzles above the J-groove weld, which joins the nozzle to the RPV head. Circumferential cracking above the Jgroove weld is a safety concern because of the possibility of a nozzle ejection if the circumferential cracking is not detected and repaired.

Section XI of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code), which is incorporated into NRC regulations by 10 CFR 50.55a, "Codes and standards," currently specifies that inspections of the RPV head need only include a visual check for leakage on the insulated surface or surrounding area. These inspections may not detect small amounts of leakage from an RPV head penetration with cracks extending through the nozzle or the J-groove weld. Such leakage can create an environment that leads to circumferential cracks in RPV head penetration nozzles or corrosion of the RPV head. In response to the inspection findings at Oconee and because existing requirements in the ASME Code and NRC regulations do not adequately address inspections of RPV head penetrations for degradation due to PWSCC, the NRC issued Bulletin 2001-01, "Circumferential Cracking of Reactor Pressure Vessel Head Penetration Nozzles," dated August 3, 2001. In response to the Bulletin, PWR Licensees provided their plans for inspecting RPV

whether any nozzles were leaking.
In early March 2002, while
conducting inspections of reactor vessel
head penetrations prompted by Bulletin
2001–01, the Licensee for the DavisBesse Nuclear Power Station (DavisBesse) identified a cavity in the reactor
vessel head near the top of the dome.
The cavity was next to a leaking nozzle

head penetrations and the outside

surface of the heads to determine
