Title: Recordkeeping Requirements for Certified Applicators Using 1080 Collars for Livestock Protection.

Abstract: This information collection activity will enable EPA to obtain the information needed to track the use of registered 1080 collars and the record keeping requirements imposed by an administrative judge in October 1982 and confirmed by the Agency in 1983. This ICR affects the States of Montana, New Mexico, South Dakota, and Wyoming that monitor the program plus one additional registrant. Applicators who are certified to apply Livestock Protection Collars must keep records of: (a) Number of collars purchased; (b) number of collars placed on livestock; (c) number of collars punctured or ruptured; (d) apparent cause of puncture or rupture; (e) number of collars lost or unrecovered; (f) number of collars in use and in storage; and (g) location and species data on each animal poisoned as an apparent result of the toxic collar. This ICR pertains to monitoring activities associated with collar use and to the preparation and submission of an annual monitoring report to EPA that are over and above requirements that are either conditions of registration or obligations associated with the handling and regulation of any restricted use pesticide product.

Applicators maintain records, and the registrants/lead agencies do monitoring studies and submit the reports. These records are monitored by either the State lead agencies or registrants. EPA receives annual monitoring reports from registrants or State lead agencies.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average about 40 hours per certified applicator, 77 hours per State, and 9 hours per registrant. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information,

processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Pesticide applicators using 1080 collars for livestock protection; three state agencies; one pesticide registrant.

Estimated Number of Respondents: 40
Frequency of Response: Annual
Estimated Total Annual Hour Burden: 1,753

Estimated Total Annual Cost: \$30,460.

Changes in the Estimates: The total annual respondent burden is decreased by 1,600 hours. This change reflects a burden adjustment and is explained in the ICR.

Dated: December 4, 2003.

Acting Director, Collection Strategies Division.
