RIN 0648-AQ67

Pacific Halibut Fisheries; Catch Sharing Plan; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; correction.

SUMMARY: This document contains a correction to the final rule published on March 7, 2003, for the Pacific halibut fisheries catch sharing plan.

DATES: Effective April 28, 2003.

FOR FURTHER INFORMATION CONTACT: Jay Ginter, 907-586-7228 or Jamie Goen, 206-526-6140.

SUPPLEMENTARY INFORMATION: The final rule was published in the **Federal Register** on March 7, 2003 (68 FR 10989). The coordinates approximating

the 100-fathom depth contour that were published under Section 27., paragraph (3) contained errors that require correction. The coordinates approximating the 100-fathom line in the Pacific halibut final rule should match the 100-fathom line coordinates in the final rule for the 2003 Pacific Coast groundfish specifications and management measures. However, the coordinates in the Pacific halibut final rule do not match the groundfish final rule because revisions were made to the groundfish final rule during the regulatory process without also revising the Pacific halibut final rule. In addition, a correction to the groundfish final rule citation corrected a transposing error by switching two longitude coordinates that were previously out of order in the 100-fathom line. Therefore, the coordinates are corrected to better reflect the 100-fathom depth contour and to match the coordinates published for the Pacific Coast groundfish fishery (68 FR 11182, March 7, 2003 and corrected at 68 FR 18166, April 15, 2003). The coordinates approximating the 100-fathom depth contour are the western boundary for an area closed to commercial fixed gear (longline and pot/trap gear) fisheries for halibut and groundfish off the Pacific Coast. The closed area off Washington, Oregon and northern California (north of 40°10' N. lat. to the U.S./Canada border) is intended to protect yelloweye rockfish, an overfished species.

This document corrects the errors and republishes the coordinates.

Corrections

Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Monkfish Fishery; Framework Adjustment 2

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS implements measures contained in Framework Adjustment 2 to the Monkfish Fishery Management Plan (FMP). This final rule modifies the monkfish overfishing definition reference points and optimum yield (OY) target control rule to be consistent with the best scientific information available and the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). This rule also implements an expedited process for setting annual target total allowable catch levels (TACs); establishes a method for adjusting monkfish trip limits and days-at-sea (DAS) allocations to achieve the annual target TACs; and establishes target TACs and corresponding trip limits for the 2003 fishing year (FY 2003). As a result, this rule eliminates the default measures adopted in the original FMP that would have resulted in the elimination of the directed monkfish fishery and reduced incidental catch limits. Finally, this final rule clarifies the regulations

pertaining to the monkfish area declaration requirements by specifying that vessels intending to fish under either a monkfish, Northeast (NE) multispecies, or scallop DAS, under the less restrictive measures of the Northern Fishery Management Area (NFMA), declare their intent to fish in the NFMA for a minimum of 30 days.

DATES: Effective May 1, 2003.

ADDRESSES: Copies of Framework Adjustment 2 to the FMP, including the Environmental Assessment (EA), Regulatory Impact Review (RIR), and Initial Regulatory Flexibility Analysis (IRFA) are available upon request from Paul J. Howard, Executive Director, New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950. These documents are also available online at <http://www.nefmc.org>. A copy of the Final Regulatory Flexibility Analysis (FRFA) is available from Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Region, One Blackburn Drive, Gloucester, MA 01930.

SUPPLEMENTARY INFORMATION: The monkfish fishery is jointly managed by the New England Fishery Management Council (NEFMC) and the Mid-Atlantic Fishery Management Council (MAFMC) (Councils), with the NEFMC having the administrative lead. The FMP currently contains default measures that would eliminate the directed monkfish fishery by allocating zero monkfish days-at-sea (DAS). These measures were scheduled to take effect during Year 4 (beginning May 1, 2002) of the FMP's 10-year rebuilding schedule, but were delayed until May 1, 2003, as a result of the implementation of an emergency interim rule (67 FR 35928; May 22, 2002) and its extension (67 FR 67568; November 6, 2002). Recent analyses have indicated that these default measures are no longer appropriate. Furthermore, recent stock assessments have invalidated the fishing mortality (F) reference points contained in the FMP, and have suggested alternative reference points to be incorporated into the FMP's overfishing definition and control rules. As a result of delays in the development of Amendment 2 to the FMP, the NEFMC initiated Framework Adjustment 2 at its June 24–26, 2002, meeting in order to prevent implementation of the restrictive default measures on May 1, 2003.
