

income also will be available to cover budgeted expenses if the 2003–04 expected assessment income falls short.

The following table compares major budget expenditures recommended by the Committee on June 26, 2003, and major budget expenditures in the 2002–03 budget.

Budget expense categories	2002–03	2003–04
Total Personnel Salaries	\$232,575	\$220,540
Total Operating Expenses	136,850	103,750
Reserve for Contingencies	14,945	16,710

Prior to arriving at its budget of \$341,000, the Committee considered information from various sources, such as the Committee’s Executive Subcommittee. An alternative to this action was to continue with the \$2.60 per ton assessment rate. However, an assessment rate of \$2.60 per ton in combination with the estimated crop of 170,500 salable tons would have generated monies in excess of that needed to fund all the budget items for 2003–04. The assessment rate of \$2.00 per ton of salable dried prunes was determined by dividing the total recommended budget by the estimated salable dried prunes. The Committee is authorized to use excess assessment funds from the 2002–03 crop year (currently estimated at \$78,947) for up to 5 months beyond the end of the crop year to fund 2003–04 crop year expenses. At the end of the 5 months, the Committee refunds or credits excess funds to handlers (§ 993.81(c)). Anticipated assessment income and interest income during 2003–04 will be adequate to cover authorized expenses.

The grower price for the 2003–04 season is expected to average about the same as the estimated 2002–03 average grower price of about \$800 per salable ton of dried prunes. Based on an estimated 170,500 salable tons of dried prunes, assessment revenue during the 2003–04 crop year is expected to be less than 1 percent of the total expected grower revenue.

This action continues to decrease the assessment obligation imposed on handlers. Assessments are applied uniformly on all handlers, and some of the costs may be passed on to producers. However, decreasing the assessment rate reduces the burden on handlers, and may reduce the burden on producers. In addition, the Committee’s meeting was widely publicized throughout the California dried prune industry and all interested persons were invited to attend the meeting and

participate in Committee deliberations on all issues. Like all Committee meetings, the June 26, 2003, meeting was a public meeting and all entities, both large and small, were able to express views on this issue.

This action imposes no additional reporting or recordkeeping requirements on either small or large California dried prune handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

An interim final rule concerning this action was published in the **Federal Register** on August 6, 2003 (68 FR 46436). Copies of that rule were also mailed or sent via facsimile to all prune handlers. Finally, the interim final rule was made available through the Internet by the Office of the Federal Register and USDA. A 60-day comment period was provided for interested persons to respond to the interim final rule. The comment period ended on October 6, 2003, and no comments were received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <http://www.ams.usda.gov/fv/moab/html>. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

7 CFR Parts 993 and 999

[Docket No. FV03–993–3 FIR]

Dried Prunes Produced in California; Temporary Suspension of the Mandatory Outgoing Prune Inspection and Quality Requirements, and Modification of the Undersized Prune Disposition Requirements Under the Marketing Order, and Suspension of the Prune Import Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (USDA) is adopting, as a final rule, without change, an interim final rule which suspended for three years the outgoing prune inspection and quality requirements under the California Dried Prune Marketing Order (Order) and its administrative rules and regulations, and the prune import regulation. Continued suspension of the outgoing inspection and quality requirements, and import regulation provisions ensures relief from these requirements. The Order regulates the handling of dried prunes produced in California and is administered locally by the Prune Marketing Committee (Committee). During the three-year suspension, the industry will have the opportunity to develop and implement outgoing inspection and finished product grade standards more consistent with current industry needs. In the absence of additional rulemaking to modify or terminate the suspended provisions, they will come back into effect automatically at the end of the three-year period. The modifications to the undersized prune disposition requirements made by the interim final rule also are continued without change.

EFFECTIVE DATE: November 24, 2003.

FOR FURTHER INFORMATION CONTACT: Richard P. Van Diest, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487–5901, Fax: (559) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW., STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, or Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW., STOP 0237, Washington, DC 20250-0237; telephone (202) 720-2491, Fax: (202) 720-8938, or e-mail: Jay.Guerber@usda.gov.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 993 (7 CFR part 993), both as amended, regulating the handling of dried prunes produced in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

USDA is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule continues in effect the suspension of the outgoing prune inspection and quality requirements in the order and its administrative rules and regulations, and the prune import regulation for a three-year period, and modification of the undersized prune disposition requirements. These changes became effective with the start of the new crop year on August 1, 2003. The order regulates the handling of dried prunes produced in California and is administered locally by the Prune Marketing Committee (Committee). The Committee unanimously recommended

suspension of the outgoing inspection, and outgoing prune quality requirements at meetings held on April 3, and May 1, 2003, because it is the quickest way to ensure relief from these regulations. During the three-year suspension period, the industry will have the opportunity to develop and implement outgoing inspection and finished product grade standards that are more in line with current industry needs. As discussed below, suspension of the prune import regulation is required under section 8e of the Act.

Marketing Order Authority To Modify and Suspend

Section 993.50(g) states in part: "rules and regulations to insure proper disposition of the [undersized] prunes shall be established by the Committee with the approval of the Secretary."

Section 993.90(a) states in part: "The Secretary shall terminate or suspend the operation of any or all of the provisions of this subpart, whenever he finds that such provisions do not tend to effectuate the declared policy of the act."

Outgoing Grade and Size Regulations

The order previously mandated outgoing inspections and outgoing prune quality, size, and labeling requirements of California produced prunes by California prune handlers to verify that such prunes meet quality requirements. These requirements were based on the U.S. Standards for Grades of Dried Prunes and marketing order grade standards. The objective of the inspection, grade, size, and labeling requirements was to ensure that only prunes of acceptable quality and size entered the domestic and foreign markets for human consumption, thereby ensuring consumer satisfaction, increasing sales, and improving returns to producers. While the industry continues to believe that quality is an important factor in maintaining sales, the Committee believes that the costs associated with existing minimum grade, size, and labeling standards may exceed the benefits accrued from such requirements at this time.

Prune Import Regulations

Section 8e of the Agriculture Marketing Agreement Act of 1937 (Act) provides that when certain domestically produced commodities, including prunes, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, and maturity requirements. Section 999.200 contained the prune import regulations that were comparable to the

domestically produced prune outgoing quality and size requirements. Since this rule continues to suspend the outgoing quality and size requirements for domestically produced prunes for three years, these requirements in the import regulation must continue to be suspended during this period as well.

U.S. imports of dried prunes are insignificant compared to U.S. production. In 2002, while the U.S. produced 158,000 tons of dried prunes, only 616 tons were imported. In that year, the domestically produced tonnage was over 250 times as large as the imported tonnage. In 2001, 204 tons were imported, but the U.S. produced 150,000 tons. Production was 735 times as large as imports.

In recent years, about 90 percent of U.S. imports of dried prunes have come from Argentina. Other countries that export to the United States include Chile, France, Mexico, Iran, and Turkey.

Undersized Prune Disposition Regulations

The prune administrative rules and regulations previously required handlers to have a third party inspection of each lot of undersized prunes prior to shipment into nonhuman outlets or other disposition. Under § 993.51 of the Order, inspections are performed by the Dried Fruit Association of California. These requirements also required handlers to submit to the Committee comprehensive documentation verifying that they have satisfied their undersized prune obligation.

The prune administrative rules and regulations previously limited the quantities of larger size prunes that can be used to meet a handler's undersized disposition obligation. While the Committee plans to continue to restrict the shipment of undersized prunes into human consumption outlets, the Committee continues to believe that the costs associated with the inspection and documentation of the disposal of undersized prunes may exceed the benefits. To reduce the cost and time for handlers to file reports and verify the disposition of undersized prunes through inspection, the Committee unanimously recommended removing the inspection requirements, and simplifying the documentation required from handlers to satisfy their undersized obligation as well as removing the limits on the weights of larger prunes that can be used to meet undersized obligations.

Background and Action Taken

California prune handlers are currently selling prunes in many forms to customers throughout the world. The

majority of these sales involve sizing or processing the prunes to more stringent specifications than required under the order. Retail and wholesale buyers often visit handlers' plants in California to verify specification and quality procedures, which tend to be more stringent than the minimum outgoing quality requirements mandated in the marketing order. Handlers continue to improve the quality and outgoing inspection procedures to target the specific customer and market demands. Almost all prunes sold for consumption in the United States as prunes are pitted and packaged in consumer bags and canisters targeting much higher standards than those mandated by the marketing order.

Previously used procedures required detailed administrative notating and reporting of defect information, large numbers of line inspectors at handler plants, and tracking and segregating lots and bins of fruit to comply with the order. As a result, handlers expended significant amounts of time and money on the inspection process. Also, almost all fruit is inspected by international buyers upon receipt, and is accepted or rejected based on the fruits' condition at the time of that review, regardless of any prior inspection process or certification. Further, prunes produced in other countries must meet customer specifications and inspection criteria.

Because of increased foreign competition that sells quality-processed fruit, shifting consumer demand from natural condition to processed prunes, and increasingly competitive specifications, the minimum marketing order standards no longer reflect current industry needs. The Committee continues to believe that California prune handlers must reduce all unnecessary costs in order to remain competitive with imported fruit and to profitably sell fruit in international markets.

The mandatory outgoing inspections focused on cosmetic defects or defects that tend to be removed through steaming, pitting, or juicing the fruit. While the industry once sold primarily unprocessed prunes, consumer demand has changed and some processing is invariably required, leaving the outgoing inspection criteria inapplicable and out-dated.

With regard to import requirements, section 8e of the Act requires import regulations to be comparable to the domestic regulations, not more restrictive. Since this rule continues to suspend outgoing grade and size regulations for domestically produced prunes, and substantially relaxes the disposition and verification

requirements on undersized prunes under the order, the import regulation must continue to be suspended as well.

During the three-year suspension period, the industry will have the opportunity to develop and implement more appropriate finished product grade standards through amendments to the order and administrative rules and regulations. In the interim, the suspension of these provisions continues to ensure that these provisions are not implemented. In the absence of any additional action, the provisions will automatically come back into effect at the end of the suspension period.

At its May 1, 2003, meeting, the Committee unanimously recommended suspension of all outgoing inspection, outgoing quality, size, and labeling requirements in the marketing order and the administrative rules and regulations for three years, beginning with the start of the new crop year on August 1, 2003. The suspension of these provisions continues to reduce some administrative costs.

This rule continues to suspend in their entirety §§ 993.50(a) through (f) and 993.97 Exhibit A—Part II of the order, and §§ 993.150(a) and (b), 993.150(d) through (g)(1), 993.515, 993.516, 993.517, 993.518 of the administrative rules and regulations, as well as the import regulation specified in § 999.200. Portions of §§ 993.50(g) and 993.51 of the order, and portions of §§ 993.601 of the administrative rules and regulations continue to be suspended. These sections of the order and administrative rules and regulations pertain to the various requirements of the outgoing inspection, outgoing quality, size, and labeling requirements, and import regulation provisions.

Prune handlers opposed the previously stated undersized prune regulations because they were costly to use. Undersized prunes have marginal value as cattle feed or use in tobacco products (about \$40–\$45 per ton), and the costs of completing the required Committee paperwork and having them inspected by the DFA of California may exceed the revenue received. The industry is now also less concerned about the minimal amount of poor quality undersized prunes. Supplies of undersized prunes are now lower because of the recent tree pull programs and growers field sizing programs to drop small prune plums in the orchard, rather than deliver them to handlers.

The Committee chose to recommend removal of the limits on the quantities of larger-sized prunes that can be used to meet a handler's undersized weight disposition obligation, and the

requirement for inspection of the undersized prunes and certification of handlers' receipt of usage, because these changes eliminate certain inspection costs and reduce Committee and handler administration costs.

At the April 3, 2003, meeting, the Committee unanimously recommended modification of the undersized prune disposition provisions in the marketing order and the administrative rules and regulations, which began with the start of the new crop year on August 1, 2003. The modification of these provisions continues to reduce some committee and handler administrative costs.

This rule continues to remove § 993.150(g)(2)(i), § 993.150(g)(2)(iii), and § 993.150(g)(2)(iv) in the administrative rules and regulations. Portions of § 993.150(g)(3) continue to be amended.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

Industry Profile

There are approximately 1,205 producers of dried prunes in the production area and approximately 21 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than \$750,000 and small agricultural service firms are defined as those having annual receipts of less than \$5,000,000.

Eight of the 21 handlers (38 percent) shipped over \$5,000,000 worth of dried prunes and could be considered large handlers by the Small Business Administration. Thirteen of the 21 handlers (62 percent) shipped less than \$5,000,000 worth of dried prunes and could be considered small handlers. An estimated 32 producers, or less than 3 percent of the 1,205 total producers, would be considered large growers with annual incomes over \$750,000. The

majority of handlers and producers of California dried prunes may be classified as small entities.

In addition, there are an estimated 30 importers and one third-party entity that performed inspections under the order. USDA does not have precise information on these entities, but believes that the majority of the importers and the inspection agency are small entities.

Summary of Rule Change

This rule continues to suspend the outgoing prune inspection and outgoing prune quality requirements under the order and the administrative rules and regulations, and the prune import provisions for a three-year period, and continues to modify the undersized prune disposition requirements. These changes continue to be effective since the start of the new crop year on August 1, 2003, for three years. In the absence of additional rulemaking, the suspended requirements will come back into effect at the end of the three-year period.

The industry chose suspension of the outgoing inspection, outgoing prune quality and size and labeling requirements, because suspension is the quickest way to ensure relief from these regulations. During the three-year suspension period, the industry continues will have the opportunity to develop and implement more effective finished product grade standards through amendments to the order and administrative rules and regulations. It also has an opportunity to decide whether these requirements should be terminated.

Authority to suspend these provisions of the marketing order and administrative rules and regulations is provided in § 993.90(a) of the order. Authority to modify the disposition requirements and procedures for undersized prunes in the administrative rules and regulations is provided in §§ 993.50(g) and 993.52 of the order. Authority for the import regulation is in section 8e of the Act.

Impact of Regulation

Regarding the impact of this rule on affected entities, this action continues the reduced reporting and recordkeeping burden on California prune handlers and continues the reduction in the Committee's and handlers' administrative costs. Also, this action continues to reduce the number of inspections performed by the inspection agency under the order. The Committee estimates that 21 California prune handlers are subject to these provisions and to filing the handler reports. Also under the prune import

regulations, it is estimated that as many as 10 importers would file forms applicable to the import regulations. The handler annual burden to file these reports is 70.04 hours, and the respondent annual burden to file reports under the import regulations is 6.05 hours. Thus, there is a potential to reducing the annual handler and importer reporting burden by 76.09 hours during the suspension period. The benefits of this final rule apply to all prune handlers and importers, regardless of their size of operation.

The forms affected by this rule are as follows: (1) Form PMC 2.2, Application for Permission to Dispose of Substandard Prunes; (2) Form PMC 2.6, Statement of Proposed Disposition of Substandard Prunes; (3) Form PMC 4.72A, Foreign Export "Notice of Substandard Prunes for Manufacturing Purposes"; (4) Form PMC 4.72B, Foreign Export "Notice of Usage of Substandard Prunes for Manufacturing Purposes"; (5) Form PMC 2.21, Application for Permission to Dispose of Undersized Prunes for Non-Human Usage; (6) Form PMC 4.71A, User's Receipt of Dried Undersized Prunes for Non-Human Usage; (7) Form PMC 4.71B, User's Certificate of Non-Human Usage of Dried Undersized Prunes; (8) Form PMC 2.63, Statement of Proposed Disposition of Undersized Prunes; (9) Form FV-170, Prune Form No. 1; and (10) Form FV-171, Prune Form No. 2.

It should be noted that if the Committee determines that these suspensions are having an unfavorable impact on the industry, it could meet and recommend rescinding the suspensions. Also, as previously mentioned, the provisions automatically come back into effect at the end of the suspension period.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the information collection requirements being suspended by this rule were previously approved by the Office of Management and Budget, under OMB No. 0581-0178. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

In addition, as noted in the initial regulatory flexibility analysis, USDA has not identified any relevant Federal rules that duplicate, overlap or conflict with this rule.

Alternatives Considered

At meetings held on April 3, and May 1, 2003, the Committee and industry members discussed different alternatives to these actions. The

Committee discussed the possibility of suspending the total Federal prune marketing order, but its benefit in other areas is recognized by the industry. Another alternative discussed was to suspend all mandatory inspections (both incoming and outgoing inspections), but many on the Committee and in the industry deemed this action too extreme. Another alternative discussed was to exempt handlers from the inspection requirements if they could demonstrate that the automation of their plant assured consistent delivery of higher quality prunes, but this would not be practicable. Another alternative considered was a two-year suspension of the undersized prune regulation. This was opposed because it would increase the domestic salable tonnage and would add to the industry's oversupply.

The Committee's April 3, and May 1, 2003, meetings where the outgoing inspection, outgoing prune quality, size, and labeling requirement issues were deliberated were public meetings and widely publicized throughout the prune industry. At the April 3, 2003, meeting, the Committee recommended removing the limits on the quantity of larger-sized prunes that could be used to meet handler undersized obligations and eliminating the DFA of California undersized prune inspection and certification of receipt and usage. This was to reduce costs, including inspection fees and other Committee costs associated with mandatory inspection, and the reporting burden resulting from the inspection requirements.

All interested persons were invited to attend the meetings and participate in the industry's deliberations. Finally, interested persons were invited to submit information on the regulatory and informational impacts of these changes on small businesses.

An interim final rule concerning this action was published in the **Federal Register** on July 24, 2003. Copies of the rule were mailed by the Committee's staff to all Committee members, alternates and prune handlers. In addition, the rule was made available through the Internet by the Office of the Federal Register and USDA. That rule provided for a 60-day comment period which ended on September 22, 2003. No comments were received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <http://www.ams.usda.gov/fv/moab.html>. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned

address in the **FOR FURTHER INFORMATION CONTACT** section.

The Office of the U.S. Trade Representative has reviewed this rule and concurs with its issuance.

After consideration of all relevant material presented, including the Committee's recommendation, and other information, it is found that finalizing the interim final rule, without change, as published in the **Federal Register** (68 FR 43614, July 24, 2003) will tend to effectuate the declared policy of the Act.

List of Subjects

7 CFR Part 993

Marketing agreements, Plums, Prunes, Reporting and recordkeeping requirements.

7 CFR Part 999

Dates, Filberts, Food grades and standards, Imports, Nuts, Prunes, Raisins, Reporting and recordkeeping requirements, Walnuts.

PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

PART 999—SPECIALTY CROPS: IMPORT REGULATIONS

Accordingly, the interim final rule amending 7 CFR parts 993 and 999 which was published at 68 FR 43614 on July 24, 2003, is adopted as a final rule without change.

Dated: October 17, 2003.

BILLING CODE 3410-02-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2002-NM-164-AD; Amendment 39-13308; AD 2003-19-05]

RIN 2120-AA64

Airworthiness Directives; McDonnell Douglas Model DC-10-10, -10F, -15, -30, -30F (KC-10A and KDC-10), -40, and -40F Airplanes; and Model MD-10-10F and -30F Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects an error that appeared in airworthiness directive (AD) 2003-19-05 that was

published in the **Federal Register** on September 22, 2003 (68 FR 54992). The error resulted in an incorrect Type Certificate holder name. This AD is applicable to certain McDonnell Douglas Model DC-10-10, -10F, -15, -30, -30F (KC-10A and KDC-10), -40, and -40F airplanes; and certain Model MD-10-10F and -30F airplanes. This AD requires inspections for cracking and corrosion of the bolt assemblies and bushings on the hinge fittings of the inboard and outboard flaps of the left and right wings, and follow-on and corrective actions.

DATES: Effective October 27, 2003.

FOR FURTHER INFORMATION CONTACT: Ron Atmur, Aerospace Engineer, Airframe Branch, ANM-120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712-4137; telephone (562) 627-5224; fax (562) 627-5210.

SUPPLEMENTARY INFORMATION: Airworthiness Directive (AD) 2003-19-05, amendment 39-13308, applicable to certain McDonnell Douglas Model DC-10-10, -10F, -15, -30, -30F (KC-10A and KDC-10), -40, and -40F airplanes; and certain Model MD-10-10F and -30F airplanes; was published in the **Federal Register** on September 22, 2003 (68 FR 54992). That AD requires inspections for cracking and corrosion of the bolt assemblies and bushings on the hinge fittings of the inboard and outboard flaps of the left and right wings, and follow-on and corrective actions.

As published, the Type Certificate (TC) holder name appears as "BOEING" in the regulatory text of the AD. The correct TC holder name is McDonnell Douglas, which is correctly referenced throughout the preamble of the the AD.

Since no other part of the regulatory information has been changed, the final rule is not being republished in the **Federal Register**.

The effective date of this AD remains October 27, 2003.

§ 39.13 [Corrected]

On page 54993, in the second column, paragraph 2. of Part 39—Airworthiness Directives of AD 2003-19-05 is corrected to read as follows:

* * * * *

2. Section 39.13 is amended by adding the following new airworthiness directive:

2003-19-05 McDonnell Douglas:
Amendment 39-13308. Docket 2002-NM-164-AD.

* * * * *

Issued in Renton, Washington, on October 17, 2003.

Neil D. Schalekamp,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 03-26721 Filed 10-22-03; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 99-NM-229-AD; Amendment 39-13347; AD 98-16-17 R1]

RIN 2120-AA64

Airworthiness Directives; Cessna Model 750 Citation X Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; rescission.

SUMMARY: This amendment rescinds Airworthiness Directive (AD) 98-16-17 R1, which is applicable to all Cessna Model 750 Citation X series airplanes. That AD requires repetitive in-flight functional tests to verify proper operation of the secondary horizontal stabilizer pitch trim system, and repair if necessary. The requirements of that AD were intended to detect and correct contamination and damage in the system actuator, which could result in simultaneous failure of both primary and secondary pitch trim systems, and consequent reduced controllability of the airplane. Since the issuance of that AD, an improved part has been developed, which, if installed, would terminate the repetitive tests; that improved part has been installed on all affected airplanes or is being installed in production. Therefore, the identified unsafe condition no longer exists.

EFFECTIVE DATE: October 23, 2003.

FOR FURTHER INFORMATION CONTACT: Joel M. Ligon, Aerospace Engineer, Systems and Propulsion Branch, ACE-116W, FAA, Small Airplane Directorate, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946-4138; fax (316) 946-4407.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to all Cessna Model 750 Citation X series airplanes was published in the **Federal Register** on January 7, 2000 (65 FR 1075). That action proposed to rescind AD 98-16-17, amendment 39-10693 (63 FR 42206,
