

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334 and 336.

§ 73.622 [Amended]

2. Section 73.622(b), the Table of Digital Television Allotments under North Dakota, is amended by removing DTV channel *57 and adding DTV channel *40 at Minot.

Federal Communications Commission.

Barbara A. Kreisman,

Chief, Video Division, Media Bureau.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

50 CFR Part 300

National Oceanic and Atmospheric Administration

[Docket No. 030124019-3040-02; I.D. 010703B]

RIN 0648-AQ67

Pacific Halibut Fisheries; Catch Sharing Plan; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; correction.

SUMMARY: This document contains a correction to the final rule published on March 7, 2003, for the Pacific halibut fisheries catch sharing plan.

DATES: Effective March 24, 2003.

FOR FURTHER INFORMATION CONTACT: Jay Ginter, 907-586-7228 or Jamie Goen, 206-526-6140.

SUPPLEMENTARY INFORMATION: The final rule was published in the **Federal Register** on March 7, 2003 (68 FR 10989). The Catch Limits table that was published under Section 11 contained errors that require correction. The table is corrected to reflect the addition of zeros that were inadvertently deleted from the published document.

This document corrects the errors and republishes the table.

Corrections

In the rule FR Doc. 03-5171, in the issue of Thursday, March 7, 2003 (68 FR 10989) on page 10994, under 11. Catch Limits, the table in column 3 is corrected to read as follows:

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

[I.D. 082902A]

Atlantic Highly Migratory Species; Swordfish Quota Adjustment

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Adjustment of annual catch quotas.

SUMMARY: NMFS adjusts the 2002 fishing year directed fishery, incidental catch, and reserve category quotas for North Atlantic swordfish to account for underharvests from the 2000 and 2001 fishing years. The 2002 South Atlantic swordfish quota remains at 289.0 metric tons (mt) dressed weight (dw). This action is consistent with the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks (FMP) and the provisions for swordfish quota adjustments.

DATES: Effective March 24, 2003, through May 31, 2003.

FOR FURTHER INFORMATION CONTACT: Tyson Kade at 301-713-2347; Fax: 301-713-1917.

SUPPLEMENTARY INFORMATION: The FMP and its implementing regulations at 50 CFR part 635 establish catch quotas and, as applicable, fishing category and seasonal subquotas, for the North and South Atlantic swordfish stocks. Under the FMP, these catch quotas are required to be consistent with recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT). Additionally, the implementing regulations (50 CFR 635.27(c)(3)) require that, if total landings are above or below the applicable Atlantic swordfish quotas, the difference must be subtracted from, or added to, the following year's quota for the specific management category, provided such quota adjustments are consistent with ICCAT recommendations. Further, any carryover adjustments to the annual North Atlantic swordfish directed fishery quota must be apportioned equally between the two semiannual periods. Landings reports, submitted to the Southeast Fisheries Science Center, for the directed fisheries for North and South Atlantic swordfish, and estimates of the incidental catch of North Atlantic swordfish, indicate that the allocations for the respective fisheries were not completely harvested during the 2000 (June 1, 2000 through May 31, 2001) and 2001 (June 1, 2001 through May 31, 2002) fishing years.

North Atlantic Swordfish

The 2000 fishing year landings quota was 2,219.0 metric tons (mt) dressed weight (dw). Directed and incidental fishery landings of North Atlantic swordfish during the 2000 fishing year were reported to be 2,017.9 mt dw, leaving 201.1 mt dw available for carryover to the subsequent fishing year. In addition to the landings quota, the International Commission for the Conservation of Atlantic Tunas (ICCAT) allocated to the United States a dead discard allowance. In the 2000 fishing year, the dead discard allowance was 240.0 mt dw and the United States discarded an estimated 322.0 mt dw of dead swordfish. The 82.0 mt dw excess dead discards are required to be deducted from quota available to be harvested in the subsequent fishing year. Therefore, a net total of 119.1 mt dw of unharvested swordfish quota may be carried over from the 2000 fishing year.

On September 5, 2001, NMFS published notification in the **Federal Register** of an adjustment to the 2001 fishing year quota level from 2333.2 mt dw to 2,883 mt dw to account for the underharvest in the 1999 fishing year (66 FR 46401). The 2001 adjusted quota referenced in that **Federal Register**
