

recent state of science on asbestos. The purpose of the workshop is to discuss the molecular induction of asbestos related disease, lung/pleural pathogenesis, and the extrapolation of a dose response relationship. Expert panelists will discuss the following topic areas: Molecular, chemical and biochemical mechanisms of asbestos fiber toxicity; mechanisms of fiber-inducing lung and pleural disease; and exposure and dose response relationships. A summary report will be prepared documenting the discussions of the workshop, and this report will be publicly available and will support EPA's administrative record for IRIS. This meeting is being sponsored by EPA's Office of Solid Waste and Emergency Response and by EPA's Office of Research and Development.

DATES: The workshop will be held on June 12–13, 2003. The workshop hours will be from 8 a.m. to 5 p.m. on Thursday, June 12, and from 8 a.m. to 12 p.m. on Friday, June 13. Observers will be encouraged to submit comments on panel discussions currently scheduled on Thursday and Friday.

ADDRESSES: The workshop will be held at the Hyatt Regency Hotel in Chicago, Illinois. To attend the workshop as an observer, contact the MNG Center of SRA International (MNG) either in writing, by electronic mail, or by telephone. MNG's contact information for this workshop is: MNG Center, Asbestos Workshop Registration, 2801 Clarendon Boulevard, Suite 100, Arlington, Virginia 22201. Phone Number: (703) 292-5939. E-mail: asbestosworkshop@sra.com. Web link: http://www.epa.gov/swerrims/asbestos_ws/index.htm.

There is no charge for attending this workshop as an observer, but observers are encouraged to register early as the number of seats will be limited. Each registrant will receive a confirmation notice, a preliminary agenda, and a logistical fact sheet that contains directions to the meeting location. Copies of the presentation material can be obtained prior to the meeting from the EPA, Web page http://www.epa.gov/swerrims/asbestos_ws/index.htm.

SUPPLEMENTARY INFORMATION: EPA's current assessment of asbestos toxicity is based primarily on an asbestos assessment completed in 1986, and EPA's assessment has not changed substantially since that time. However, since 1986, there have been substantial improvements in asbestos measurement techniques and in the understanding of how asbestos exposure contributes to disease. To incorporate the knowledge gained over the last 17 years into the

agency's toxicity assessment for asbestos, EPA is interested in reviewing the most up-to-date peer review literature on the mechanisms of asbestos toxicity. The experts will include scientists with extensive expertise in relevant fields, such as mechanistic toxicology, pulmonology toxicology, and risk assessment. The panelists will be asked to respond to several questions that address key issues, including interpretations of epidemiology and toxicology literature, mechanistic toxicity and general topics. The product of the workshop will be a report that summarizes the panelists' and observers' comments, conclusions, and recommendations on the proposed methodology.

II. Background

A. What Action is the Agency Taking?

This notice constitutes and announces the closing of the comment periods for the difenzoquat and diquat dibromide TREDs. These decisions have been developed as part of the public participation process that EPA and the U.S. Department of Agriculture (USDA) are using to involve the public in the reassessment of pesticide tolerances under FFDCA. EPA must review tolerances and tolerance exemptions that were in effect when FQPA was enacted in August of 1996, to ensure that these existing pesticide residue limits for food and feed commodities meet the safety standard of the new law.

In reviewing these tolerances, the Agency must consider, among other things, aggregate risks from non-occupational sources of pesticide exposure, where there increased susceptibility to infants and children, and the cumulative effects of pesticides with a common mechanism of toxicity. The tolerances are considered reassessed once the safety finding has been made that the aggregate risks are not of concern. A reregistration eligibility decision (RED) was completed for difenzoquat in September 1994 and for diquat dibromide in July 1995, both prior to FQPA enactment, and therefore needed updated assessments to consider the provisions of the Act.

The 30-day comment periods for the difenzoquat and diquat dibromide

TREDs were closed on June 12, 2002 (67 FR 40296) (FRL-7181-4). As neither chemical received any adverse comments, the Agency considers the TREDs for these pesticides as immediate final decisions and hereby closed.

B. What is the Agency's Authority for Taking this Action?

The legal authority for this decision falls under FIFRA, as amended in 1988 and 1996. Section 4(g)(2)(A) of FIFRA directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," and either reregister products or take other "appropriate regulatory action."
