other data field such as institution or title.

SAFEGUARDS:

All records containing personal information are maintained in secured file cabinets or are accessed by unique passwords and log-on procedures. Only those employees with a need-to-know in order to perform their duties will be able to access the information.

RETENTION AND DISPOSAL:

The Data File is cumulative and is maintained indefinitely, and documents are disposed according to agency file plan and disposition schedule. Nonfunded proposals are maintained onsite for 1 year and then disposed after 3 years. Funded proposals are maintained onsite for 1 year after completion of the award, and then transferred to the National Archive and Records Administration.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Administrator, Information Systems and Technology Management (ISTM), USDA-CSREES, Stop 2216, 1400 Independence Avenue, SW, Washington, DC 20250–2216. The address for express mail or overnight courier service is: Deputy Administrator, ISTM, USDA-CSREES, Waterfront Centre, 800 9th Street, SW, Washington, DC 20024.

NOTIFICATION PROCEDURE:

Any individual may request information regarding this system of records or information as to whether the system contains records pertaining to such individual from the System Manager.

RECORD ACCESS PROCEDURE:

Any individual may gain access to a record in the system that pertains to such individual by submitting a written request to the System Manager.

CONTESTING RECORD PROCEDURES:

Any individual may contest a record in the system that pertains to such individual by submitting written information to the System Manager.

RECORD SOURCE CATEGORIES:

Information in this system is obtained from the individuals submitting the proposals and from peer reviewers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Privacy Act System "Cooperative Extension Personnel Records System," USDA/ES-2

The purpose of this notice is to delete this system of records because the records are no longer relevant and necessary to accomplish a purpose of the Agency and the records are no longer maintained by USDA.

DEPARTMENT OF AGRICULTURE

Forest Service

Helena National Forest, Montana, Snow Talon Fire Salvage; Intent To Prepare an Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The USDA, Forest Service, will prepare an Environmental Impact Statement (EIS) for the Snow Talon Fire Salvage. The Snow Talon Fire Salvage EIS will disclose the environmental effects of a salvage harvest of trees burned in the Snow Talon Fire on the Lincoln Ranger District of the Helena National Forest. The 2003 Snow Talon Fire burned 37,706 acres in the Copper Creek, Landers Fork, and Falls Creek drainages, approximately 10 miles northeast of Lincoln, Montana, The proposed action includes commercial harvest of approximately 20 to 25 million board feet of trees over 2700 acres in the wildfire area, roadwork to meet Best Management Practices (BMP) standards, and rehabilitation of 105 acres of jammer trails. Harvest is not proposed within Inventoried Roadless Areas (IRAs), Riparian Habitat Conservation Areas (RHCAs), or Research Natural Areas (RNAs). An EIS will be prepared displaying alternatives and the anticipated effects of the above activities to the resources and human uses of the analysis area.

DATES: Comments concerning the scope of the analysis must be postmarked by January 15, 2004. The draft EIS is expected March 2004 and the final EIS is expected June 2004.

ADDRESSES AND FOR FURTHER
INFORMATION CONTACT: For further
information, to be placed on the project
mailing list, or to provide comment
addressing this proposed action, please
e-mail, call, or mail correspondence to
Dan Seifert—Snow Talon Fire Salvage
Interdisciplinary Team Leader, Lincoln
Ranger District, 1569 Highway 200,
Lincoln, MT 59639; phone number is
(406) 362–4265; e-mail address is
dseifert@fs.fed.us.

SUPPLEMENTARY INFORMATION:

Background Information

During August and September of 2003, the Snow Talon Fire burned 37,706 acres, with 34,362 of these acres on National Forest Lands.

Approximately 26,500 acres burned with high severity (as defined in the USFS Burned Area Emergency Response Handbook FSH 2509.13, Amendment No. 2509.13–95–7).

Purpose and Need for Action

The purpose of this project is to salvage timber in response to the Snow Talon Fire. The immediate need is to recover the value of the burned commercial timber products before they decay and have no commercial viability (Helena National Forest Land and Resource Plan [Forest Plan] II-1, Goal #11 and Goal #16). The proposed commercial timber salvage harvest would provide economic opportunities for rural communities and is consistent with Forest Plan goals to provide a sustained timber yield that is responsive to local industry and national needs (Forest Plan Forest-Wide Goal #11). Management Area direction for the majority of the proposed for harvest areas designates goals emphasizing costeffective timber production while protecting the soil productivity (Forest Plan Management Areas T-1, T-3, T-4). While some of the actions proposed will help restore resources affected by the fire, the intent of including these actions with this salvage harvest project is to mitigate for the effects of salvage activities. Jammer trail reclamation is included in the proposed action to mitigate for the overall effects of salvage activities to soils. It is not the intent of this project to fully address all the effects of the Snow Talon Fire. Currently, a restoration team is addressing long-term restoration needs through a variety of other projects.

Proposed Action

The Helena National Forest proposes to harvest 20 to 25 million board feet of commercial timber over approximately 2700 acres. The following yarding methods, by percentage of proposed harvest acreage, would be utilized: 55% helicopter, 20% skyline, 25% tractor. To facilitate harvest, approximately ½ mile of temporary roads and 30 helicopter landing areas are proposed and would be rehabilitated following harvest. Two temporary bridges would also be needed, and would be removed following harvest and rehabilitation activities. Only dead or dying trees would be removed; however, a few green trees may have to be cut to meet safety requirements in helicopter

landing areas and skyline corridors. To minimize impacts to burned soils, the proposed action specifies that all tractor and skyline logging would occur under winter conditions (either 4 inches of frozen soil and/or 6 inches of packed snow). Reclamation of 105 acres of jammer trails originally constructed for logging in the 1960s is included in the proposed action to mitigate for harvest activities by improving soil quality. BMPs that promote long-term water quality, maintain existing road systems, and minimize erosion are also proposed. BMP activities would include, but not be limited to, improving road drainage features, installing and replacing ditchrelief culverts, gravelling portions of the road system, re-vegetation, and other practices to minimize erosion. The proposed action does not include timber harvest or temporary road construction in IRAs, RNAs, or RHCAs.

Responsible Official

Thomas J. Clifford, Forest Supervisor—2880 Skyway Drive, Helena, MT 59602.

Nature of Decision To Be Made

The decision framework refers to the scope of the decision that will be issued at the conclusion of this analysis by the responsible official. The responsible official's decision will be based on information disclosed in the environmental document, information contained in the Project Analysis File, comments submitted during the scoping of the proposed action and the comment period, comment responses, and applicable laws, regulations, and policies in making the decision and stating the rationale in the Record of Decision.

The responsible official may decide whether or not to

- Select the proposed action,
- Select an alternative to the proposed action, or
- Select portions from the developed range of alternatives and combine them in a logical package.

In selecting one of the above options, the terms and conditions of the selection will be fully displayed and understood. Within the parameters of this decision space, it will also be determined if a *Helena Land and Resource Management Plan* amendment would be necessary. The responsible official will take into consideration relationships of alternatives to the identified significant issues.

Scoping Process

Proposed Action scoping period— Scoping begins the day this notice is published in the **Federal Register** and

ends January 15, 2004. A scoping document will be mailed to Federal, State, and local agencies, tribal governements, and other individuals or organizations who may be interested in or affected by the proposed project. The scoping document will also be posted on the Helena National Forest Web site on the Internet at http://www.fs.fed.us/ r1/helena/. A public open-house scoping meeting is tentatively scheduled from 4:30 to 6:30 p.m., December 17, 2003 in Lincoln, Montana. **Draft Environmental Impact Statement** release, 45-day comment period and public meetings—begins in March 2004.

Final Environmental Impact Statement and Record of Decision—June

Preliminary Issues

The Snow Talon Interdisciplinary Team has identified the following preliminary issues to be addressed in the EIS:

- Copper Creek is the most heavily used yearlong recreational areas on the Lincoln Ranger District, both for noncommercial and permitted commercial recreational activities. Public safety concerns may necessitate delays and/or temporary closures of portions of the Copper Creek drainage to public use when proposed activities are occurring.
- The analysis area provides habitat for the grizzly bear and lynx, which are both species listed as threatened under the Endangered Species Act. The analysis area is within the Northern Continental Divide Ecosystem grizzly bear recovery area.
- Copper Creek provides critical spawning habitat for upper Blackfoot River fluvial bull trout, a species listed as threatened under the Endangered Species Act.
- Other animal and plant species listed as sensitive by the U.S. Forest Service and the State of Montana are known to be present in the Copper Creek area.

Possible Alternatives

Alternatives being considered at this time are this proposed action and the no action alternative (not to conduct a salvage harvest).

Permits or Licenses Required

In order to proceed, the proposed action may require the following permits:

- State of Montana Floodplain Development Permit.
- Short-Term Exemption from Montana's Surface Water Quality Standard (3A Authorization).
- State of Montana Stream Protection Act 124 Permit.

 Federal Clean Water Act Section 404 Permit.

Comment Requested

This notice of intent initiates the scoping process which guides the development of the EIS. Scoping comments addressing this proposed action are due to the Forest Service by January 15, 2004. Concerns or issues should display points of dispute or debate relevant to the proposed action. Identifying significant issues is key in the process of developing alternatives.

Early Notice of Importance of Public Participation in Subsequent Environmental Review: A draft EIS will be prepared for comment. The 45-day comment period on the draft EIS will begin in March 2004 from the date the Environmental Protection Agency publishes the notice of availability in the Federal Register.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft EISs must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions, Vermont Yankee Nuclear Power Corp. v. NRDC, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts, Čity of Angoon v. Hodel, 803 F.2d 1016, 1022 (9th Cir. 1986) and Wisconsin Heritages, Inc. v. Harris, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day DEIS comment period so that substantive comments and objections are made available at a time when the Forest Service can meaningfully consider and respond to them in the final EIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft EIS or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 Code of Federal Regulations (CFR) 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21).

Dated: November 25, 2003.

Thomas J. Clifford,

Forest Supervisor.

DEPARTMENT OF AGRICULTURE

Forest Service

Lake Tahoe Basin Federal Advisory Committee

AGENCY: Forest Service, USDA. **ACTION:** Notice of meeting.

SUMMARY: The Lake Tahoe Basin Federal Advisory Committee will hold a meeting on January 9, 2004, at the U.S. Forest Service Office, Emerald Bay Conference Room, 35 College Drive, South Lake Tahoe, CA. This Committee, established by the Secretary of Agriculture on December 15, 1998, (64 FR 2876) is chartered to provide advice to the Secretary on implementing the terms of the Federal Interagency Partnership on the Lake Tahoe Region and other matters raised by the Secretary.

DATES: The meeting will be held January 9, 2004, beginning at 10 a.m. and ending at 11 a.m.

ADDRESSES: The meeting will be held at the U.S. Forest Service Office, Emerald Bay Conference Room, 35 College Drive, South Lake Tahoe, CA.

FOR FURTHER INFORMATION CONTACT:

Maribeth Gustafson or Jeannie Stafford, Lake Tahoe Basin Management Unit, Forest Service, 35 College Drive, South Lake Tahoe, CA 96150, (530) 543–2642.

SUPPLEMENTARY INFORMATION: The committee will meet jointly with the Lake Tahoe Basin Executives Committee via conference call. Items to be covered on the agenda include: (1) Recommendations for Southern Nevada Public Lands Management Act Funding Proposals and (2) public comment. All Lake Tahoe Basin Federal Advisory Committee meetings are open to the public. Interested citizens are encouraged to attend at the above address. Issues may be brought to the attention of the Committee during the open public comment period at the meeting or by filing written statements with the secretary for the Committee

before or after the meeting. Please refer any written comments to the Lake Tahoe Basin Management Unit at the contact address stated above.

Dated: November 24, 2003.

Rex Norman,

Acting Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF AGRICULTURE

Forest Service

Plumas County Resource Advisory Committee (RAC)

AGENCY: Forest Service, USDA. **ACTION:** Notice of meetings.

SUMMARY: The Plumas County Resource Advisory Committee (RAC) will hold meetings on December 5, in Quincy, California, and another in Blairsden, CA on January 16. The purpose of the December 5 meeting is to review Forest Supervisor decisions related to Cycle 3 approved projects, elect a Chair for 2004, and to plan the Cycle 4 funding process under the Title 2 provisions of the Secure Rural Schools and Community Self-Determination Act of 2000. The purpose of the January 16 meeting is to review presentations by previously funded project proponents and to discuss an on-going monitoring effort for funded projects.

DATES AND ADDRESSES: The December 5 meeting will take place from 9 a.m.—3 p.m., in the Mineral Building at the Plumas-Sierra County Fairgrounds, 204 Fairgrounds Road, Quincy, California. The January 16 meeting will take place from 9 a.m.—2 p.m., at the Graeagle Firehall, 7620 Highway 89, Blairsden, CA.

FOR FURTHER INFORMATION CONTACT: Lee

Anne Schramel Taylor, Forest Coordinator, USDA, Plumas National Forest, P.O. Box 11500/159 Lawrence Street, Quincy, CA 95971; (530) 283– 7850; or by E–MAIL eataylor@fs.fed.us.

SUPPLEMENTARY INFORMATION: Agenda items for the December 5 meeting include: (1) Report on the CA RAC meeting; (2) 2004 Chair election; (3) Forest Supervisor feedback on Cycle 3 approved projects; (4) Update on forest and fuels initiatives; (5) Discuss stewardship contracting legislation; (6) Update from the Plumas County FireSafe Council; and, (7) Future meeting schedule/logistics/agenda. Agenda items for the January 16 meeting include: (1) Review presentations from previously funded project proponents; (2) Continue discussion on monitoring

and stewardship contracting; and, (3) Future meeting schedule/logistics/ agenda. The meetings are open to the public and individuals may address the Committee after being recognized by the Chair. Other RAC information may be obtained at http://wwww.fs.fed.us/pay2states.

Dated: November 20, 2003.

Natural Resources Conservation Service

Notice of Proposed Changes to Section IV of the Field Office Technical Guide (FOTG) of the Natural Resources Conservation Service in Michigan

AGENCY: Natural Resources Conservation Service (NRCS) in Michigan, U.S. Department of Agriculture.

ACTION: Notice of availability of proposed changes in NRCS–Michigan FOTG, Section IV for review and comment.

SUMMARY: It is the intention of NRCS in Michigan to issue revised conservation practice standards in Section IV of the FOTG. The revised standards include: Surface Drainage, Main or Lateral (608) Dike (356)

Aquaculture Ponds (397) Irrigation Storage Reservoir (436) Irrigation System, Surface and

Subsurface (443)
Land Smoothing (466)
Obstruction Removal (500)
Surface Drainage, Field Ditch (607)
Clearing and Snagging (326)
Agrichemical Containment Facility
(702)

DATES: Comments will be received on or before January 2, 2004.

FOR FURTHER INFORMATION CONTACT:

Inquire in writing to Kevin Wickey, Assistant State Conservationist-Technology, Natural Resources Conservation Service, 3001 Coolidge Road, Suite 250, East Lansing, MI 48823. Copies of these standards will be made available upon written request. You may submit electronic requests and comments to

Kevin.Wickey@mi.usda.gov.

FOR FURTHER INFORMATION CONTACT: Kevin Wickey (517) 324–5279.

SUPPLEMENTARY INFORMATION: Section 393 of the Federal Agriculture Improvement and Reform Act of 1996
