#### § 90.1213 Band plan.

The following channel center frequencies are permitted to be aggregated for channel bandwidths of 5, 10, 15 or 20 MHz. Channel numbers 1 through 5 and 15 through 18 are 1 MHz channels and channels numbers 6 through 14 are 5 MHz channels.

Center frequency (MHz)	Channel Nos.
4940.5	1
4941.5	2
4942.5	3
4943.5	4
4944.5	5
4947.5	6
4952.5	7
4957.5	8
4962.5	9
4967.5	10
4972.5	11
4977.5	12
4982.5	13
4985.5	14
4986.5	15
4987.5	16
4988.5	17
1000 5	18
4989.5	10

#### § 90.1215 Power limits.

The transmitting power of stations operating in the 4940–4990 MHz band must not exceed the maximum limits in this section.

(a) The peak transmit power should not exceed:

Channel bandwidth (MHz)	Peak trans- mitter power (dBm)
1	20 27 30 31.8 33

Devices are also limited to a peak power spectral density of 20 dBm per 1 MHz. Devices using channel bandwidths other than those listed above are permitted; however, they are limited to a peak power spectral density of 20 dBm/MHz. If transmitting antennas of directional gain greater than 9 dBi are used, both the peak transmit power and the peak power spectral density should be reduced by the amount in decibels that the directional gain of the antenna exceeds 9 dBi. However, point-to-point or point-tomultipoint operation (both fixed and temporary-fixed rapid deployment) may employ transmitting antennas with directional gain up to 26 dBi without any corresponding reduction in the transmitter power or spectral density. Corresponding reduction in the peak transmit power and peak power spectral density should be the amount in

decibels that the directional gain of the antenna exceeds 26 dBi.

- (b) The peak transmit power is measured as a conducted emission over any interval of continuous transmission calibrated in terms of an rms-equivalent voltage. If the device cannot be connected directly, alternative techniques acceptable to the Commission may be used. The measurement results shall be properly adjusted for any instrument limitations, such as detector response times, limited resolution bandwidth capability when compared to the emission bandwidth, sensitivity, etc., so as to obtain a true peak measurement conforming to the definitions in this paragraph for the emission in question.
- (c) The peak power spectral density is measured as a conducted emission by direct connection of a calibrated test instrument to the equipment under test. If the device cannot be connected directly, alternative techniques acceptable to the Commission may be used. Measurements are made over a bandwidth of 1 MHz or the 26 dB emission bandwidth of the device. whichever is less. A resolution bandwidth less than the measurement bandwidth can be used, provided that the measured power is integrated to show total power over the measurement bandwidth. If the resolution bandwidth is approximately equal to the measurement bandwidth, and much less than the emission bandwidth of the equipment under test, the measured results shall be corrected to account for any difference between the resolution bandwidth of the test instrument and its actual noise bandwidth.

#### § 90.1217 RF Hazards.

Licensees and manufacturers are subject to the radiofrequency radiation exposure requirements specified in §§ 1.1307(b), 2.1091 and 2.1093 of this chapter, as appropriate. Applications for equipment authorization of mobile or portable devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions. Technical information showing the basis for this statement must be submitted to the Commission upon request.

# Federal-State Joint Conference on Accounting Issues

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule; delay of effective date.

**SUMMARY:** This document further delays the effective date and the implementation of four previously adopted accounting and reporting rule changes from July 1, 2003, until January 1, 2004. The Commission extends the delay in order to avoid undue burdens associated with implementation of midyear accounting and reporting requirement changes and to allow the Federal-State Joint Conference on Accounting Issues more time to formulate its recommendations to the Commission.

**DATES:** The effective date for amendments to 47 CFR 32.5200, 32.6562 and 32.6620 published at 67 FR 5670 (February 6, 2002) is further delayed until January 1, 2004.

**FOR FURTHER INFORMATION CONTACT:** Jane E. Jackson, Associate Chief, Wireline Competition Bureau, (202) 418–1500.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Order adopted June 20, 2003, and released on June 24, 2003. The full text of the document is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY-A257, Washington, DC 20554. This document may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone (202) 863-2893, facsimile (202) 863-2898, or via e-mail qualexint@aol.com.

### **Synopsis of Order**

On November 12, 2002, the Commission released an order, 67 FR 77432 (December 18, 2002) further deferring until July 1, 2003, the effective date and implementation of four accounting and reporting requirement rule modifications previously adopted by the Commission as part of its biennial review of accounting requirements and Automated Reporting Management System (ARMIS) reporting

requirements, Report and Order, 67 FR 5670 (February 6, 2002), delayed at 67 FR 20052 (April 24, 2003). The Commission deferred the implementation of these four accounting and reporting requirement rule modifications in order to allow the Federal-State Joint Conference on Accounting Issues time to consider these and other accounting issues in formulating their recommendations to the Commission. These accounting and reporting rule changes are as follows: (1) The consolidation of Accounts 6621 through 6623 into Account 6620, with subaccounts for wholesale and retail; (2) the consolidation of Account 5230, Directory revenue, into Account 5200, Miscellaneous revenue; (3) the consolidation of the depreciation and amortization expense accounts (Accounts 6561 through 6565) into Account 6562, Depreciation and amortization expenses; and (4) the revised "Loop Sheath Kilometers" data collection in Table II of ARMIS Report 43-07.

The Commission extends from July 1, 2003 to January 1, 2004, the current suspension of the implementation of these four accounting and reporting requirement rule modifications. The Commission extends the suspension in order to avoid undue burdens associated with implementation of mid-year accounting and reporting requirement changes on the affected carriers, the Commission, and state regulatory commissions and to allow the Federal-State Joint Conference on Accounting Issues more time to formulate its recommendations to the Commission.

# 47 CFR Part 54

**IFCC 02-101** 

Establishment of the Media Bureau, the Wireline Competition Bureau and the Consumer and Governmental Affairs Bureau: Reorganization of the International Bureau, and Other **Organizational Changes** 

**AGENCY: Federal Communications** Commission.

**ACTION:** Correcting amendments.

**SUMMARY:** This document contains a correction to the final regulation Part 54, which was published in the Federal Register on Thursday, March 21, 2002, (67 FR 13216). This document will correct two words in § 54.709(a)(3) of the Commission rules. The regulation relates to the computations of required contributions to universal service support mechanisms in § 54.709(a)(3). DATES: Effective June 30, 2003.

# FOR FURTHER INFORMATION CONTACT:

Diane Law Hsu, Deputy Chief, Wireline Competition Bureau, Telecommunications Access Policy

# Division, (202) 418–7400. SUPPLEMENTARY INFORMATION:

## **Background**

Part 54 rules are issued pursuant to the Communications Act of 1934, as amended. The purpose of the part 54 rules is to implement section 254 of the Communications Act of 1934, as amended, 47 U.S.C. 254. The final regulation that is subject to the correction deals with § 54.709 and how carriers are to compute their required contributions to the universal service support mechanism.

# **Need for Correction**

As published, the final regulation contains an error which needs to be corrected

# List of Subjects in 47 CFR part 54

Reporting and recordkeeping requirements, Telecommunications, Telephone.

■ Accordingly, 47 CFR part 54 is corrected by making the following correcting amendments:

# PART 54—UNIVERSAL SERVICE

■ 1. The authority citation for part 54 continues to read as follows:

Authority: 47 U.S.C. 1, 4(i), 201, 205, 214, and 254 unless otherwise noted.

■ 2. Revise paragraph (a)(3) of § 54.303 to read as follows:

### § 54.709 Computations of required contributions to universal service support mechanisms.

- (a) \* \* \*
- (1) \* \* \*
- (2) \* \* \*
- (3) Total projected expenses for the federal universal service support mechanisms for each quarter must be approved by the Commission before they are used to calculate the quarterly contribution factor and individual contributions. For each quarter, the Administrator must submit its

projections of demand for the federal universal service support mechanisms for high-cost areas, low-income consumers, schools and libraries, and rural health care providers, respectively, and the basis for those projections, to the Commission and the Wireline Competition Bureau at least sixty (60) calendar days prior to the start of that quarter. For each quarter, the Administrator must submit its projections of administrative expenses for the high-cost mechanism, the lowincome mechanism, the schools and libraries mechanism and the rural health care mechanism and the basis for those projections to the Commission and the Wireline Competition Bureau at least sixty (60) calendar days prior to the start of that quarter. Based on data submitted to the Administrator on the Telecommunications Reporting Worksheets, the Administrator must submit the total contribution base to the Wireline Competition Bureau at least thirty (30) days before the start of each quarter. The projections of demand and administrative expenses and the contribution factor shall be announced by the Commission in a public notice and shall be made available on the Commission's website. The Commission reserves the right to set projections of demand and administrative expenses at amounts that the Commission determines will serve the public interest at any time within the fourteen-day period following release of the Commission's public notice. If the Commission take no action within fourteen (14) days of the date of release of the public notice announcing the projections of demand and administrative expenses, the projections of demand and administrative expenses, and the contribution factor shall be deemed approved by the Commission. Except as provided in § 54.706(c), the Administrator shall apply the quarterly contribution factor, once approved by the Commission, to contributor's interstate and international end-user telecommunications revenues to calculate the amount of individual contributions.

Federal Communications Commission.
