

Transmittal No. 03-34

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. Many aspects of the modification and upgrade package for Jordanian F-16 aircraft include systems previously released to Jordan, such as the F100-PW-220 engine, AN/ALR-69 radar warning receiver, the AN/APG-66V2 radar, the Have Quick II radio, and the fly-by-wire flight control system. The Mid-Life Upgrade (MLU) installation will introduce evolutionary improvements including an upgraded APG-66 radar, advanced Identification Friend-or-Foe system, Global Positioning System (GPS), and provision for targeting and navigation pods. The most significant new technology introduced with MLU installation in Jordan is capability to employ AIM-120 medium-range air-to-air missiles.

2. If a technologically advanced adversary were to obtain specific knowledge of these hardware and software elements, the adversary might be able to develop countermeasures or counter-tactics that could reduce weapon system effectiveness.

3. A determination has been made that Jordan can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
