In the "Draft 10 CFR Construction Inspection Program Framework Document," the NRC staff set forth the basis for the construction inspection program for reactors built under 10 CFR part 52. The document was issued on May 30, 2003 and the public workshop is scheduled for August 27, 2003 to discuss the scope and the types of inspections which are planned during the new reactor construction project. Additionally, comments received from various stakeholders will be discussed. The following topics will be discussed:

- The scope and types of NRC inspections and when they will occur for the different phases of construction of a nuclear plant constructed under 10 CFR part 52.
