

Executive Order 12866 and is therefore not subject to formal OMB review prior to proposal.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, requires that EPA prepare a regulatory flexibility analysis for regulations that have a significant impact on a substantial number of small entities. The permit being issued is not a "rule" subject to the Regulatory Flexibility Act.

D. Unfunded Mandates Reform Act

Section 201 of the Unfunded Mandates Reform Act (UMRA), Public Law 104-4, generally requires Federal agencies to assess the effects of their "regulatory actions" on State, local and tribal governments and the private sector. UMRA uses the term "regulatory actions" to refer to regulations. (See, *e.g.*, UMRA section 201, "Each agency shall * * * assess the effects of Federal regulatory actions * * * (other than to the extent that such regulations incorporate requirements specifically set forth in law)" (emphasis added)). UMRA section 102 defines "regulation" by reference to section 658 of Title 2 of the U.S. Code, which in turn defines "regulation" and "rule" by reference to section 601(2) of the Regulatory Flexibility Act (RFA). That section of the RFA defines "rule" as "any rule for which the agency publishes a notice of proposed rulemaking pursuant to section 553(b) of the Administrative Procedure Act (APA), or any other law * * *" NPDES general permits are not "rules" under the APA and thus not subject to the APA requirements to publish a notice of proposed rulemaking. NPDES general permits are also not subject to such a requirement under the Clean Water Act. While EPA publishes a notice to solicit public comment on draft general permits, it does so pursuant to the CWA section 402(a) requirement to provide "an opportunity for a hearing." Thus, NPDES general permits are not "rules" for RFA or UMRA purposes.

Title: Home Wiring Provisions.

Form Number: N/A.

Respondents: Business or other for-profit entities; Individuals or households.

Number of Respondents: 30,500.

Estimated Time per Response: 5 mins. (0.083 hrs) to 20 hrs.

Frequency of Response:

Recordkeeping; Annual and on occasion reporting requirements; Third party disclosure.

Total Annual Burden: 46,114 hours.

Total Annual Cost: None.

Needs and Uses: On January 29, 2003, the Commission issued a First Order on Reconsideration and Second Report and Order, FCC 03–9, which grants in part and denies in part the petitions for reconsideration filed in response to the Report and Order. The Commission's home run wiring rules were modified in the First Order on Reconsideration to provide that in the event of sale, the home run wiring be made available to the MDU owner or alternative provider during the 24-hour period prior to actual service termination by the incumbent and that home run wiring located behind sheet rock is physically inaccessible for purposes of determining the demarcation point between home wiring and home run wiring. In the Second Report and Order, the Commission adopted a limited exemption for small non-cable MVPDs from the signal leakage reporting requirements and concluded that the cable and home run wiring rules should apply to all MVPDs in the same manner that they apply to cable operators. The Commission declined to restrict exclusive contracts or ban perpetual contracts. The Commission also declined to allow MDU owners to require sharing of incumbent-owned cable wiring.
