# Federal Energy Regulatory Commission

[Docket No. CP03-84-000]

Transcontinental Gas Pipe Line Corporation; Notice of Intent To Prepare an Environmental Assessment for the Proposed Mobile Bay Replacement Project and Request for Comments on Environmental Issues

April 25, 2003.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Mobile Bay Replacement Project involving construction and operation of facilities by Transcontinental Gas Pipe Line Corporation (Transco) in Mobile County, Alabama. These facilities would consist of an offset replacement of about 1.45 miles of 30-inch-diameter pipeline. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Transco provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (http://www.ferc.gov).

### **Summary of the Proposed Project**

Transco intends to install the 1.45 miles of 30-inch-diameter pipeline in order to ensure compliance with U.S. Department of Transportation pipeline

safety regulations. Transco would construct the new replacement pipeline parallel to the existing pipeline and within its existing right-of-way. Once construction of the new offset pipeline has been completed, the old pipeline would be removed and restoration and revegetation activities would be completed.

The location of the project facilities is shown in appendix 1.2

#### **Land Requirements for Construction**

Construction of the proposed facilities would require about 26.2 acres of land. Following construction, the entire work area would be restored and allowed to revert to its former use.

### The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us 3 to discover and address concerns the public may have about proposals. This process is referred to as "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- public safety land use
- water resources, fisheries, and wetlands cultural resources
- vegetation and wildlife endangered and threatened species
  - geology and soils

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section beginning on page 4.

# **Currently Identified Environmental Issues**

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Transco. This preliminary list of issues may be changed based on your comments and our analysis.

- Two federally listed endangered or threatened species may occur in the proposed project area.
- A total of 1.6 acres of palustrine emergent or scrub-shrub wetlands and 1.4 acres of forested wetlands would be temporarily disturbed.
- One waterbody, the Island Branch, would be crossed.
- There would be seven residences located within 50 feet of the proposed construction work area, five of which would be within 25 feet.

### **Public Participation**

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative routes), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

• Send an original and two copies of your letter to: Magalie R. Salas, Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426.

<sup>&</sup>lt;sup>1</sup> Transco's application was filed with the Commission under Section 7 of the Natural Gas Act and part 157 of the Commission's regulations.

<sup>&</sup>lt;sup>2</sup> The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available on the Commission's Web site at the "FERRIS" link or from the Commission's Public Reference and Files Maintenance Branch, 888 First Street, NE., Washington, DC 20426, or call (202) 502–8371. For instructions on connecting to FERRIS refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

<sup>&</sup>lt;sup>3</sup> "We", "us", and "our" refer to the environmental staff of the Office of Energy Projects (OEP)

- Label one copy of the comments for the attention of Gas Branch 2.
- Reference Docket No. CP03–84– 000.
- Mail your comments so that they will be received in Washington, DC on or before (May 28, 2003).

Please note that we are continuing to experience delays in mail deliveries from the U.S. Postal Service. As a result, we will include all comments that we receive within a reasonable time frame in our environmental analysis of this project. However, the Commission strongly encourages electronic filing of any comments or interventions or protests to this proceeding. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at http:/ /www.ferc.gov under the "e-Filing" link and the link to the User's Guide. Before you can file comments you will need to create a free account which can be created by clicking on "Login to File" and then "New User Account."

## **Becoming an Intervenor**

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding known as an "intervenor". Intervenors play a more formal role in the process. Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide 14 copies of its filings to the Secretary of the Commission and must send a copy of its filings to all other parties on the Commission's service list for this proceeding. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 2).4 Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your environmental comments considered.

#### **Environmental Mailing List**

This notice is being sent to individuals, organizations, and government entities interested in and/or potentially affected by the proposed project. It is also being sent to all

identified potential temporary right-ofway grantors and/or landowners currently holding right-of-way leases. By this notice we are also asking governmental agencies, especially those in appendix 3, to express their interest in becoming cooperating agencies for the preparation of the EA.

## **Additional Information**

Additional information about the project is available from the Commission's Office of External Affairs, at 1-866-208-FERC or on the FERC Internet Web site (http:// www.ferc.gov)using the FERRIS link. Click on the FERRIS link, enter the docket number excluding the last three digits in the Docket Number field. Be sure you have selected an appropriate date range. For assistance with FERRIS, the FERRIS helpline can be reached at 1-866-208-3676, TTY (202) 502-8659, or at FERCOnlineSupport@ferc.gov. The FERRIS link on the FERC Internet Web site also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission now offers a free service called eSubscription which allows you too keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries and direct links to the documents. Go to <a href="https://www.ferc.gov/esubscribenow.htm">https://www.ferc.gov/esubscribenow.htm</a>.

### Magalie R. Salas,

Secretary.

[Project No. 2105-089]

Notice of Intent To Prepare an Environmental Impact Statement, Scoping Meetings and Site Visits, and Soliciting Scoping Comments

April 25, 2003.

Take notice that the following hydroelectric application has been filed with Commission and is available for public inspection:

- a. *Type of Application:* New Major License.
  - b. Project No.: 2105-089.
  - c. Date filed: October 23, 2002.
- d. *Applicant:* Pacific Gas and Electric Company (PG&E).

- e. *Name of Project:* Upper North Fork Feather River Project.
- f. Location: On the North Fork Feather River, in the vicinity of the community of Chester, Plumas County, California, T28N, R7E. The project occupies 1,500 acres of land administered by the Forest Supervisors of the Lassen and Plumas National Forests.
- g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)—825(r).
- h. Applicant Contacts: Mr. Randal Livingston, Lead Director, Hydro Generation Department, Pacific Gas and Electric Company, P.O. Box 770000 (N11C), San Francisco, CA, 94177, (415) 973–6950, and Ms. Janet Loduca, Attorney, Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, CA, 94120–7442, (415) 973– 0174.
- i. FERC Contact: John Mudre, (202) 502–8902 or john.mudre@ferc.gov. j. Deadline for filing scoping

comments: June 20, 2003.

All documents (original and eight copies) should be filed with: Magalie R. Salas, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

Scoping comments may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site ( http://www.ferc.gov ) under the "e-Filing" link.

k. This application is not ready for environmental analysis at this time.

l. The existing Upper North Fork Feather River Project consists of three dams and reservoirs, five powerhouses, tunnels and penstocks connecting the reservoirs to the powerhouses, 230kV and 115kV transmission facilities, and various roads, recreation facilities, and administrative facilities. Project reservoirs include Lake Almanor (1,142,251 acre-feet), Butt Valley Reservoir (49,891 acre-feet), and Belden Forebay (2,477 acre-feet). Powerhouses include Butt Valley Powerhouse (41 MW), Caribou No. 1 Powerhouse (75 MW), Caribou No. 2 Powerhouse (120 MW), Oak Flat Powerhouse (1.3 MW), and Belden Powerhouse (125 MW). The

<sup>&</sup>lt;sup>4</sup> Interventions may also be filed electronically via the Internet in lieu of paper. *See* the previous discussion on filing comments electronically.
