NUCLEAR REGULATORY COMMISSION

[Docket No. 50-213-OLA, ASLBP No. 01-787-02-OLA]

Atomic Safety and Licensing Board; Before Administrative Judges: Ann Marshall Young, Chair, Dr. Peter S. Lam, Thomas D. Murphy; In the Matter of Connecticut Yankee Atomic Power Company (Haddam Neck Plant)

January 27, 2003.

Notice of Evidentiary Hearing and Opportunity To Make Limited Appearance Statements

This Atomic Safety and Licensing Board hereby gives notice that, beginning on Monday, March 10, 2003, it will convene an evidentiary hearing in New Britain, Connecticut, to receive testimony and exhibits and to allow the cross-examination of witnesses on certain matters at issue in this proceeding. In addition, the Board gives notice that, in accordance with 10 CFR 2.715(a), it will also entertain oral limited appearance statements from members of the public, as specified in Section B below.

This proceeding involves certain challenges of Intervenor Citizens Awareness Network (CAN) to a license amendment request by Connecticut Yankee Atomic Power Company (CYAPCO or Connecticut Yankee), seeking approval of a License Termination Plan (LTP) for its Haddam Neck Plant. (Intervenor Connecticut Department of Public Utility Control (CDPUC) has settled all its admitted contentions with CYAPCO, but continues to participate in the proceeding as an interested state.) On January 31, 2001, this Licensing Board was established to preside over this proceeding. 66 FR 9111 (Feb. 6, 2001). By Memorandum and Order dated July 9, 2001, the Licensing Board granted CAN's and CDPUC's requests for a hearing, and on July 12, 2001, issued a Notice of Hearing. 66 FR 37494 (July 18, 2001).

At the evidentiary hearing, the Board will receive evidence on CAN's challenges to the adequacy of certain aspects of the LTP to assure the protection of the public health and safety, relating to Connecticut Yankee's site characterization and methodology for detection and cleanup of transuranic, hard-to-detect-nuclide, and "hot particle" contamination; and to its dose modeling calculation methodology.
