Title: National Pretreatment Program. *Abstract:* This Information Collection Request (ICR) calculates the burden and costs associated with managing the National Pretreatment Program, mandated by sections 402(a) and (b) and 307(b) of the Clean Water Act.

EPA's Office of Wastewater Management (OWM) in the Office of Water (OW) is responsible for the management of the pretreatment program. The Clean Water Act requires EPA to develop national pretreatment standards to control discharges from Industrial Users (IUs) into Publicly Owned Treatment Works (POTWs). These standards limit the level of certain pollutants allowed in nondomestic wastewater that is discharged to a POTW. EPA administers the pretreatment program through the National Pollutant Discharge Elimination System (NPDES) permit program. Under the NPDES permit program, EPA may approve State or individual POTW implementation of the pretreatment standards at their respective levels. Data collected from IUs during implementation of the pretreatment program include the mass, frequency, and content of IU discharges and IU schedules for installing pretreatment equipment. Data also include actual or anticipated IU discharges of wastes that violate pretreatment standards, have the potential to cause problems at the POTW, or are considered hazardous under the Resource Conservation and Recovery Act (RCRA). OWM uses the data collected under the pretreatment program to monitor and enforce compliance with the pretreatment regulations, as well as to authorize program administration at the State or local (POTW) level. States and POTWs applying for approval of their pretreatment programs submit data concerning their legal, procedural, and administrative bases for establishing such programs. This information may include surveys of IUs, local limits for pollutant concentrations, and schedules for completion of major project requirements. IUs and POTWs submit written reports to the approved state or EPA. These data may then be entered into the NPDES databases by the approved state or by EPA.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average approximately 10
