

Frequency of Response: Biennially.
Estimated Total Annual Hour Burden: 196,976.

Estimated Total Annual Cost: \$10,311,438, includes \$0 annualized capital and \$25,336 O&M costs.

Changes in the Estimates: There is an increase of 8,352 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to several reasons. Based on reported data for the 2001 Hazardous Waste Report, EPA estimates a slight increase in the number of respondents, an additional 42; we estimate the increase in the number of submitted forms to be 15,218. The completion of the RCRA Subtitle C Site Identification Form will require an estimated additional 20 minutes. This has resulted in a minor increase for those manually filling out the forms (resulting in an approximately one percent annual burden reduction to the regulated community overall).

Dated: August 12, 2003.

Title: Confidentiality Rules (OMB Control No. 2020-0003; EPA ICR No. 1665.06), expiring September 30, 2003.

Abstract: EPA administers a number of environmental protection statutes (*e.g.*, the Clean Water Act; the Clean Air Act; the Toxic Substances Control Act; the Resource Conservation and Recovery Act; and the Comprehensive Environmental Response, Compensation, and Liability Act), under which the Agency collects information from thousands of facilities in many economic sectors. In addition, businesses submit information to EPA without the Agency requesting it. The information addresses topics such as toxic chemicals, industrial processes, waste streams, and regulatory compliance. In many cases, businesses that submit information claim it to be confidential business information (CBI).

EPA established the procedures described in 40 CFR part 2, subparts A and B to protect the confidentiality of information as well as the rights of the public to obtain access to the information under the Freedom of Information Act (FOIA). In accordance with these regulations, when EPA finds it necessary to make a final confidentiality determination (*e.g.*, in response to a FOIA request or in the course of rulemaking or litigation), or an advance confidentiality determination, it notifies the affected business by sending a letter requesting substantiation of the confidentiality claim. This letter provides the affected business with an opportunity to submit

comments (*i.e.*, a substantiation). EPA then considers the business's comments in determining whether the previously submitted information should be protected as CBI. This renewal ICR relates to the collection of information that will assist EPA in determining whether previously submitted information is entitled to confidential treatment.

EPA is proposing to use an updated Request for Substantiation letter ("proposed letter"). The proposed letter is made up of two separate sample letters that address different factual situations: Sample Letter A, which requests a substantiation in response to a FOIA request, and Sample Letter B, which requests a substantiation in support of Agency rulemaking or litigation, in the case of an advance confidentiality determination, or for any other Agency purpose. The use of two letters is a clarification of existing EPA procedures. Some of the information requested differs slightly from the current Request for Substantiation letter, concerning the possible voluntary nature of the submission and the issue of substantial competitive harm, and takes into account the vast amount of information now available electronically. Nevertheless, EPA estimates that the overall burden to respond to inquiries contained in the proposed letter is the same as the burden to respond to inquiries contained in the current Request for Substantiation letter.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average approximately 5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The total annual hour and cost burden for all substantiations is as follows:

Respondents/Affected Entities: Business and other for profit organizations.

Estimated Number of Respondents: 1101.

Frequency of Response: On occasion.
Estimated Total Annual Hour Burden: 6,521 hours.

Estimated Total Annual Capital and Operations and Maintenance Cost: \$0.

Changes in the Estimates: These estimates show an increase of approximately 89 hours and \$27,973 in the total estimated burden from the figures currently identified in the OMB Inventory of Approved ICR Burdens. The increase in the burden hour estimate results from an adjustment to incorporate 0.20 hours per substantiation request for an attorney to review the request. The increase in cost burden results from this small increase in the hour estimate and from updated hourly wages for private industry and Agency employees.

Dated: August 12, 2003.

Director, Collection Services Division.
