## DEPARTMENT OF LABOR

### Employment & Training Administration

#### Office of Policy Development Evaluation and Research; Call for Papers; Biennial National Research Conference on "Workforce Investment Issues in the United States"; Washington, DC June 4-5, 2003

*Summary:* The Employment and Training Administration (ETA) of the U.S. Department of Labor (DOL) is the federal government agency responsible for implementing a national workforce investment and security system that enables workers and employers to compete and succeed in an ever-changing economy. This task is accomplished through the provision of world class labor market information, labor exchange services, job search assistance, training, and unemployment insurance benefits. These programs assist in the management of the risks associated with unemployment, declining income and skill shortages. They help workers in their search for work and their efforts to upgrade their human capital. They help employers find new employees who meet their skill requirements and upgrade the skills of their incumbent workers.

In 1998, the Workforce Investment Act, the nation's most comprehensive effort at streamlining and transforming public employment, job training and education programs and agencies into a system that meets the skill needs of today's economy, was passed. The implementation of the Workforce Investment Act (WIA) of 1998 combines a variety of workforce development programs and initiatives under one umbrella—the One-Stop System—to effectively serve the needs of job-seekers, workers and employers in the changing workforce development environment at the onset of the 21st century economy.

Under the provisions of the WIA, the Secretary of Labor is required every two years to prepare a five-year research plan for research, pilot and demonstration initiatives. This research plan reflects a strategic vision for research efforts based upon input from stakeholders in employment and training research, a review of recent efforts, an identification of areas where future research may be needed, and a review of possible research methodologies.

In light of major changes in the macro-economy that have taken place in the areas of technological transformation, increasing globalization and changing demographics over the
