

• We revised the calculation of net price in the United States to eliminate the double counting of billing adjustments. See *Comment 14*.

#### Final Results of Review

We determine that the following percentage margin exists for the reviewed companies during the period July 1, 2000 through June 30, 2001:

#### STAINLESS STEEL SHEET AND STRIP IN COILS FROM KOREA

Manufacturer/exporter/reseller	Margin (percent)
POSCO .....	0.98
DMC .....	5.44

The Department shall determine, and Customs shall assess, antidumping duties on all appropriate entries. In accordance with 19 CFR 351.212(b)(1), we have calculated exporter/importer (or customer)-specific assessment rate for merchandise subject to this review. The Department will issue appraisal instructions directly to the Customs Service within 15 days of publication of these final results of review. We will direct the Customs Service to assess the resulting assessment rates against the entered customs values for the subject merchandise on each of that importer's entries during the review period. For customer's duty-assessment purposes, we will calculate importer-specific assessment rates by dividing the dumping margins calculated for each importer by the total entered value of sales for each importer during the period of review.

#### Cash Deposit Requirements

The following deposit requirements will be effective upon publication of this notice of final results of administrative review for all shipments of stainless steel sheet and strip in coils from the Republic of Korea entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(1) of the Act: (1) The cash deposit rates for POSCO and DMC will be the rates shown above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) if neither the

exporter nor the manufacturer is a firm covered in these or any previous reviews conducted by the Department, the cash deposit rate will be the "all others" rate, which is 2.49 percent.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

#### Notification of Interested Parties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of the antidumping duties or countervailing duties occurred and the subsequent assessment of double antidumping duties or countervailing duties.

This notice also serves as a reminder to parties subject to administrative protective orders ("APOs") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this determination and notice in accordance with sections 751(a)(1) and 771(i) of the Act.

Dated: February 3, 2003.

**Faryar Shirzad**,  
Assistant Secretary for Import Administration.

#### Appendix 1—Issues in the Decision Memorandum

##### A. Issues with Respect to POSCO

- Comment 1: ISE ratio in the United States
- Comment 2: Imputed Credit Offset to Pohang Steel America's ("POSAM") Interest Expense Incurred in the United States
- Comment 3: Major Inputs From Affiliated Parties
- Comment 4: Housing Expenses in the United States
- Comment 5: Loss on Valuation of Inventory

- Comment 6: Short-term Financial Income Earned on Monetary Instruments
- Comment 7: Reversal of an Allowance for Bad Debt
- Comment 8: Unrealized Income Derived from Long-Term Trade Receivables
- Comment 9: Constructed Export Price ("CEP") Offset on CEP Sales
- Comment 10: Ministerial Errors in the Merging of the Cost Files
- Comment 11: Ministerial Error in the Calculation of L-Grade Adjustment

#### B. Issues with Respect to DMC

- Comment 12: Adjustment for DMC's Net Financial Expenses Ratio in the Home Market
- Comment 13: Ocean Metal Corporation's ("OMC") Interest Expense Offset with Imputed Credit Expenses in the United States
- Comment 14: Deduction of Billing Adjustments from OMC's Gross Unit Price
- Comment 15: Inclusion of All Home Market Sales in the CEP Profit Calculation

#### Stainless Steel Sheet and Strip in Coils From Germany; Notice of Final Results of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of final results of antidumping duty administrative review.

**SUMMARY:** On August 7, 2002, the Department of Commerce (the Department) published the preliminary results of administrative review of the antidumping order covering stainless steel sheet and strip in coils from Germany. See *Stainless Steel Sheet and Strip in Coils from Germany; Notice of Preliminary Results of Antidumping Duty Administrative Review*, 67 FR 51199 (August 7, 2002) (*Preliminary Results*). The merchandise covered by this order is stainless steel sheet and strip in coils as described in the "Scope of the Review" section of the **Federal Register** notice. The period of review (POR) is July 1, 2000, through June 30, 2001. We invited parties to comment on our *Preliminary Results*. The Department also notes that on

September 30, 2002 we published the final results of changed circumstances antidumping duty administrative review of stainless steel sheet and strip in coils from Germany. See *Stainless Steel Sheet and Strip in Coils from Germany: Final Results of Changed Circumstances Antidumping Duty Administrative Review*, 67 FR 61319 (September 30, 2002) (*Changed Circumstances*). We determined that ThyssenKrupp Nirosta GmbH (TKN) is the successor-in-interest to Krupp Thyssen Nirosta GmbH.<sup>1</sup>

Based on our analysis of the comments received, we have made changes in the margin calculations. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margin for the reviewed firm is listed below in the section entitled "Final Results of the Review."

**EFFECTIVE DATE:** February 10, 2003.

**FOR FURTHER INFORMATION CONTACT:**

Patricia Tran, Michael Heaney, or Robert James at (202) 482-1121, (202) 482-4475, or (202) 482-0649, respectively, Antidumping and Countervailing Duty Enforcement Group III, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:**

**Scope of the Review**

For purposes of this order, the products covered are certain stainless steel sheet and strip in coils. Stainless steel is an alloy steel containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. The subject sheet and strip is a flat-rolled product in coils that is greater than 9.5 mm in width and less than 4.75 mm in thickness, and that is annealed or otherwise heat treated and pickled or otherwise descaled. The subject sheet and strip may also be further processed (e.g., cold-rolled, polished, aluminized, coated, etc.) provided that it maintains the specific dimensions of sheet and strip following such processing.

The merchandise subject to this order is classified in the Harmonized Tariff Schedule of the United States (HTS) at subheadings: 7219.13.00.31, 7219.13.00.51, 7219.13.00.71,

7219.13.00.81, 7219.14.00.30, 7219.14.00.65, 7219.14.00.90, 7219.32.00.05, 7219.32.00.20, 7219.32.00.25, 7219.32.00.35, 7219.32.00.36, 7219.32.00.38, 7219.32.00.42, 7219.32.00.44, 7219.33.00.05, 7219.33.00.20, 7219.33.00.25, 7219.33.00.35, 7219.33.00.36, 7219.33.00.38, 7219.33.00.42, 7219.33.00.44, 7219.34.00.05, 7219.34.00.20, 7219.34.00.25, 7219.34.00.30, 7219.34.00.35, 7219.35.00.05, 7219.35.00.15, 7219.35.00.30, 7219.35.00.35, 7219.90.00.10, 7219.90.00.20, 7219.90.00.25, 7219.90.00.60, 7219.90.00.80, 7220.12.10.00, 7220.12.50.00, 7220.20.10.10, 7220.20.10.15, 7220.20.10.60, 7220.20.10.80, 7220.20.60.05, 7220.20.60.10, 7220.20.60.15, 7220.20.60.60, 7220.20.60.80, 7220.20.70.05, 7220.20.70.10, 7220.20.70.15, 7220.20.70.60, 7220.20.70.80, 7220.20.80.00, 7220.20.90.30, 7220.20.90.60, 7220.90.00.10, 7220.90.00.15, 7220.90.00.60, and 7220.90.00.80. Although the HTS subheadings are provided for convenience and Customs purposes, the Department's written description of the merchandise under review is dispositive.

Excluded from the scope of this order are the following: (1) Sheet and strip that is not annealed or otherwise heat treated and pickled or otherwise descaled; (2) sheet and strip that is cut to length; (3) plate (*i.e.*, flat-rolled stainless steel products of a thickness of 4.75 mm or more); (4) flat wire (*i.e.*, cold-rolled sections, with a prepared edge, rectangular in shape, of a width of not more than 9.5 mm); and (5) razor blade steel. Razor blade steel is a flat-rolled product of stainless steel, not further worked than cold-rolled (cold-reduced), in coils, of a width of not more than 23 mm and a thickness of 0.266 mm or less, containing, by weight, 12.5 to 14.5 percent chromium, and certified at the time of entry to be used in the manufacture of razor blades. See Chapter 72 of the HTSUS, "Additional U.S. Note" 1(d).

In response to comments by interested parties, the Department has determined that certain specialty stainless steel products are also excluded from the scope of this order. These excluded products are described below.

Flapper valve steel is defined as stainless steel strip in coils containing, by weight, between 0.37 and 0.43 percent carbon, between 1.15 and 1.35 percent molybdenum, and between 0.20 and 0.80 percent manganese. This steel also contains, by weight, phosphorus of

0.025 percent or less, silicon of between 0.20 and 0.50 percent, and sulfur of 0.020 percent or less. The product is manufactured by means of vacuum arc remelting, with inclusion controls for sulphide of no more than 0.04 percent and for oxide of no more than 0.05 percent. Flapper valve steel has a tensile strength of between 210 and 300 ksi, yield strength of between 170 and 270 ksi, plus or minus 8 ksi, and a hardness (Hv) of between 460 and 590. Flapper valve steel is most commonly used to produce specialty flapper valves for compressors.

Also excluded is a product referred to as suspension foil, a specialty steel product used in the manufacture of suspension assemblies for computer disk drives. Suspension foil is described as 302/304 grade or 202 grade stainless steel of a thickness between 14 and 127 microns, with a thickness tolerance of plus-or-minus 2.01 microns, and surface glossiness of 200 to 700 percent Gs. Suspension foil must be supplied in coil widths of not more than 407 mm, and with a mass of 225 kg or less. Roll marks may only be visible on one side, with no scratches of measurable depth. The material must exhibit residual stresses of 2 mm maximum deflection, and flatness of 1.6 mm over 685 mm length.

Certain stainless steel foil for automotive catalytic converters is also excluded from the scope of this order. This stainless steel strip in coils is a specialty foil with a thickness of between 20 and 110 microns used to produce a metallic substrate with a honeycomb structure for use in automotive catalytic converters. The steel contains, by weight, carbon of no more than 0.030 percent, silicon of no more than 1.0 percent, manganese of no more than 1.0 percent, chromium of between 19 and 22 percent, aluminum of no less than 5.0 percent, phosphorus of no more than 0.045 percent, sulfur of no more than 0.03 percent, lanthanum of between 0.002 and 0.05 percent, and total rare earth elements of more than 0.06 percent, with the balance iron.

Permanent magnet iron-chromium-cobalt alloy stainless strip is also excluded from the scope of this order. This ductile stainless steel strip contains, by weight, 26 to 30 percent chromium, and 7 to 10 percent cobalt, with the remainder of iron, in widths 228.6 mm or less, and a thickness between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 50 and 300 oersteds. This product is most commonly used in electronic sensors and is currently

<sup>1</sup>In addition to ThyssenKrupp Nirosta GmbH the following companies involved in the production, importation, and U.S. sale of subject merchandise have changed their corporate names: Krupp Thyssen Nirosta North America, Inc. to ThyssenKrupp Nirosta North America, Inc.; Krupp VDM GmbH to ThyssenKrupp VDM GmbH; and Krupp VDM Technologies Corporation to ThyssenKrupp VDM USA, Inc.

available under proprietary trade names such as "Arnokrome III."<sup>2</sup>

Certain electrical resistance alloy steel is also excluded from the scope of this order. This product is defined as a non-magnetic stainless steel manufactured to American Society of Testing and Materials (ASTM) specification B344 and containing, by weight, 36 percent nickel, 18 percent chromium, and 46 percent iron, and is most notable for its resistance to high temperature corrosion. It has a melting point of 1390 degrees Celsius and displays a creep rupture limit of 4 kilograms per square millimeter at 1000 degrees Celsius. This steel is most commonly used in the production of heating ribbons for circuit breakers and industrial furnaces, and in rheostats for railway locomotives. The product is currently available under proprietary trade names such as "Gilphy 36."<sup>3</sup>

Certain martensitic precipitation-hardenable stainless steel is also excluded from the scope of this order. This high-strength, ductile stainless steel product is designated under the Unified Numbering System (UNS) as S45500-grade steel, and contains, by weight, 11 to 13 percent chromium, and 7 to 10 percent nickel. Carbon, manganese, silicon and molybdenum each comprise, by weight, 0.05 percent or less, with phosphorus and sulfur each comprising, by weight, 0.03 percent or less. This steel has copper, niobium, and titanium added to achieve aging, and will exhibit yield strengths as high as 1700 Mpa and ultimate tensile strengths as high as 1750 Mpa after aging, with elongation percentages of 3 percent or less in 50 mm. It is generally provided in thicknesses between 0.635 and 0.787 mm, and in widths of 25.4 mm. This product is most commonly used in the manufacture of television tubes and is currently available under proprietary trade names such as "Durphynox 17."<sup>4</sup>

Finally, three specialty stainless steels typically used in certain industrial blades and surgical and medical instruments are also excluded from the scope of this order. These include stainless steel strip in coils used in the production of textile cutting tools (e.g., carpet knives).<sup>5</sup> This steel is similar to ASTM grade 440F, but containing, by weight, 0.5 to 0.7 percent of molybdenum. The steel also contains, by weight, carbon of between 1.0 and

1.1 percent, sulfur of 0.020 percent or less, and includes between 0.20 and 0.30 percent copper and between 0.20 and 0.50 percent cobalt. This steel is sold under proprietary names such as "GIN4 Mo." The second excluded stainless steel strip in coils is similar to AISI 420-J2 and contains, by weight, carbon of between 0.62 and 0.70 percent, silicon of between 0.20 and 0.50 percent, manganese of between 0.45 and 0.80 percent, phosphorus of no more than 0.025 percent and sulfur of no more than 0.020 percent. This steel has a carbide density on average of 100 carbide particles per square micron. An example of this product is "GIN5" steel. The third specialty steel has a chemical composition similar to AISI 420 F, with carbon of between 0.37 and 0.43 percent, molybdenum of between 1.15 and 1.35 percent, but lower manganese of between 0.20 and 0.80 percent, phosphorus of no more than 0.025 percent, silicon of between 0.20 and 0.50 percent, and sulfur of no more than 0.020 percent. This product is supplied with a hardness of more than Hv 500 guaranteed after customer processing, and is supplied as, for example, "GIN6."<sup>6</sup>

**Analysis of Comments Received**

All issues raised in the case and rebuttal briefs by parties to this administrative review are addressed in the "Issues and Decision Memorandum" (Decision Memorandum) from Joseph A. Spetrini, Deputy Assistant Secretary for Import Administration to Faryar Shirzad, Assistant Secretary for Import Administration, dated February 3, 2003, which is hereby adopted by this notice. A list of the issues which parties have raised and to which we have responded, all of which are in the Decision Memorandum, is attached to this notice as an appendix. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in this public memorandum which is on file in room B-099 of the main Department of Commerce building. In addition, a complete version of the Decision Memorandum can be accessed directly on the internet at [www.ia.ita.doc.gov](http://www.ia.ita.doc.gov). The paper copy and electronic version of the Decision Memorandum are identical in content.

**Changes Since the Preliminary Results**

Based on our analysis of comments received, we have made changes in the margin calculations. The changes are listed below:

- We have calculated average values for finish, gauge, width, hot/cold rolled, and temper for any sales missing these physical characteristics.

- We modified our calculation of interest expenses.

- We have deducted indirect selling expenses incurred in the country of manufacture from U.S. price and in our calculation of CEP profit to account for all U.S. selling expenses for TKN's affiliated U.S. reseller KHSP.

- We have also corrected certain programming and clerical errors in our preliminary results, where applicable. Any alleged programming errors with which we do not agree are discussed in the relevant sections of the Decision Memorandum, accessible in B-099 of the main Department of Commerce building and on the web at [www.ia.ita.doc.gov](http://www.ia.ita.doc.gov).

**Final Results of the Review**

We determine the following percentage weighted-average margin exists for the period July 1, 2000 through June 30, 2001:

Manufacturer/Exporter	Weighted average margin (percentage)
TKN .....	4.77

**Liquidation**

The Department shall determine, and U.S. Customs Service (Customs) shall assess, antidumping duties on all appropriate entries. In accordance with 19 CFR 351.212(b)(1), we have calculated exporter/importer-specific assessment rates. The Department will issue appropriate assessment instructions directly to Customs within 15 days of publication of these final results of review. With respect to constructed export price sales, we divided the total dumping margins for the reviewed sales by the total entered value of those reviewed sales for each importer. We will direct Customs to assess the resulting assessment rate against the entered Customs values for the subject merchandise on each of the importer's entries under the relevant order during the POR.

**Cash Deposit Requirements**

The following deposit requirements will be effective upon publication of this notice of final results of administrative review for all shipments of stainless steel sheet and strip in coils from Germany entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed

<sup>2</sup> "Arnokrome III" is a trademark of the Arnold Engineering Company.

<sup>3</sup> "Gilphy 36" is a trademark of Imphy, S.A.

<sup>4</sup> "Durphynox 17" is a trademark of Imphy, S.A.

<sup>5</sup> This list of uses is illustrative and provided for descriptive purposes only.

<sup>6</sup> "GIN4 Mo," "GIN5" and "GIN6" are the proprietary grades of Hitachi Metals America, Ltd.

company will be the rate shown above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 13.48 percent. This rate is the "All Others" rate from the amended final determination in the LTFV investigations. See *Stainless Steel Sheet and Strip in Coils From Germany: Amended Final Determination of Antidumping Duty Investigation*, 67 FR 15178, 15179 (March 29, 2002).

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping or countervailing duties occurred and the subsequent assessment of doubled antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this determination and notice in accordance with sections 751(a)(1) and 777(i) of the Tariff Act.

Dated: February 3, 2003.

**Faryar Shirzad,**  
Assistant Secretary for Import Administration.

### International Trade Administration

[A-428-825]

#### Stainless Steel Sheet and Strip in Coils from Germany; Antidumping Duty Administrative Review; Extension of Time Limit for Preliminary Results

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of Extension of Time Limits.

**SUMMARY:** The Department of Commerce (the Department) is extending the time limits for the preliminary results of the 2001-2002 administrative review of the antidumping duty order on stainless steel sheet and strip in coils from Germany. This review covers one manufacturer/exporter of the subject merchandise to the United States and the period July 1, 2001 through June 30, 2002.

**EFFECTIVE DATE:** February 10, 2003.

**FOR FURTHER INFORMATION CONTACT:** Patricia Tran at (202) 482-1121 or Robert James at (202) 482-0649, Antidumping and Countervailing Duty Enforcement Group III, Office Eight, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW, Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:** On August 27, 2002, in response to requests from the respondent and petitioners, we published a notice of initiation of this administrative review in the **Federal Register**. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 67 FR 55000 (August 27, 2002). Pursuant to the time limits for administrative reviews set forth in section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Tariff Act), the current deadlines are April 2, 2003 for the preliminary results and July 31, 2003, for the final results. It is not practicable to complete this review within the normal statutory time limit due to a number of significant case issues, such as affiliated resellers, the use of downstream sales, and physical

product characteristics. Therefore, the Department is extending the time limits for completion of the preliminary results until July 31, 2003 in accordance with section 751(a)(3)(A) of the Tariff Act. The deadline for the final results of this review will continue to be 120 days after publication of the preliminary results.

This extension is in accordance with section 751(a)(3)(A) of the Tariff Act.

Dated: January 31, 2003.

**Joseph A. Spetrini,**  
Deputy Assistant Secretary for Import Administration, Group III.

#### Stainless Steel Sheet and Strip in Coils From Italy: Final Results of Antidumping Administrative Review

**AGENCY:** Import Administration, International Trade Administration, U.S. Department of Commerce.

**ACTION:** Notice of final results in the antidumping duty administrative review of stainless steel sheet and strip in coils from Italy

**SUMMARY:** On August 7, 2002, the U.S. Department of Commerce ("Department") published in the **Federal Register** the preliminary results of its administrative review of the antidumping duty order on stainless steel sheet and strip in coils ("SSSS") from Italy. See *Preliminary Results of Antidumping Duty Administrative Review: Stainless Steel Sheet and Strip in Coils from Italy*, 67 FR 51224 (August 7, 2002) ("Preliminary Results"). This review covers imports of subject merchandise from ThyssenKrupp Acciai Speciali Terni S.p.A ("TKAST") and ThyssenKrupp AST USA, Inc. ("TKASTUSA"). The period of review ("POR") is July 1, 2000 through June 30, 2001.

Based on our analysis of the comments received, we have made changes from our results from the preliminary results of review. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margin for the reviewed firm is listed below in the section entitled "Final Results of the Review."

**EFFECTIVE DATE:** February 10, 2003.

**FOR FURTHER INFORMATION CONTACT:** Stephen Bailey or Robert Bolling,
