BILLING CODE 6820-EP-P

DEPARTMENT OF DEFENSE

Department of the Army

Preparation of an Environmental Impact Statement (EIS) for the Renewal of the Special Use Permit for Military Activities on the De Soto National Forest and the Implementation of the Master Plan at Camp Shelby, Mississippi

AGENCY: Mississippi National Guard (MSNG), National Guard Bureau (NGB), Department of the Army (DA), DoD; National Forests in Mississippi, U.S. Forest Service, U.S. Department of Agriculture.

ACTION: Notice of intent.

SUMMARY: NGB as lead agency, along with the U.S. Forest Service as a cooperating agency, will prepare an EIS for the renewal of the Special Use Permit (SUP) for Military Use of National Forest Lands at Camp Shelby, Mississippi. In addition, the EIS will address the implementation of the Master Plan for Camp Shelby.

ADDRESSES: Written comments may be forwarded to the Mississippi Army National Guard Environmental Office (MSARNG-ENV), ATTN: Brian Neely, Natural and Cultural Resources Manager, P.O. Box 5027, Jackson, MS 39296-5027.

FOR FURTHER INFORMATION CONTACT:

Brian Neely, Natural and Cultural Resources Manager, at (601) 313-6128; or Colonel Robert A. Lee, Environmental Program Manager at (601) 313-6228.

SUPPLEMENTARY INFORMATION: The MSNG has historically utilized public lands for military activities under a special use permit administered by the U.S. Forest Service. The current permit is subject to renewal in December 2005. The SUP establishes the levels and types of military activities that may occur on National Forest lands. EISs completed in 1991, 1994, and 1998 evaluated current military activities at Camp Shelby. The proposed EIS will evaluate extending the SUP from 10 to 20 years and will now include an Operations and Maintenance plan with alternatives covering military activities proposed by the proponents (DA and NGB) and update previous analyses as necessary. The EIS will disclose and evaluate the environmental impacts associated with military use of National Forest lands. The U.S. Forest Service and the NGB will utilize the EIS in making decisions concerning military use of National Forest, DoD, and state lands at Camp Shelby. The U.S. Forest Service will make its decision concerning the renewal of the SUP based upon the findings of the EIS.

Significant Issues: Camp Shelby contains approximately 134,000 acres of land some of which serves as habitat for protected flora and fauna. This includes one Federally listed endangered plant species (Louisiana Quillwort), one Federally listed threatened species (Gopher Tortoise) and two Federal candidate species (Camp Shelby Burrowing Crawfish and the Black Pine Snake). Camp Shelby also includes two historic properties listed on the National Register of Historic Places, two prehistoric sites eligible for listing on the National Register of Historic Places and an additional 32 sites have been recommended for protection until phase II testing can assess the significance of these sites for inclusion on the National Register of Historic Places. Camp Shelby also contains over six historic cemeteries that are fenced and protected from any disturbance. These natural and cultural resource issues will be considered in all proposed projects that are identified in the EIS.

Alternatives: Two alternatives for military use of Camp Shelby have been identified for analysis in the EIS. The alternatives are: (1) No action, whereby military activities would be allowed to continue as presently permitted to include construction and maintenance of facilities evaluated and approved in

previous environmental documents, and (2) mission requirements, whereby current activities and additional use to support mission requirements on State of Mississippi, DoD, and National Forest lands would be allowed. Future mission requirements include: combined arms area, military operations in military terrain facility, urban assault course, waste water treatment plant with associated pipeline, simulation and exercise center and Army transformation. Other alternatives may be assessed as more specific actions are developed, public concerns are raised, and issues identified.

Public scoping meetings will be held at two locations: one in Hattiesburg and one on the Mississippi Gulf Coast area. Dates, times and exact locations for these meetings will be announced through letters, public notices, display advertisements, and legal advertisements and will be released to newspapers of general circulation a minimum of 15 days prior to the meetings.

Dated: August 27, 2003.

Richard E. Newsome,

Acting Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health) OASA (I&E).

BILLING CODE 3710-08-M

DEPARTMENT OF DEFENSE

Department of the Army

Notice of Intent To Prepare a Legislative Environmental Impact Statement (LEIS) for the Withdrawal of Lands at the Limestone Hills Training Area (LHTA), Near Townsend, MT

AGENCY: Department of the Army, DoD.

ACTION: Notice of intent.

SUMMARY: The Department of the Army announces its intent to prepare an LEIS pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, as implemented by Council on Environmental Quality regulations (40 CFR 1500-1508). The LEIS will analyze both the proposed withdrawal of lands supporting training exercises for the Montana Army National Guard (MTARNG) and the associated Bureau of Land Management (BLM) Headwaters Resource Management Plan Amendment. The BLM is participating as an active cooperation agency in the preparation of the LEIS.

ADDRESSES: Written comments or questions should be forwarded by mail to Ms. Sundi West, Montana Army National Guard Fort Harrison, P.O. Box

4789, Helena, MT 59604–4789; via telephone at (406) 324–3088, or via email at Sundi.West@mt.ngb.army.mil.

FOR FURTHER INFORMATION CONTACT: Ms. Susie Williams, U.S. Bureau of Land Management, 106 North Parkmont, Butte, MT 59701, via phone at (406) 533–7638, or via email at Elizabeth_Williams@blm.gov.

SUPPLEMENTARY INFORMATION: The objective of the LEIS is to provide the results of comprehensive analysis to the Secretary of Interior and the Department of the Army to develop findings and recommendations to Congress regarding the proposed land withdrawal, and to serve as a public information source. The study area for the environmental analysis will be resource-dependent and is likely to include all of Lewis and Clark County and Broadwater County for socio-economic resources, all MTARNG facilities for military mission, and the LHTA for biological and mineral resources.

The LEIS will analyze potential environmental effects of the proposed action and alternatives including a no action alternative. Under the no action alternative, the current right-of-way grant from the BLM for use of the LHTA by the MTARNG would not be renewed in 2014 for continued military purposes. Other alternatives may consist of alternatives-shared management roles of the LHTA for the MTARNG and the BLM, alternative land use options, and alternative locations. The alternatives will be developed during preparation of the Draft LEIS as a result of public input.

Significant Issues: The LHTA is a 23,100-acre parcel of land with private and state-owned in-holdings totaling approximately 2,640 acres. BLM manages 20,460 acres of the total acreage and allows the MTARNG to conduct military training on its property through a right-of-way agreement that is set to expire in 2014. The public land is also used for grazing, mining, recreation, transportation utility right-of-ways, and wildlife management. A limestone mine is currently operating within the LHTA and every federally-managed acre of the LHTA falls within one of seven grazing allotments. In addition, the MTARNG is currently engaged in clearing unexploded ordnance from a range on the LHTA that is no longer in use.

Significant issues the LEIS will analyze include the following and as well as any additional issues raised during scoping: (1) Continued ability of Graymont Western's Indian Creek Limestone Mine to extract and process ore within the LHTA; (2) allocation and

management of grazing allotments; (3) public access to the LHTA; (4) noise and dust generated during training exercises and vehicular traffic; (5) impacts to Broadwater County due to possible termination of payments in lieu of taxes by the BLM if the withdrawal is granted; (6) potential impacts to wildlife in the Elkhorn Management Area; (7) consistency of land management policy and implementation; (8) potential impacts to range management and cleanup activities; (9) owner access to, and use of, inholdings; and (10) impacts to local economies and MTARNG training facilities under the no action alternative.

The Department of the Army, through the MTARNG, is initiating a public scoping process for the purpose of determining public concerns and issues to be analyzed and addressed for this action. A public scoping meeting will be held at the Broadwater School Community Library, 201 North Spruce, Townsend, Montana, and at the Chamber of Commerce of Helena; 225 Cruse Avenue, Helena, Montana. A Public open house will occur at each site from 3:00 p.m. to 5:30 p.m. prior to each scoping meeting. The dates and times of these meetings will be announced in general public media.

A brief presentation will precede a request for public information and comments. MTARNG and BLM representatives will be available at these meetings to receive information and comments from agencies and the public regarding issues of concern. It is important that federal, state and local agencies, and interested individuals take this opportunity to provide information or identify environmental concerns that should be addressed during the analysis and preparation of the LEIS. Forms for written comments will also be available to submit written comments at these meetings.

Agencies and the public are also invited and encouraged to provide written comments in addition to, or in lieu of, oral comments at the public scoping meetings. To be most helpful, scoping comments should clearly describe specific information, data, issues or topics which the commenter believes the LEIS should address. To be considered in the LEIS, comments and suggestions should be received no later than 60 days following the public scoping meeting.

Dated: August 27, 2003.

Richard E. Newsome,

Acting Deputy Assistant Secretary of the Army (Environmental, Safety and Occupational Health), OASA (I&E).

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

SUMMARY: The Acting Leader, Regulatory Information Management Group, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before November 3, 2003.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Leader, Regulatory Information Management Group, Office of the Chief Information Officer, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the
