The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of STP Nuclear Operating Company (the licensee) to withdraw its February 14, 2002, and its supplement dated October 24, 2002, applications for proposed amendments to Facility Operating License Nos. NPF– 76 and No. NPF–80 for the South Texas Project (STP), Units 1 and 2, located in Matagorda County, Texas.

The proposed amendments would have modified STP, Units 1 and 2, Technical Specification (TS) 3.3.2 requirements for Loss of Power Instrumentation (Functional Unit 8) and TSs 3.8.1.1, 3.8.1.2, and 3.8.1.3 for AC Sources.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on April 30, 2002, (67 FR 21294). This application withdraws the proposed changes to TS 3.3.2 requirements for Loss of Power Instrumentation and the proposed changes to TS 3.8.1.1 for AC Sources. The changes proposed for TS 3.3.2 are described in the application dated September 22, 2003 (NOC-AE-03001578). The changes proposed for TSs 3.8.1.2 and 3.8.1.3 are documented in the September 22, 2003 (NOC-AE-03001472) application.

For further details with respect to this action, see the application for amendment dated February 14, 2002, and its supplement dated October 24, 2002, and the licensee's letters dated September 22, 2003, which withdrew the application for license amendment. Documents may be examined, and/or

Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission (NRC) has issued a revision of a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in its review of applications for permits and licenses, and data needed by the NRC staff in its review of applications for permits and licenses.

Revision 1 of Regulatory Guide 1.180, "Guidelines for Evaluating Electromagnetic and Radio-Frequency Interference in Safety-Related Instrumentation and Control Systems," provides guidance to licensees and applicants on methods acceptable to the NRC staff for complying with the NRC's regulations on design, installation, and testing practices for addressing the effects of electromagnetic and radio-frequency interference and power surges on safety-related instrumentation and control systems.
