DEPARTMENT OF HEALTH AND HUMAN SERVICES**Centers for Disease Control and Prevention****Sociocultural and Community Risk and Protective Factors for Child Maltreatment and Youth Violence**

Announcement Type: New.
Funding Opportunity Number: 04056.
Catalog of Federal Domestic Assistance Number: 93.136.
Key Dates: Letter of Intent Deadline: January 5, 2004.
Application Deadline: February 17, 2004.

I. Funding Opportunity Description

Authority: This program is authorized under section 301(a) [42 U.S.C. 241(a)] of the Public Health Service Act and section 391(a) [42 U.S.C. 280b(a)] of the Public Service Health Act, as amended.

Purpose: The purpose of this program is to inform violence prevention efforts by testing the extent to which potentially modifiable sociocultural and community risk and protective factors are associated with child maltreatment and early risk factors for youth violence. This program addresses the "Healthy People 2010" focus area of Injury and Violence Prevention.

Measurable outcomes of the program will be in alignment with the following performance goal for the National Center for Injury Prevention and Control (NCIPC): Conduct a targeted program of research to reduce injury-related death and disability.

Research Objectives: Numerous researchers have stressed the importance of the influence of external environments on family functioning and risk for child maltreatment and subsequent youth violence, as well as the need for research based in an ecological-developmental framework in which risk and protective factors transact across multiple individual and sociocultural contexts (*See Attachment 1, References 1-4 as published on the CDC Web site*). However, to date, the majority of research on risk and protective factors for child maltreatment has focused on identifying individual characteristics of the child (*e.g.*, temperament, cognitive and physical disability) and caregivers (*e.g.*, alcohol/drug use, depression, history of childhood victimization) with fewer studies focusing on the larger community and sociocultural factors that influence these characteristics. In addition, although research has identified a number of early behavioral and family risk factors for youth
