DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Docket OST-02-12148]

Electronic Transmission and Storage of Drug Testing Information Federal Advisory Committee; Meeting

AGENCY: Office of the Secretary, Department of Transportation.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770) notice is hereby given that the Department of Transportation (DOT) Electronic Transmission and Storage of Drug Testing Information Federal Advisory Committee will meet for the second time in a public session on April 7-8, 2003, at the Embassy Suites Hotel, Crystal City—National Airport, 1300 Jefferson Davis Highway, Arlington, VA 22202, (703) 979-9799, FAX: (703) 892-8121. The purpose of the Committee is to recommend to the Department the type and level of electronic security that should be used for the transmission and storage of drug testing information, to assess the type of format and methodology that would be appropriate, and to recommend the level and type of electronic signature technology that would support the procedures used in the DOT drug and alcohol program. The Committee held its first meeting on June 18-19, 2002 in Washington, DC. A list of the committee members and a copy of the first meeting's transcripts are available in the docket posted on the Internet at <http://dms.dot.gov/search/>; the docket number is 12148.

FOR FURTHER INFORMATION CONTACT: Don Shatinsky or Minnie McDonald, Office of Drug and Alcohol Policy and Compliance (ODAPC), Office of the Secretary, Department of Transportation at voice (202) 366-3784, fax (202) 366-3897.

SUPPLEMENTARY INFORMATION: Since the beginning of drug testing, the DOT has sought ways to reduce the significant amount of paper documentation generated for the forensic accountability of drug test results. We are now in an era of various electronic capabilities that can further reduce the paper work burden. The transportation industry is asking us to move more in that direction. We want to accommodate this request, but we want to make sure that the integrity and confidentiality requirements of the program are maintained.

The Department made modest changes when 49 CFR Part 40 was updated and republished on April 19, 2000. We permitted greater use of faxes and scanned computer images for reporting test results. Additionally, for negative test results we permitted laboratories to send electronic reports to MROs, provided the laboratory and MRO ensured that the information is accurate and can be transmitted in such a manner as to prevent unauthorized access or release while it is transmitted or stored.

The Department believes that the increased use of electronic reporting is both inevitable and beneficial. At the same time, we want to make sure that there are good, consistent minimum standards for the use of this technology, in order to protect the important integrity and confidentiality requirements of the program. For these reasons, DOT established the Electronic Transmission and Storage of Drug Testing Information Federal Advisory Committee. The purpose of the Committee is to recommend regulatory modifications it deems necessary if Part 40 is to accommodate newer electronic technology. The Committee will assess the current status of electronic security technology and will make recommendations about consistent minimum standards for its use in the transmission and storage of drug testing results. Additionally, the Committee will examine the formats and methodologies used in transmitting electronic information, as well as the concept, parameters, and procedures used in implementing electronic signature technology within the framework of the DOT drug and alcohol testing program. The Committee will advise DOT regarding these findings. The Department anticipates that, following the receipt of the Committee's final recommendations, DOT will propose changes to Part 40 through a notice of proposed rulemaking that will result in minimum standards for security in transmission and storage of drug testing information and would

¹⁰ 17 CFR 200.30-3(a)(12).

result in a more widespread use of electronic technology in the program.

The Committee held its first public meeting on June 18–19, 2002 in Washington, DC. The first meeting was used to introduce the Committee Members, review the purpose of the Committee, and to review some of the issues that the Committee needs to address as part of the process to develop appropriate recommendations to the DOT. Presentations from the major sections of interested stake holders were conducted by Committee members, invited guests, and by the general public. A complete transcription of all discussions during the two days is available at the above-cited internet web site. Additionally, three sub-committees composed of Committee members were established to research, develop, and provide information to the whole Committee at its next meeting. These sub-committees addressed the following three areas: 1. Format of electronic reports; 2. security of electronic transmission and digital signatures; and 3. storage security of electronic information. This second meeting will focus on specific findings, issues, and recommendations of the sub-committees related to these three areas. Opportunity will be available for the general public to also make comments related to the information presented by the committee members.

Tentative agenda: Monday, April 7, 2003, 8:30 a.m.–12 p.m.: General presentations by the sub-committee chairpersons, 12 p.m.–1:15 p.m.: Lunch, 1:15 p.m.–3:30 p.m.: Continued presentations, 3:30 p.m.–5 p.m.: Public Comments or Presentations, 5 p.m.: End of First Day. Tuesday, April 9, 2003, 8:30 a.m.–12 p.m.: Discussion of Options and Future Committee Actions, 12 p.m.: Closing Comments, 2 p.m.: End of Meeting.
