SUPPLEMENTARY INFORMATION:**I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimized, collection instruments are understandable, and OSHA's estimate of the information-collection burden is correct.

The collections of information contained in the Walking-Working Surfaces standard are necessary to protect workers from the collapse of overloaded floors and the failure of defective portable metal ladders.

Paragraph 1910.22(d)(1) requires that load limits approved by the building official be marked on plates supplied and securely affixed by the owner of the building, or his duly authorized agent, in a conspicuous place in each space to which they relate. The plates are not to be removed or defaced but, if lost, removed, or defaced, they shall be replaced by the owner or his agent.

Under paragraph 1910.26(c)(2)(vii), ladders having defects are to be marked

and taken out of service until repaired by either the maintenance department or the manufacturer.

Paragraph 1910.28(e)(3) requires that outrigger scaffolds designed by a registered professional engineer be constructed and erected in accordance with table D-16 of this section. A copy of the detailed drawings and specifications showing the sizes and spacing of members shall be kept on the job.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information-collection requirements are necessary for the proper performance of the Agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information-collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

In addition, the Agency specifically requests information on the number of portable metal ladders that become defective in one year. Also, the Agency is interested in knowing whether outrigger scaffolds are used in general industry.

III. Proposed Actions

OSHA proposes to extend the Office of Management and Budget's (OMB) approval of the collection-information requirements specified by the Standard on Walking-Working Surfaces (29 CFR part 1910, subpart D). The Agency will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of these information-collection requirements.
